Revenue.....DEPARTMENT

G.O. No.	940	Press
B.P. No.		Mis.
Dated 27-7-1874 196- .		

Not to be folded or roughly handled

*Proceedings of the Madras Government, Revenue Department,
27th July 1874.*

No. 237. Read the following Proceedings of the Board of Revenue, dated 11th July 1874,
No. 1,773:—

Read again the following papers:—

G.O., 23rd April 1874, No. 516, recorded in Board's Proceedings, dated 20th May 1874,
No. 3,337 (Miscellaneous).

Board's Proceedings, dated 10th June 1874, No. 1,420.

Read also the following letters:—

From J. N. GRAINGER, Esq., General Superintendent of the Public Works Workshops and
Stores, to C. A. GALTON, Esq., Acting Sub-Secretary to the Board of Revenue,
dated Chepauk, 23rd May 1874, No. 563.

In reply to Board's Proceedings, No. 3,337 (Miscellaneous), dated 20th instant, I have the
honor to state that it will be necessary to transfer the Engine-turning Lathe from the
Accountant-General's Department to the Public Works Workshops, if the engine turning of the
dies is to be done in the latter place, in which case only one man need be employed by the
Workshops to do this work. His pay would be Rupees 20 per mensem as at present.

From J. N. GRAINGER, Esq., General Superintendent of the Public Works Workshops and
Stores, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Chepauk, 13th
June 1874, No. 803.

With reference to the Proceedings of the Board of Revenue, dated 10th June 1874, request-
ing to be informed what additional establishment is required to enable me to carry into effect the
plan proposed by the Superintendent of Stamps, in his letter to your address, No. 698, dated 23rd
May 1874, I have the honor to state that, if the present mechanics employed in making dies
in the Accountant-General's Office together with the lathe can be transferred to the Workshop, no
additional establishment is necessary. The workmen so transferred will receive the same amount
of pay as at present, and whatever work is done for the Stamping Department will be charged for
by bills. It occurs to me that these men will not be engaged throughout the month in die-
cutting only, hence a saving will be the result, if work actually done and supplied is billed for.

2. I do not know whether the mechanics in the Accountant-General's Office are entitled to
the benefit of the Uncovenanted Service Rules. If they are, the constitution of the Presidency
Public Works Workshops debars them this privilege, as the shop is a self-supporting institution,
and service in it, as a workman, does not reckon towards pension.

In the first of the letters above quoted, the General Superintendent of the Public Works
Workshops and Stores reported that in order to carry out the proposal, referred to in paragraph 2
of G.O., 23rd April 1874, No. 516, it would be necessary to transfer the Engine-turning Lathe
from the Accountant-General's Department to the Workshops and to employ one extra hand on
Rupees 20 per mensem.

3. Meanwhile the Superintendent of Stamps addressed the Board pointing out that the
proposal made in the seventh paragraph of his letter of the 4th February last, No. 164, had been
misunderstood, and that what he meant to suggest was that all the mechanics now attached to the
Stamping Department should be transferred to the Workshops, so that "the power and the
means of making both sets of dies should not, as at present, be available in the same office."

4. Thereupon the Superintendent of the Workshops was again requested to state what
additional establishment will be required. Under the second of the letters above quoted, he reports
that if the mechanics at present employed in making dies in the Accountant-General's Office
together with the lathe can be transferred to the Workshops, the work can be done and charged
for by bills.

Proceedings of the Madras Government, Revenue Department.

27th June 1874.

4. As regards the difficulty adverted to in the benefits of the Unserved Civil Service transferred in the interests of Government.

Revenue Department

No. 940

PROCEEDINGS of the MADRAS GOVERNMENT.

Under date the 27th July 1874.

Read the following *Proc of the B^d of Rev.*

*Subm. being with Principal
certain papers on subject of
proposed transfer of mechanics
attached to stamping Department
and employed in making stamps
to Public Works Workshop.*

H. E. 11th July 1874 B^d 1772

The suggestion of the Superintendent of Stamps that all the mechanics now attached to the stamping Department be transferred to the Public Works Workshop is so completely to separate the relationship existing for making the paper and counterpane from the office where water marked paper is stamped, it is worthy of adoption. The Govt. has however to know if the Accountant General has

any objection to the course
suggested.
