182
Revenue Department
Miscellaneous No. 7182.

Proceedings of the Board of Revenue.

Dated 7 August 1845

Read the following
No. 249.

From
W. Logan Esqr.
To
Ag. & collector of
H. E. Stokes Esqr. Malabar
Ag. Secretary to the
Board of Revenue
Madras.

Sir
I have the honor to enclose
Copy of a letter from the Honorary
Secretary, ^{Wynaad} Planters' Association, ^{Trichy} Trichy,
regarding a serious outbreak of
some unknown disease among
cattle in Wynaad. The Board
will observe that on one Estate near
Kalpatti, no fewer than 123 buffaloes
have

have already succumbed to it, and the disease is reported to be "highly infectious."

2. I have just seen the Mynaad Tahsildar, and though he was not aware of the existence of such a disease at Kalpathy, he says there is disease also near Mannanattody.

3. I have the honor to suggest that a Veterinary Surgeon may be sent to investigate the matter with a view to advising as to remedies.

4. As this matter is urgent, and as perhaps the services of Mr. Shaw at Pottacamund may be available, I have taken the liberty of

2/1772
of sending a copy of this letter and of Mr. Thompson's to the Revenue Secretary to Government.

Malabar Colln office
Calicut
5th August, 1895

I have the
(sd) H. Logan
Ag. Collector

H. Logan Esqr.
Collector of Malabar
Calicut.

Sir
I have the honor, by desire of the Committee of this Association, to call your attention to the terrible disease amongst cattle now prevailing in Mynaad. Large numbers are, and have for sometime been, dying of Epizootic Aphtha, commonly known as "Foot and Mouth," but since the commencement of

the monsoon, in the latter part of
the hot weather, the loss has been
very terrible from quite another
description of disease, which seems
to defy treatment and ^{to be} unknown
either to the European or Native
owners. The Canarese term it
"Dob Roga" but this expression,
I believe, merely means "serious
or big epidemic". One noteworthy
circumstance connected with this
disease is that it appears to attack
the healthiest and most fat
cattle of a herd. It is especially
bad in the neighbourhood of
Calcutty, where it has been
noticed chiefly amongst buffaloes.

3/172
An animal may be perfectly
healthy one night and is found
dead the next morning, the only
symptoms, and these not always
observed, being a small quantity
of blood appearing at the nostrils,
eyes, root of horns and anus.

On one Estate at Calcutty
123 buffaloes have died in two
months.

The Committee beg me
to request you to ask Government
to send a competent Veterinary
Surgeon immediately to inves-
tigate the disease and advise
as to remedies.

The disease appears
when

to be highly infectious.

Ag. Collector

Communicated to Veterinary

Surgeon G. Weston, who will proceed

to the Nynaad with as little delay

as possible. The Collector should

have addressed that officer

direct vide Board's Official Mem-

orandum No 475 6th April 1875;

from his letter, however, it would

appear that the notification of

the appointment of an Inspector

of

note

The appointment

was made in

September 16th 1875

which must have

reached the Colon, before

he wrote his letter
