Proceedings of the Madras Government, Revenue Department, 23*rd March* 1874.

No. 201. Read the following Proceedings of the Board of Revenue, dated 16th March 1874, No. 603:—

Read the following letter from W. A. HAPPELL, Esq., Acting Sub-Collector in charge, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Tinnevelly, 6th March 1874, No. 153.

"In reply to Proceedings of the Board, dated 24th ultimo, I have the honour to report that the recent fall of rain has had little or no beneficial effect on the crops under rain-fed tanks, except in Tenkarei Taluq, where all crops are late, and, it is now believed, all will be saved.

2. The outturn of channel-irrigated lands is much better than was at first estimated, but much had withered before the rain fell. The manner in which remissions will be affected is shown as accurately as possible in the accompanying statement.

3. The sowing of the later dry crops, especially gingely oil-seed, has not yet been completed, and until it has I think it would be premature to remit the whole 50 per cent. dry crop remission which has been sanctioned.

4. The figures given for Sankaranainarkovil Taluq were arrived at before rain fell, and the actual remission of wet assessment will probably be about Rupees 7,000 less than the present estimate.

5. Prices are still Rs. 7-4-0 to Rs. 7-8-0 per cottah, and show no tendency to rise. The harvest is progressing, and there will probably be a fall in prices when the new grain comes to market.

ENCLOSURE No. 1.

Statement showing the amount of remissions estimated to be made in each taluq.

SUBMITTED for the information of Government, with reference to Government Order, 27th February 1874, No. 276.

2. On the 1st February Mr. Puckle estimated that remissions would have to be given to the amount of Rs. 4,00,000. The estimate is now Rs. 3,56,000.

Madras

SIR,

In reply to Proceedings of the Board dated 26th Ultimo, I have the honor to report that the recent fall of rain has had little or no beneficial effect on the crops under rain-fed lands except in Ponneri Taluq, where all crops are late and the new believed all will be saved.

2. The return of channel irrigated lands is much better than was at first estimated, but much bad

weather

without, before the commencement of the
harvest, in which operations will be
effected, as speedily as
possible, in the accompanying statement.

3rd The sowing of the Cotton, Ragi crops
especially ginjely, oil seed, has not
yet been completed, and until it
has, I think it would be premature
to remit the whole 50 per cent by
this remission, which has been sanctioned.

4th The figures given for Shikâ-
rapur and Ranebennur Talugs were received
a/c before rain fell, and the actual
remission of wet assessments will
probably be about Rupees 7,000 less
than the present estimate.
