Proceedings of the Madras Government, Revenue Department,
6th August 1875.

No. 47. Read the following Proceedings of the Board of Revenue, dated 6th July 1875, No. 1,866 :—

Read the following letter from J. H. MASTER, Esq., Collector of Bellary, to H. E. STOKES, Esq., Acting Secretary to the Board of Revenue, dated 19th June 1875, No. 222.

With reference to paragraph 1 of the Board's Proceedings, No. 2,502, dated 5th September 1874, requesting me to furnish the report called for by Government in paragraph 5 of their Order, No. 184, dated 11th February 1874, I have the honor to forward a tabular statement showing the extent and assessment of lands in the holdings of ryots for fasli 1231 as compared with those of fasli 1276.

2. From this it will be seen that the net increase in dry lands is acres 133,252, assessed at Rupees 24,814, while the net decrease in wet lands is acres 50,869, assessed at Rupees 93,564. Thus the net increase in both dry and wet is acres 82,383, and the decrease in the assessment is Rupees 68,750.

3. The wet lands bearing higher assessment than dry lands, the decrease of the assessment was a consequence, though there is actually an increase in the extent.

4. The increase in dry lands is due to that kind of land being taken up to a greater extent than usual since fasli 1276 on account of timely rain falling for the cultivation of such land. The decrease in wet lands was caused by the absence of a sufficient supply of water in the tanks, &c., for wet cultivation, though the rain which did fall was favorable for the cultivation of dry lands.

ENCLOSURE No. 1.—Statement.

SUBMITTED for the information of Government, with reference to G. O., dated 11th February 1874, No. 184.

2. The average assessment of the wet land constituting the decrease is only Rupees 1-13-5, and the land must be of low value as such. The cause assigned by the Collector may be accepted as correct.
