Det field no. 27 is partly covered with saline earth and partly damaged by a channel which has made its way through it.

The portion covered with saline earth is acres 1.7 and that damaged by the channel is acres 1.62. It has been unutilized for the last 20 years; and in explanation of the delay that has occurred in bringing this matter to notice ere this, the Inamdar states that he was ignorant that fresh Inams would be given for such unutilizable Inams till late.

The field no. 174 now proposed to be given to the Inamdar is Government waste and contains no trees.

The extent of the proposed field is greater than that of the lost one by 21 cents but as it's a assessment is less than that of the lost one by 2 annas, the field now proposed may be granted.
