MADRAS RECORD OFFICE

GOVERNMENT OF MADRAS

Revenue DEPARTMENT

G.O. No.	1495	Press
B.P. No.		Mis.
Dated	16-7-1875	196 .

Not to be folded or roughly handled

Leave and Certificate
of N. Ramaswamy Modali
Deputy Collector Salt Dept.
Madura, now on leave.
Age 39. Service 19 Years
Disease, Phthisis Pulmo-
nalis.

He had suffered from
periodical nervous head-
aches a few months before
he had experienced Cough,
which showed itself
for the first time in
October last. Although
he was relieved of it
for the time, yet it con-
tinued, off and on, till
the middle of February
last when he was at-
tacked with fever, which
in Camp, and with it
the Cough returned, &
from that time became
habitual and troublesome.
He has not brought up
blood at any time either
before or after the occur-
rence of Cough. He was

under the treatment
of the Native Surgeons
in charge of Civil Dispensary,
Pamunah, and took
various remedies. Lastly
he was placed in bed
in an air which he took
for four weeks with
apparently little benefit.
Being advised to try a
change of place, he obtain-
ed in 3 months leave
and came to this place
few days ago.

Present State

He is emaciated and
weak, countenance
anxious, Pulse small
and frequent and at
times intermittent,
rough, though not ur-
gent as very troublesome
at night disturbing
sleep, expectoration
muco-purulent, and
presents that peculiar
character of a ball

of wood dipped in
Some of the expectoral
matter sinks to the bottom
of a vessel containing
water, and some re-
main at different depths.
has dyspnoea on exertion
and occasionally shooting
pain in the left side
of chest; occasionally
also he experiences heat
of skin towards evening
with burning of the
hands and feet, pro-
duced by sweating in the
morning. Appetite
impaired, bowels
rather Costive.

Percussion gives a dull
sound over the upper
part of left side of
chest, which, compared
with the other side,
seems a little flattened.
Stethoscope applied
over this part of the
chest reveals bronchial
or tubular breathing
with a slight click.

These sounds, and others which are not quite distinct, are heard just below the left lamella and probably indicate the presence of a small vomica.

Could he have contracted the disease from her? ?

A. G. Barlow Goddard

is in a bad state of health and I since declare that according to the best of my judgment relaxation of duty is essentially necessary to his recovery. do therefore recommend that he may be permitted leave of absence for (6) six months from the date of expiry of his last leave.
