Read the following papers :—

No. 5. Proceedings of the Board of Revenue, dated 13th September 1873, No. 1,825.

Read the following letter from J. B. PENNINGTON, Esq., Acting Collector of Trichinopoly, to J. GROSE, Esq., Secretary to the Board of Revenue, dated 14th August 1873, No. 172.

ADVERTING to the Proceedings of the Board, Nos. 265 and 4,517, dated respectively the 24th of February and 10th of July last, I have the honour to report that the Manilla Tobacco seed therein referred to was distributed by Mr. Whiteside, my predecessor, to the Head Assistant Collector and Deputy-Collector on general duties, requesting them at the same time to cause the seed to be carefully cultivated in their respective ranges and under their immediate supervision in localities best suited to its growth, and report the result.

2. The Head Assistant Collector reports that the experiment has proved a total failure, as the young plants were destroyed by incessant rains.

3. The report of the Deputy-Collector is herewith forwarded. The seed was tried in three different localities, *viz.*, Ariyalur (the head-quarters of the Deputy-Collector), Ravuttanpatti, and Palur. In Ariyalur the result was favourable; in Palur the seed is reported to have totally failed to germinate; and in Ravuttanpatti the seedlings perished before transplantation through excessive dew.

4. I have called on the Deputy-Collector for further information regarding the mode of cultivation adopted at Ariyalur, and, on its receipt, I shall report further on the subject.

5. The samples of Tobacco grown in Ariyalur will be submitted shortly.

Enclosure No. 1.

From MAHOMED ESUF, Deputy-Collector on General Duties, to J. B. PENNINGTON, Esq., Acting Collector of Trichinopoly, dated 2nd August 1873, No. 240.

IN reference to your docket of the 11th ultimo, No. 88, I have the honour to report.

2. On the 13th February 1872, on receipt of Manilla Tobacco seed from your predecessor, Mr. Whiteside, for experimental cultivation, I had it distributed to the Village Munsifs of Ravuttanpatti, Keelapalur, and Palur, in the taluq of Udiarpalyam, reserving some for experiment under my own eye in cushah Ariyalur. The season was past for sowing; the seeds had, therefore, to be kept over till November following, when the experiment was commenced in Ariyalur. The seeds were sown and afterwards transplanted in an old Tobacco-field, just outside the village Nattam, with due care and attention.

3. The experiment has been successful. The crops came to maturity in April last, and has been cut, and is undergoing the process of curing. I shall shortly submit samples of the same. The process observed during the experiment is detailed in the statement herewith appended. As to the seeds supplied to the Village Munsifs of Palur and Keelapalur, it would appear from the Tahsildar's report the experiment proved a failure.

Enclosure 1 in No. 1.

Memorandum showing the Mode in which the Manilla Tobacco was cultivated.

Soil as black loam near the village Nattam. On the 10th November 1872, a piece was selected, three yards by two yards, depth three yards. It was kept dry four days. On the 14th day it was formed into two beds, which were manured with four baskets of goat's dung mixed with earth. The beds were then scraped and levelled; the seed was then sown, and water sprinkled till the seeds moistened. It was then smoothened and covered over with country palmyra thorns. Water was let in twice a day with pots. On the 21st idem the thorns were removed, some of the seeds having germinated. Water was continued as before twice a-day; the other seeds also germinated. Twenty days afterwards the plants had four leaves; the watering continued twice a day. Fifty days elapsed. During the interval a plot of four decimals of dry or punjah land was ploughed once after it was manured with goat's refuse, and afterwards it was manured a second time and ploughed twice, and so was a third time manured and ploughed four times. The plots were beaten and rolled. Afterwards it was ploughed twice, and the clods were beaten and levelled. Beds were then formed, each having small pits; water was poured into them and then kept ready. On the evening of the forty-second day the seed-beds were watered, and the plants were inspected and planted in the holes, and watered both morning and evening. Fourteen days after the transplantation, two small leaves on the young plants having withered and fallen with fresh ones springing out, some of the plants which had perished were replaced. On the fifteenth day the plants had four leaves. The beds were then weeded and watered dry for four days. After this they were watered every alternate day. After this, plants had put out eight leaves, the side and back leaves were nipped off and watered. At the end of April, the four leaves after transplantation, 1,000 plants were cut down and heaped up in the field. At night they were put out and covered in the field during the day they were collected and covered up with straw.

2. The process of curing the Tobacco is the same as stated in the Memorandum which accompanied my letter of the 25th January 1871, No. 22.

(Enclosure 2.) (Signed) MAHOMED ESUF,
Deputy Collector.
2nd *August* 1873.

Submitted to Government in continuation of Proceedings of the Board of Revenue, dated 13th August 1873, No. 1,557.

No. 6. Proceedings of the Board of Revenue, dated 10th November 1873, No. 2,277.

Read the following Proceedings of the Madras Government, dated 24th September 1873, No. 1,069, Revenue Department:—

Abstract.—*Manilla Tobacco seed*.—Requesting the Board of Revenue to ascertain and report whether supply of seed referred to in the various reports on Tobacco cultivation submitted by them, and are willing to report the results of the experiments to the Government of India.

The experiments in Kistna were with the seed from the Straits sent with G. O. of 20th February 1872.

2. The Collectors of Godavery, Tanjore, Trichinopoly, Coimbatore, and South Canara, are requested to report whether they wish to obtain seed the reports recorded on the Government orders in the

3. The reports from Ganjam, Vizagapatam, and Tanjore, related to the supply of seed sent with G. O., dated 20th February 1872; that from Trichinopoly, submitted with Board's Proceedings, dated 13th September 1873, No. 1,825, related to seed received with G. O., dated 1st February 1872, No. 215. Copy of Board's Proceedings, dated 5th June 1873, Miscellaneous No. 3,403, containing a report from Godavery on experiments with the latter seed, is now submitted to Government.

Board's Proceedings, dated 11th September 1873, No. 1,726.
Board's Proceedings dated 13th August 1873, No. 1,557.

Enclosure No. 1.

Proceedings of the Board of Revenue, dated 5th June 1873, Miscellaneous No. 3,403.

Read the following letter from W. S. FOSTER, Esq., Acting Collector of the Godavery District, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Cocanada, 9th May 1873, No. 139.

With reference to the Proceedings of the Board of Revenue, dated 21th February 1873, No. 265, I have the honour to state that the Manilla seed received with G. O., dated 20th February 1872, No. 320, was distributed among the divisional officers, and I beg to forward herewith a sample* of uncured leaves grown in Dharmagoggudem in the Ellore Taluq in the Head Assistant Collector's Division. As I consider the leaves cannot be of so much use if they are kept longer as they would be if sent now, I forward them on at once, without waiting for the other reports.

2. Copy of the Head Assistant Collector's letter† on the subject is herein enclosed.

* Sent in a separate packet.

† Dated 3rd May 1873, No. 79.

From E. L. FOSTER, Esq., Acting Head Assistant Collector, to W. S. FOSTER, Esq., Acting Collector of the Godavery District, dated Ellore, 3rd May 1873, No. 79.

With reference to your letter, No. 258, of the 12th September last, I have the honour to inform you that the Manilla Tobacco seeds were tried in Dharmagoggudem in Ellore Taluq. In the first, it entirely failed; in the second, it grew up to a span high and samples of uncured leaves are herewith forwarded. Cured leaves will also be sent as soon as received. In Yernagudem Taluq the leaves appear to have been cut but not yet cured. Samples of cured leaves will be sent as soon as ready.

Recorded.

2. The success of the experiment will be treated of when the cured leaves and the details of the cultivation reach the Board.

3. The parcel of uncured leaves is forwarded to Mr. Broughton.

No. 7. Proceedings of the Board of Revenue, dated 12th November 1873, No. 2,293.

Read the following letter from C. SIVASUNKARA MUDALI, Officiating Additional Deputy-Collector, to J. B. PENNINGTON, Esq., Acting Collector of Trichinopoly, dated 10th October 1873, No. 358.

In reply to your docket, No. 1,060, dated 14th August last, I have the honour to state that the land wherein the Manilla Tobacco was cultivated had been

ploughed half a cubit deep, and the seedlings when transplanted were fixed in pits two inches deep.

2. A bundle of cured Tobacco referred to in this Office letter, No. 219, is herewith sent.

No. 237.

Forwarded to the Board of Revenue in continuation of Collector's letter, No. 172, dated 16th August 1873, recorded in the Proceedings of the Board, No. 1,825, dated 18th September 1873.

(Signed) J. B. PENNINGTON,
Acting Collector.

TRICHINOPOLY,
21st *October* 1873.

Enclosure No. 10.—Excel containing Tobacco.

Submitted to Government in continuation of the Board's Proceedings quoted.

No. 8. Proceedings of the Board of Revenue, dated 11th February 1874, No. 287.

Read the following:—

Proceedings of the Madras Government, dated 28th January 1874, No. 152, Revenue Department.

Ordered—Communicative to Board of Revenue letter from Government of India requesting early publication of information called for on results of experiments made with Manilla Tobacco seed.

Letter from W. FOSTER, Esq., Acting Collector of the Godavery District, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Cocanada, 24th November 1873, No. 381.

With reference to the order of Government, dated 24th September 1873, No. 1,035, communicated with the Board's Proceedings of the 10th instant, No. 2,277, I have the honour to inform you that it is not possible to give the information required.

2. The seeds received with the two orders quoted were sent together to the divisional officers for distribution with the same letter, and the necessity for their separation was not foreseen.

Letter from R. K. PUCKLE, Esq., Collector of Tinnevelly, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Tinnevelly, 24th December 1873, No. 320.

In reply to Board's Proceedings, No. 2,277, dated 10th November 1873, I have the honour to inform you that the Manilla Tobacco seed used was that received with G. O., dated 20th February 1872.

Letter from H. S. THOMAS, Esq., Collector of South Canara, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Mangalore, 18th December 1873, No. 2,073.

With reference to paragraph 2 of the Proceedings of the Board of Revenue, dated the 10th November 1873, No. 2,277, I have the honour to state that my report, dated the 28th May 1873, No. 771, and recorded in the Proceedings of Government, dated the 24th September last, No. 1,035, refers to the seed sent with G. O., dated 1st February 1872, No. 215.

From A. WEDDERBURN, Esq., Collector of Coimbatore, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Erode, 20th January 1874, No. 11.

With reference to paragraph 2 of their Proceedings, No. 2,277, of 10th November 1873, I have the honour to inform the Board that the official experiment at Bhowany which failed was made with the seed received with G. O., No. 215, of 1st February 1872. As both this supply and that received with G. O., No. 320, of 20th February 1872, were stated to be genuine Manilla Tobacco seed, no note was subsequently kept as to the particular localities to which the respective seeds were sent. There is every probability, however, that Pollachy, Coimbatore, and Palladam Taluqs were supplied from the quantity received with the first mentioned Government order; and that the Roman Catholic Bishop's establishment, Mr. Mackenzie, and the Oodumalpetta Taluq and Kongliem were supplied from the seed received with the G. O. of 20th February 1872, No. 320.

2. It will be observed that the samples of produce supplied with my letter printed with the Proceedings under reply refer to the results of the cultivation of the seed received direct from the Straits Settlements with G. O., No. 320, of 20th February 1872, the other seed having failed.

These letters will accordingly be submitted to Government.

No. 9. From J. R. COCKERELL, Esq., Commissioner of the Nilgiris, to C. G. MASTER, Esq., Acting Secretary to Government, Revenue Department, Fort St. George, dated Ootacamund, 20th March 1874, No. 23.

With reference to your telegram, dated 11th instant, running "Reply forthwith to Memorandum 4th March," I have the honour to report the Honorary Secretary of the Agri-Horticultural Society at Ootacamund informs me that the Society having no land available for planting operations, he distributed the Manilla Tobacco seed furnished him to planters on the Hills.

2. Only one of these gentlemen has reported the result of cultivating the seed. This gentleman, Colonel Scott, states, "I have about 200 plants growing vigorously. They were planted about three months ago, are now three feet high with sturdy stems about one inch in diameter. To prevent their seeding, the gardeners have unauthorizedly pulled off the tops of the tallest plants. I notice

no indications of flowering in any of the plants as yet. Their growth has been far from uniform, but all give promise to attain eventually an equal size. When they were first transplanted the weather was dry, and they had hand-watering occasionally. No manure was used. They are planted in light open soil. They present a beautiful appearance with their large leaves, some of which are twenty-eight inches long and nine broad."

No. 9. From the same officer, dated Ootacamund, 18th April 1874, No. 29.

I have the honour, in reply to your Under-Secretary's Memorandum, No. 58, of 24th ultimo, to report that the Tobacco seed supplied to Colonel Scott was from the parcel sent to the Honorary Secretary, Agri-Horticultural Society, with G. O. No. 215, of 1st February 1872.

No. 10. Public Despatch, 1st May 1874, No. 833.

Miscellaneous.

Ordered that the foregoing papers be communicated to the Government of India, in continuation of G. O., 24th September 1873, No. 1,035, and that the samples of Tobacco received from Canara and Tinnevelly be also forwarded.

2. The Board seem to have overlooked the fact that Malabar is one of the districts to which seed was sent with G. O., 1st February 1872, No. 215. See paragraph 1 of G. O., 24th September 1873, No. 1,035.

The Collector should be called upon to report fully, and as early date, what became of the seed.

3. The Commissioner of the Nilgiris will endeavour to obtain from the Agri-Horticultural Society, Ootacamund, further information regarding the seed distributed by it.

Enclosure 1 in No. 1.

Memorandum shewing the mode in which the Manilla Tobacco was cultivated.

Soil is black loam near the Village Nattam. On the 10th November 1872 a piece was selected, three yards by two yards, depth three yards. It was kept dry four days. On the fifth day it was formed into two beds, which were manured with four baskets of goat's dung mixed with earth. The beds were then scraped and levelled; the seed was then sown, and water sprinkled till it became moistened. It was then smoothened and covered over with country palmyra thorns. Water was let in twice a day with pots. On the 21st idem the thorns were removed, some of the seeds having germinated. Water was continued, as before, twice a day; the other seeds also germinated. Twenty days afterwards the plants put forth two leaves; the watering continued twice a day. Fifty days were elapsed. During the interval a plot of four decimats of dry or punjah land was ploughed side after side, was manured with goat's refuse, and afterwards it was manured a second time and ploughed twice, and it was a third time manured and ploughed four times. The clods were beaten and levelled. Afterwards it was ploughed twice, and the clods were beaten and levelled. Beds were then formed, each having small pits; water was poured into them and thus kept ready. On the evening of the fifty-second day the seed-beds were watered, and the plants were removed and planted in the holes, and watered both morning and evening. Fourteen days after the transplantation two small leaves on the young plants having withered and fallen with fresh ones growing out, some of them plants which had perished were replaced. On the thirtieth day the plants put four leaves. The beds were then weeded and left to dry for four days. After this they were watered every alternate day. After the plants had put on eight leaves, the side and head leaves were nipped off and weeded. At the end of April, the fourth month after transplantation the plants were cut down and heaped up in the field. At nights they were laid out and exposed to dew, and during the day they were collected and covered up with straw.

2. The process of drying the tobacco is the same as stated in the Memorandum which accompanied my letter of the 24th January 1873, No. 28.

Sir Edward Watkin Bart
Chairman of the London & North Western Railway Company
Euston

as yet. Their growth has been far from uniform
but all grow promptly & attain excellent size. When they were first transplanted the
weather was dry and they had hard watering
occasionally. No manure was used. They are
planted in light & fern soil. They present a
beautiful appearance with their large leaves
Those of article 1 are 28 inches long and 9 broad.

Yours Respectfully
Thomas Peete
