*Proceedings of the Madras Government, Revenue Department,
18th August 1875.*

No. 179. Read the following Proceedings of the Board of Revenue, dated 27th July 1875, No. 2,097:—

Read the following letter from R. DURMA ROW, Deputy Collector, in charge Salt Department, Ganjam, to R. DAVIDSON, Esq., Collector of Ganjam, dated Surla, 19th June 1875, No. 122.

One Statement.

I HAVE the honor to submit the annual report on the state of Salt Topes for 1874-75.

2. There were 18,851 trees of different kinds at the salt-pans at the end of 1873-74; 358 died and 43 had to be cut during the year under report, but 243 were newly planted, so that there were 18,693 in the topes at the end of March last.

3. At Itchapore there were 6,541 trees, of which 14 were cashewnut, 195 casuarina, and 6,332 other trees. 8 casuarina and 115 other kinds, chiefly on the bund of the gully tank, died during the year, the inner layer of the soil being impregnated with saline matter. 27 casuarina and 28 other trees were newly planted. The cashewnut trees are thriving well.

4. At Nowpadah there were 9,187 trees of all kinds at the end of 1873-74; 85 died during the year, and 23 were newly planted. Some of the cashewnut trees were in bearing, and the fruit fetched a sum of Rupees 8-8-0, that fetched last year was Rupees 5-10-5.

5. There were 2,923 trees of all kinds at Womeravilly. The casuarinas are doing well. 43 young tamarind trees had to be cut when the platform ditches were excavated. They were sold as they could not be transplanted. 150 other trees died, but 165 were newly planted.

6. Branches of banian trees were planted on the bund of the Ganjam tank dug in 1872, but, with the exception of 3 or 4 which are taking root, they all died, the soil being unsuited to the plant. Measures have been taken to grow other plants.

7. Casuarina and other seed has since the close of the year been sown on a
