*Proceedings of the Madras Government, Revenue Department,
18th June 1874.*

No. 158. Read the following Proceedings of the Board of Revenue, dated 8th June 1874, No. 1,389:—

Read the following letter from W. McQUHAE, Esq., Collector of Madura, to J. GROSE, Esq., Secretary to the Board of Revenue, dated 27th May 1874, No. 150:—

With reference to the Proceedings of the Board, dated 15th May, No. 1,132, I have the honour to report that no outbreak of the disease described has occurred at Ramnad, but I have just heard of a serious outbreak of a similar disease, which has caused 120 deaths in the neighbourhood of Perumali on the Tinnevely frontier, south of Moodoccolattur in the Ramnad Zemindari. A Hospital Assistant has been sent to the spot with medicines and directions to report the extent and nature of the disease, but I have no doubt it is part of the outbreak which commenced within the Tinnevely limits. There seems to be no reason for supposing that it originated in the Ramnad Zemindari. The villages affected are all on black cotton soil, and the sick are already obtaining medicine from the Tinnevely Hospital Assistant in Ottapidaram Taluq.

SUBMITTED to Government in continuation of the Board's Proceedings, dated 15th May 1874, No. 1,132. A copy of the Collector's letter will also be communicated to the Surgeon-General, Indian Medical Department, and to the Sanitary Commissioner.

No. 159. ORDER THEREON, 18th June 1874, No. 745.

Miscellaneous.

His Excellency the Governor in Council resolves to request the Surgeon-General, Indian Medical Department, and the Sanitary Commissioner, to whom this letter and preceding correspondence on the same subject have already been communicated, to state what action they consider advisable in order to ascertain the true character of this disease, and to provide for its proper treatment as well as prevention.
