Sup^t of Stamps

J. Geose Esquire

Secy to the Board of Revenue
Madras

Sir

I expect a large consignment of blue and black stamps of English manufacture to arrive shortly from England. I presume they will come packed in large tin-lined wooden cases, like those in which the special water-marked paper is received. My stamp room being already full, there will be no space in it for the new cases when they arrive, and it is therefore necessary at once to arrange for the requisite accommodation. The best way to provide this is doubtless by enlarging the present stamp room, but as this cannot be done immediately, it occurs to me to suggest, as

a temporary expedient; that the detached building in which the water marked paper is now stored, should be made available for the cases of new stamps, by removing the former to the Stationary Depot. If this arrangement is approved, it will be necessary to render the building as secure as possible, and place a special sally guard over it, as it is unprotected on its northern side, on which a low wall separates the Stamp Office from the shed in which the Com. Imperial Hubs are stored. I beg that the C. & S. Dept. may be directed to inspect the building, to determine what alterations or additions, if any, are required to make it a safe receptacle of the new stamps, the first consignment of which will amount to Rs 23,16,875 in value. Altho' the stamps will be kept in well packed cases, and altho' they will be of no value before receiving the counter-stamps of this Office, still it is obvious that the place in which they are stored should be made as secure as possible. I request the Board to pass early orders upon this, after inspecting the building, if necessary, to satisfy themselves whether it may be safely used in the manner suggested by

2/15
me, till the requisite additional accommodation is provided by the extension and enlargement of the present strong room.

I have the
Honourable Secy. Stamp Office } (22) J. Rammingar

Proceedings of the Board of Revenue
dated 12 Aug. 1873:
Read the following:

N. 2108
From The District Engineer
Presidency
To The Secy to the Board of Revenue
Secy

In reply to the Board's Proceedings N. 4839
of 1st August 1873, I have the honor

to stat. that I designed and constructed the detached
building in which the water-marked paper is now
stored. I enclose plan, specification, and com-
parative statement, and think that it requires
nothing in the way of construction.

Encl:
1 Plan
1 Comp. Statement
1 Specification

2. Two entries, one at A and the
other at B, will I think meet all requirements
