*Proceedings of the Madras Government, Revenue Department,*
*10th September* 1875.

No. 95. Read the following Proceedings of the Board of Revenue, dated 13th August 1875, No. 2,275, Forest No. 168:—

Read the following letter from A. WEDDERBURN, Esq., Collector of Coimbatore, to H. E. STOKES, Esq., Acting Secretary to the Board of Revenue, through the Inspector of Forests, dated Coimbatore, 7th July 1875, No. 209:—

WITH reference to the Revenue Board's Proceedings, Miscellaneous No. 214-5,319, of 14th June 1875, I have the honor to state that fifty loads of curved teak can be supplied from the Anamallays in 1876-77. It is presumed that a "load" is equal to 50 cubic feet.

2. But if any portion of the fifty loads is to be furnished from the Neelumboor and other Forests, a quantity from the Anamallays to suit the same can be supplied any time within a few weeks' notice.

3. Mr. Douglas inquires what is a "wane."

No. 385.

SUBMITTED with the recommendation that the fifty loads, or 2,500 cubic feet, be supplied from the Anamallay Forests, the requisite funds being made available, and that the Admiralty be informed accordingly, in order that they may make the necessary provision in their estimates for 1876-77, and inform this Government how they wish the timber shipped.

2. Should further quantities of curved teak be required, the Mudumullay and Wynaad Forests can supply large quantities.

3. Reference has been made to the Superintendent of Marine, Bombay, regarding the technical signification of the term "wane."

4. Referring to Mr. Hall's letter, recorded with G. O., No. 1,023, dated 6th July, I would remark that no written explanation can be so clear as canvass patterns or drawings of curves, and to suggest that "my Lords" may be requested to furnish them.

OOTACAMUND,
