*Proceedings of the Madras Government, Revenue Department,
27th February 1874.*

No. 249. Read the following Endorsement of the Secretary to Government, Public Works Department, dated 17th February 1874 :—

Read the following letter from Lieut.-Col. W. FAREWELL, Inspecting Engineer for Ports and Communications, to Colonel G. W. WALKER, R.E., Chief Engineer and Secretary to Government, Public Works Department, dated Chepauk, 12th February 1874, No. 660-52 :—

WITH reference to G. O., No. 142-A, dated 18th September 1873, as it is absolutely necessary, to allow of a really reliable estimate being framed to perfect the Vedarniem Salt Canal, that a correct survey, with longitudinal and cross sections of levels of the canal should be prepared, in communication with the District Engineer, to whom I have given written instructions on the subject, I have the honour to submit, for sanction and provision of funds, an estimate prepared by him for the establishment required to complete the survey, etc., and also for fixing permanent bench-marks along the banks of the canal.

2. The canal is $32\frac{1}{2}$ miles in length, and it is calculated the establishment provided for will complete the survey and level sections in $3\frac{1}{2}$ months. The canal being purely a salt communication, I presume there will be no difficulty in obtaining the necessary funds for the survey establishment under that head.

3. The District Engineer reports that irrespective of the estimate required for perfecting the existing canal itself, he is about to submit an estimate for the extension of the canal for three miles to a salt-swamp, which extension, he notes, will cost about Rs. 20,000, while the Collector estimates to remove the salt that has been collected by bandies would cost Rs. 10,000. The estimate, when received, will be immediately submitted to you.

To
The Chief Engineer and
Secretary to Government
Public Works Department

Sir,

With reference to G. O.
No. 142 A dated 10th September 1873,
as it is absolutely necessary, to
allow of a really reliable estimate
being framed to perfect the
Vadarnim Salt Canal, that
a correct survey, with longitudinal
and cross sections of levels
of the Canal, should be pre-
pared, in communication
with the District Engineer, to
whom I have given written in-
structions on the subject, I have
the

the honor to submit, for sanction and provision of funds, an estimate prepared by him for the establishment required to complete the survey &c and also for fixing permanent bench marks along the banks of the canal.

2. The Canal is $32\frac{1}{2}$ miles in length and it is calculated the Establishment provided for will complete the survey and level sections in $3\frac{1}{2}$ months. The Canal being purely a salt communication, I presume, there will be no difficulty in obtaining the necessary funds for the Survey Establishment under that Head.

3. The District Engineer reports that irrespective of the estimate required for perfecting the existing canal itself, he is about to submit an estimate for the extension of the canal for 3 miles to a salt swamp, which extension, he

288
The notes, will cost about Rs 20,000 while the Collector estimates to remove the salt that has been collected by bandies would cost Rs 10,000. The estimate when received, will be immediately submitted to you.

I have the honor to be

Sir

Yours most Obedt Servt.

Quornick Lieut. Colonel

Inspecting Engineer for
Ports & Communications
