Proceedings of the Madras Government, Revenue Department,
20th August 1875.

No. 189. Read the following Proceedings of the Board of Revenue, dated 27th July 1875, No. 2,099 :—

Read the following letter from W. LOGAN, Esq., Acting Collector of Malabar, to H. E. STOKES, Esq., Acting Secretary to the Board of Revenue, dated Calicut, 20th July 1875, No. 231 :—

In transmitting herewith copy of a letter received from my Salt Deputy Collector, I have the honor to state that Dr. Ratton visited this district in April last, but no report on the result of his inspections here has as yet been received by me.

2. Dr. Ratton lately wrote to say that he was now prepared to give my Salt Deputy instructions in salt manufacture at Ennore; but I should, before sending him, like to know what the Board's views are regarding Dr. Ratton's proposals for this district. At the same time I feel quite sure that the course which Dr. Ratton suggests of sending my Salt Deputy to the Eastern Coast to make himself personally acquainted with the method of working is the best that could be adopted as a preliminary step to the introduction of the manufacture into this district.

Enclosure No. 1.

From O. CANNAN, Deputy Collector, to W. LOGAN, Esq., Acting Collector of Malabar, dated Ponany, 7th July 1875, No. 60.

Referring to the letter (herewith returned) from Dr. Ratton to your address under date the 30th ultimo, No. 43, I have the honor to inform you that Dr. Ratton had some months back inspected this coast to test the suitability of the soil for salt manufacture, and he must have doubtless long ago submitted his report to the Board of Revenue, but we have not as yet received any instruction on the subject from them.

2. In the event of the salt manufacture in Malabar being determined upon, great deal remains to be done in the way of making arrangements with the owners of the lands wherein the manufacture is be carried on, the extent of the land required being considerable.

3. I beg also to state that the Superintendents, who will have the immediate charge of the respective manufacturing depôts, should, as well as myself, have a thorough knowledge of the mode of working the salt-pans, and it will be very desirable that a few of those officers accompany me to Madras for the purpose ; but no such officers have as yet been nominated. I have suggested these facts to Dr. Ratton while he was here lately, and he has quite approved of the measure.

4. I, therefore, think it desirable, before I proceed to Madras, to obtain the requisite instructions from the Board of Revenue, which I beg you will be pleased to procure at an early date.

(True Copy.)

(Signed) W. LOGAN,
Acting Collector.

Doctor Ratton's report on sites for salt manufacture in South Canara and Malabar has been disposed of in Board's Proceedings, dated 13th July 1875, No. 1,938.

2. The Salt Deputy Collector's presence will probably be required in Malabar at present for the purpose of instituting the inquiries which the Board have, in the Proceedings above quoted, directed the Collector to make ; but, as soon as

his services can be spared, it is advisable that he should proceed to Madras to receive instructions from Dr. Ratton.

3. As it is evident that a Salt Deputy Collector is immediately required for the preliminary arrangements connected with the establishment of salt manufacture in Malabar, the recommendation contained in paragraph 6 of the Board's Proceedings, dated 9th July 1875, No. 1,910, must be withdrawn, and the Board suggest that application should be made to the Government of India for sanction for an Additional Deputy Collector on this account.

(True Copy and Extract.)
