*Proceedings of the Madras Government, Revenue Department,
2nd August 1875.*

No. 12. Read the following letter from A. O. HUME, Esq., C.B., Secretary to the Government of India, Department of Revenue, Agriculture, and Commerce, (Statistics,) to A. MACGREGOR, Esq., Acting Secretary to the Government of Madras, Revenue Department, dated Simla, 17th July 1875, No. 399 :—

On comparing the figures of trade given at pages 113—116 in the Report on the Administration of the Madras Presidency during the year 1873-74 with those in the annual volumes of the Trade and Navigation of Madras, the discrepancies detailed below have been observed.

2. In the table on page 113 of the Administration Report the values of some of the articles detailed do not correspond with those obtained from the annual volumes of Trade. The subjoined lists exhibit both sets of figures for these articles :—

3. The total value of Imports in the year 1872-73, as shown in the annual volume, Table 8, and Statement No. 1 of the Supplemental Statements, was Rs. 5,29,04,294, while it is shown in the Table on page 113 of the Administration Report to have been Rs. 5,29,04,962, or a difference of Rs. 668, as shown in the comparative statement above.

4. The total value of Imports in 1873-74, as given in the Report, agrees with the figures in the annual volume, but there are some differences in the values of the articles detailed, as shown in the following statement:—

5. The total value of Exports in 1872-73, as shown in the Report, also agrees with the figures in the annual volume, but in the details "Indigo" and "Silk, Manufactures of," are shown in the Report to have been exported to the value of Rs. 69,78,726 and Rs. 91,475, respectively, while in the annual volume (Tables 14, 16, and No. 2 of the supplemental statements) the exportations were valued at Rs. 69,31,400 and Rs. 89,290, the differences being Rs. 47,326 and Rs. 2,185, respectively, more in the Report than in the annual volume. The totals, as shown in the Administration Report and the annual volume agreeing, the sum of these differences, Rs. 49,511, has been balanced in the Report by a corresponding diminution under "Other Articles."

In the table on page 114 (showing the progress of Trade in staple articles of export) the differences are as follow:—

*Proceedings of the Madras Government, Revenue Department,
2nd August 1875.*

In the figures extracted in the foregoing statement from the annual volumes those of Imports and Exports in 1866-67 are for paddy, rice, wheat, bazree, and natcheny, those of Import from 1867-68 to 1873-74 for paddy, rice, wheat, and bazree (natcheny not being distinguished in the annual volumes), and those of Export from 1867-68 to 1873-74 for paddy, rice, and wheat only, natcheny and bazree not being separately distinguished. The large differences between the figures thus deduced and those shown in the Administration Report are perhaps owing either to bazree and natcheny not being distinguished in the annual volumes of the later years or to the inclusion in the Administration Report of some other variety of food-grain which possibly is shown under "Other Sorts" of grain and pulse in the annual volumes. I am to request that it may be explained whether this is the case or not.

9. The differences between the figures entered in the Statement on page 116, showing the distribution of the grain Exports in 1872-73 and 1873-74 and those obtained from the annual volumes for those years are as follow:—

10. The annual volume for the year 1869-70, Statement No. 3 shows that the value of bullion exported in that year on Government account was Rs. 5,60,243, while in the Statement of Imports and Exports of bullion on page 116 of the Administration Report the figures are Rs. 6,60,243.

11. I am to request that, with the permission of His Excellency the Acting Governor in Council, an inquiry may be made into the causes of these discrepancies and the results reported for the information of the Government of India. I am, at the same time, directed to invite special attention to the 8th paragraph of the Resolution of this department, Nos. 66C—69C, dated the 9th April last, and to suggest that some effectual steps may be taken to ensure conformity in the statistics published in

different reports, when those statistics relate to one subject and embrace the same period. There cannot be any reason for a difference between the figures of trade for the year as published in the report on the General Administration of the Presidency and those for the same year published in the annual statement of Trade and Navigation.

No. 13. ORDER THEREON, 2nd August 1875, No. 1,163.

Miscellaneous.

The figures in the General Administration Report were taken from that compiled by the Board of Revenue who

will be good enough to explain the discrepancies noticed by the Government of India.

2. With reference to paragraph 11 of the foregoing letter, it is observed that the want of conformity complained of is not with a few unimportant exceptions apparent in the statistics of the year (1873-74).

Statement of General Exports in Ant. Volume

Tables 7, 8, 10 & 14 in Ant. Volume

73 74

1153/8

In the figures extracted in the foregoing statement from the Annual Volumes those of Imports and Exports in 1866-67 are for Paddy, Rice, Wheat, Buzree, and Natchemy. Those of Import from 1867-68 to 1873-74 for Paddy, Rice, Wheat, and Buzree (Natchemy not being distinguished in the Annual Volumes) and those of Export from 1867-68 to 1873-74 for Paddy, Rice, and Wheat only. Natchemy and Buzree not being separately distinguished. The large differences between the figures thus deduced and those shown in the Administration Report are perhaps owing either to Buzree and Natchemy not being distinguished in the Annual Volumes of the later years, or to the inclusion in the Administration Report of some other variety of Food Grain which possibly is shown under Other sorts of Grain and Pulse in the Annual Volumes. I am to request that it may be explained whether this is the case.

case or not.

The differences between the figures entered in the statement on page 116 showing the distribution of the Grain Exports in 1872-73 and 1873-74, and those obtained from the Annual Volume for those years are as follows:—

10.

The Annual Volume for the year 1869-70, Statement H-3, shows that the value of Bullion exported in that year on Government account was Rupees 560, 243, while in the Statement of Imports and Exports of Bullion on Page 116 of the Administration Report the figures are Rs. 6, 60, 243.

11.

I am to request that, with the permission of His Excellency the Acting Governor in Council an enquiry may be made into the causes of these discrepancies and the results reported for the information of the Government of India. I am at the same time directed to invite special attention to the 6th paragraph of the Resolution of this Department A-666-69 C dated the 9th April last, and to suggest that some effectual steps may be taken to ensure conformity in the statistics published in different reports, when those statistics relate

to one subject and embrace the same period. There cannot be any reason for a difference between the figures of trade for the year as published in the report on the General Administration of the Presidency and those for the same year published in the Annual Statement of Trade and Navigation.

I have the honour to be,

Sir,

Your Most Obedient Servant

discrepancies shown in a comparison of the prices of small grain at p. p. 113-116 with those of the same crop at p. p. 157-174 with those in the Annual Report of the Board of Agriculture for England and Wales: 1873-74. The discrepancies are owing not to errors in the original data, but to the fact that the Board of Agriculture's figures are for the whole of the country, and the Board of Trade's figures are for the whole of the country, and the Board of Trade's figures are for the whole of the country, and the Board of Trade's figures are for the whole of the country.
