*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

No. 242. Read the following letter from Lieutenant-Colonel J. H. M. SHAW-STEWART, R.E., Consulting Engineer for Railways, to Major-General G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Madras, 26th August 1875, No. 474 :—

G. O., No. 2,536, dated 7th September 1874.

* No. 559, dated 27th May 1875.

Madras Railway.

With half-yearly Report for period ended 31st December 1874.

Chief Engineer's Report.

Telegraph do. do.

Locomotive Superintendent's Report.

Traffic Manager's do.

Chief Accountant's do.

Consulting Physician's do.

Chief Auditor's do.

† Dated 29th April 1875, letter to Board of Directors.

REFERRING to this office letter No. 384, dated 2nd July 1874, I have the honor to forward herewith, for the information of Government, the accompanying reports by the Agents of the Madras* and South† Indian Railway Companies on the working of their respective lines during the official year 1874-75.

From R. B. ELWIN, Esq., Agent and Manager of the Madras Railway Company, to Lieutenant-Colonel J. H. M. SHAW-STEWART, R.E., Consulting Engineer for Railways, dated Madras, 27th May 1875, No. 559.

I HAVE the honor to report as follows, for the information of the Government, with reference to the operations of this Company during the official year 1874-75.

2. The following Covenanted Officers and servants returned to England, resigned the service, &c. :—

Name.	Grade.	Remarks.
<i>Engineering Department.</i>		
W. R. Robinson ...	Acting Deputy Chief Engineer	Proceeded to England on sick leave, 4th July 1874.
E. W. Stonay ...	1st-class Assistant Engineer	Proceeded to England on one year's furlough, 14th July 1874.
B. Anderson ...	Chief Engineer	Proceeded to England on duty, 18th January 1875.
<i>Locomotive Department.</i>		
James Barefoot ...	Locomotive Foreman	Proceeded to England on sick leave, 2nd May 1874.
Edward Read ...	Do. do.	Died, 4th September 1874.
Joseph Irons ...	Erector and Fitter	Resigned the service and returned to England, 8th December 1874.
<i>Chief Auditor's Department.</i>		
F. Church ...	Chief Auditor	Proceeded to England on three months' privilege leave, 12th April 1874.

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

3. The following officers and servants arrived from England, &c. —

Name	Grade	Date of arrival.
<i>Engineering Department.</i>		
G. R. Watson	3rd-class Assistant Engineer	Arrived, 13th May 1874.
H. G. West	1st-class do. do.	Returned from furlough, 11th July 1874.
B. Anderson	Chief Engineer	Returned from sick leave, 24th October 1874.
G. B. Smith	2nd-class Assistant Engineer	Returned from furlough, 9th December 1874.
George Stacey	Diver	5th September 1874.
Charles Smith	Diver	5th " "
<i>Locomotive Department.</i>		
W. R. Wray	Inspector and Fitter	22nd June 1874.
Thomas Putnam	Engine Driver	19th August 1874 (re-engaged).
James Barefoot	Locomotive Foreman	Returned from sick leave, 24th October 1874.
<i>Chief Auditor's Department.</i>		
F. Church	Chief Auditor	Returned from privilege leave, 28th September 1874. Leave extended by the Board, vide paragraph of Secretary's letter, No. 535.

4. On the 9th September 1874, by my letter No. 794, I reported to you the death on the 4th idem from Pithiaia, of Edward Read, the Locomotive Foreman at Royapooram.

5. The mileage worked over during the year 1874-75 was the same as that worked over in 1873-74, viz., 858 miles.

Traffic Department.

6. There was no alteration in the rates and fares, but the following special rates were introduced during the official year:—

8th October 1874.—Private baggage conveyed in extra troop trains at 1 Pie per maund per mile.

27th October 1874.—Redwood for S. Saravanamootu Pillay, Coodeor to Madras, at Rupees 5 per ton, provided that 1,000 tons are forwarded within the space of one month.

16th March 1875.—Carriages, the property of the Nilgiri Carrying Company, at 3 Annas per truck per mile.

7. The traffic on the whole of the Railway was, as you are aware, very prejudicially affected by the damage done to the way and works by floods, caused by the heavy rain which fell at the end of October last, and by the cyclone of May 1874. Full particulars of this are given in paragraph 6 of the Traffic Manager's report for the last half-year, a copy of which was forwarded to you on the 6th instant with my letter No. 472.

8. The following table shows the gross receipts and expenditure during the year as compared with the year ending the 31st of March 1874:—

	Gross Receipts			Working Expenses			Net Revenue		
	RS.	A.	P.	RS.	A.	P.	RS.	A.	P.
1874	65,30,047	12	9	39,82,818	7	6	25,47,229	5	3
1875	59,19,550	9	6	39,72,678	5	9	19,46,872	3	0
Decrease	6,10,497	3	3	10,140	1	9	6,00,357	1	6

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

9. This falling off is accounted for by the dullness of trade, the very serious and prolonged interruptions, and the total cessation of all through traffic on the North-west Line for a period of 58 days.

10. *South-west Line.*—The average cost of maintaining the South-west Line and Bangalore and Nilgiri branches, including renewals with pot sleepers, amounted to Rupees 117-2-11 per mile per mensem, as compared with Rupees 131-9-2 per mile in 1873-74.

11. As referred to above, several serious interruptions to through traffic occurred during last year, owing to the way and works on the South-west Line having been damaged by floods.

12. The most important of these was at the bridge over the Goriattum river, the western portion of which, consisting of five 30 feet arches, was carried away by the floods that occurred at the end of October.

13. Two other smaller bridges on this line, near the Vaniembaddy and Mailputty stations, were also carried away during the cyclone that occurred in the month of May.

14. It has been determined to rebuild that portion of the Goriattum bridge that failed, and to build entirely new bridges near Vaniembaddy and Mailputty. The necessary sanctions for these new works have been obtained and the construction is now in progress, the traffic having in the meantime been carried on by temporary means.

15. With the above exceptions, the bridges on the South-west Line were kept up in good repair.

16. The fencing was efficiently maintained throughout the line. On some parts of the 4th Division and Nilgiri branch, where the aloe fencing was not thriving, it was considered advisable to substitute stone walling for the vegetable fence.

17. In consequence of the back-waters of the Ponany and Thotta rivers rising during the monsoon on the Western Coast in several places, between the 373rd and 377th miles, nearly to the top of the embankment, and the rails having in two instances been submerged to the depth of 6 to 8 inches, it was determined to raise the line at those points. The sanction of Government to the expenditure necessary for carrying out the work was conveyed to me in your letter No. 1,166, dated 8th December 1874.

18. *Bangalore Branch Line.*—The way and works on this line, as on the South-west, suffered greatly owing to the heavy rain which fell during September and October last. A 6 feet bridge at the 293rd mile was washed away, and, with a view to prevent further damage on this line by the bursting of tanks, it was considered desirable to cut gaps in the embankments. This caused an interruption to traffic for several days.

19. Another interruption to traffic was caused in November last, owing to a large boulder of rock at the Tiger Rock cutting, near the summit of the Coopum Ghaut, having been undermined by the heavy rain which fell during the last monsoon. The danger of this boulder falling over on to the line was considered so great that steps were taken to blast the rock, which operation was successfully carried out, not however without causing an interruption of through traffic for several days; steps are now being taken to render this part of the line safe, by building retaining walls to support the boulders which remain and prevent them from slipping.

20. *Nilgiri Branch Line.*—The way and works on this line were maintained in a satisfactory condition during the year.

21. *North-west Line.*—The maintenance of this line cost Rupees 114-0-7 per mile per mensem as compared with Rupees 93-11-0 per mile in 1873-74. This increase is attributable to the large expenditure on account of damages from floods.

22. The permanent-way, earthwork, station buildings, &c., were all maintained in good order. On the 24th October last, serious damage was done to the earthwork and ballast on certain parts of the line by an unusually heavy fall of rain, which caused many of the large tanks in the neighbourhood of the railway to burst and flooded the whole country.

23. The Acting Deputy Chief Engineer in his report for the quarter ended 31st December 1874, writes as follows on this subject:—

"I am informed on good authority that 26 inches of rain were registered on 24th, 25th and 26th October near Cuddapah, and further it is supposed there was a much greater fall on the hills

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

which supply our large rivers. When it is remembered that the average rainfall for the year in England is only 42½ inches, the manner in which our tanks stood so across a test must be considered very satisfactory. Where the tanks were badly breached such breaches were almost invariably due to the bursting of tanks.

24. Very serious damage was also done to the Cheyaur, Paupugnee, Chittravutti and Pennair bridges, on the North-west Line, by the floods of October. Full reports stating the extent of the damage and the measures proposed for repairing these bridges have already been submitted to Government.

25. *Cheyaur and Huggery Bridges.*—The new bridge in course of construction over the Cheyaur river was but slightly damaged by the floods, and fair progress was made with that work during the year, though, as you are aware, unexpected difficulties have arisen both at this and at the Huggery bridge, and, under present circumstances, it is almost impossible to say with any degree of certainty when the completion of these bridges may be expected.

26. *Protective Works.*—The progress of these additional works to the Poincy, Goriattum, Palar, and Nuggery bridges, has been somewhat retarded by the extraordinarily wet season we have experienced, commencing with the cyclone of May 6th.

27. The towing on this line has been well and efficiently maintained.

28. *Electric Telegraph.*—The working of the telegraph has been very satisfactory during the year.

From T. H. GOING, Esq., Acting Chief Engineer of the Madras Railway Company, to the Chairman and Directors, Madras Railway Company, London, dated Madras, 5th March 1876.

I have the honor to submit my report for the half-year ending 31st December 1874.

1. The way and works are in good condition throughout.

2. *Damages by Floods.*—The damages sustained by the Railway during the unprecedented floods which came down in the last days of October have been fully detailed in this office letters Nos. 729 and 762 of 3rd November and 1st December respectively, as well as in a letter from the Government Consulting Engineer, to the Secretary to Government, Public Works Department, published with G. O. No. 395, of 12th February 1875.

I shall now state what has been done towards restoring interrupted communication up to the date of this report.

3. The less serious of the injuries to embankment and small bridges were all repaired by 12th November. That caused by the bursting of Chintagoulah tank bund on 30th October, which made a wreck of the earthwork and fencing over almost 4 miles of line near Moodanore station, was made good by 17th November.

4. Of the five large bridges which suffered injury, that over the Goriattum river (South-west Line) was rendered passable by trains on the 5th November. The temporary repairs were effected by means of short girders supported on sleeper piers.

5. It was also found practicable to render the Pennair bridge (North-west Line) fit for traffic by building up by sleeper piers, to replace those of masonry which had been destroyed and which had left the ends of two sets of girders suspended. This bridge was thus restored in a temporary manner on 17th November.

6. The damages to the other three bridges, Cheyaur, Paupugnee and Chittravutti (North-west Line), were of too extensive a nature to be dealt with in a similar way, and it was not till the month of January that the water of these rivers had sufficiently subsided to enable us to lay down roads over their beds. Through communication was in this manner established over the Cheyaur river bed on 14th January, and over the beds of the Paupugnee and Chittravutti on 18th idem.

7. A road was also laid down on the bed of the Goriattum river as soon as the water had fallen so far as to permit of it, and traffic has been passed over by this means since 7th January.

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

previous to which time the bridge, as repaired in the temporary manner described in paragraph 5, had been used for the passage of trains.

9. There is thus but one of the damaged bridges over which traffic is now carried, viz., the Pennair, and I hope to be able to replace the two fallen piers of this bridge without interrupting the course of traffic over it.

10. *Repairs of Damages.*—So much then for the temporary means adopted to establish through communication during the dry season. In the meantime the necessary steps have been taken for reconstructing the damaged portions of the bridges, so as to render them capable of passing trains when the season of floods returns. Designs for these works have been duly submitted and have received the sanction of Government. They are being executed with the greatest possible energy. How far we shall succeed in completing them without interruption from floods is a matter of some little uncertainty, depending on the character of the season as regards rainfall.

The Cheyaur, Paupugnee, and Chittravutti are so far forward, however, that I think myself safe in assuring the Board that these three bridges will be ready for traffic by 15th April. If no heavy froshes come down before the end of May, I think we may expect the bridge over the Pennair river to be restored by that time. There is rather more cause for apprehension respecting the date of completion of the Goriattum bridge, as rains are of earlier occurrence in the district through which that river passes. The contract time, however, which has been fixed for its completion is 20th May, and the work progresses in a satisfactory manner.

11. As regards the future permanency of these bridges, when the repairs now being executed have been completed, a few remarks should be here made.

12. So far as the Cheyaur is concerned, this bridge may be left out of the consideration as the new Cheyaur bridge now under construction will supersede it. The Goriattum bridge may also be fully relied on as soon as the additional waterway comprised in the design for reconstruction, which is now being carried out, has been provided and the protective works to foundations of the old portion of the bridge completed.

13. As for the three remaining bridges, however, viz., the Paupugnee, Chittravutti and Pennair, the most that can be said is that they will be, when restored, of a slightly more permanent character than when originally built.

The scour in these rivers during the floods of October 1874 reached, in the case of the Paupugnee, to a depth of not less than 22 feet, and in that of the Pennair not less than 12 feet, these being the respective depths at which the ruined piers in these bridges had been founded.

The piers which failed had their foundations as deep as those which have stood (except in the Chittravutti, where nineteen of the centre piers are of screw piles at considerable depth). They all rested, as the sound piers do, at a short depth below the surface of a bed of decomposed gneiss and trap, which underlies the sand of which the beds of these rivers are composed.

The fact of their failure depended on the cross set of the current in each case, and this probably takes a new direction in every successive great flood. Such is the character of these rivers.

14. It will therefore be unsafe for the future to rely on the three bridges in question, and your Chief Engineer, now at home, will no doubt, after consultation with Sir John Hawkshaw, advise you as to the best course to adopt in respect of them, as well as in the matter of increased waterway for the Cheyaur and Paupugnee, the necessity for which is apparent.

15. The two bridges (at Mallputty and Vanienbaddy) destroyed by the cyclone of 6th May 1874 are being replaced by new structures affording considerable increased waterway, and their progress is satisfactory.

16. *Cheyaur new Bridge.*—It has not been possible to make much progress with the sinking of the pier cylinders since the date of my last report (25th August 1874). All the cast iron segments in hand had been used up at that time in sinking the line of western cylinders. From

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

The correct section of river bed, thus for the first time obtained, I was enabled to indent for the materials and equipment required to complete the pier. These were delivered at Madras on 17th November, but the heaviest date of the river and the work to be done in repairing the old bridge have retarded progress in the new structure. We are now however prepared for a fresh start, and a good deal will be done within the current half-year towards sinking the second row of cylinders down to the same depths as the others have reached.

17. All the cylinders will then rest on a stratum overlying rock from one to three feet.

18. The depths attained below river bed are as follows:—

13 Piers varying from 70 to 95 feet deep.

2 " " from 60 to 69 " "

14 " " from 10 to 52 " "

19. When first recommending the application of the Pneumatic process to the preparation of a level bed for the cylinder piers of this bridge (with my letter No. 828, of 10th December 1873), I expressed an opinion that it need not be applied to such of the cylinders as had reached very great depths, and the reasons for this opinion are stated in my letter No. 835, of 21st May 1874, paragraph 5. It has however been ruled by the Company's Consulting Engineer, that the Pneumatic process shall be applied to all the piers of the bridge, and that they shall be sunk through the hard overlying stratum to rock surface. I have accordingly sent home an indent for two sets of Pneumatic apparatus, capable of working to 95 feet deep, in addition to those already supplied, which are capable of working only to 70 feet deep. It still remains to be proved whether in the climate, workmen can endure the pressure within the cylinders of four atmospheres, which will be required to expel the water to that depth.

20. *Huggery Bridge.*—Since my last half-yearly report rock has been unexpectedly encountered by the cylinders in sinking, and the divers who arrived from England in September last for working the Pneumatic apparatus are at present employed in preparing by their means the pier foundations. But little has been done as yet however in this latter process owing to interruptions from floods, and the necessity of removing the steam engine to Goriattum for pumping out the foundations of the new portion of that bridge. I shall visit the Huggery in a few days and will report specially on the work.

21. *Protective Works.*—The progress of these additional works to the Poiney, Goriattum, Palar and Naggery bridges has been greatly retarded by the extraordinary wet season we have had, commencing with the cyclone of 6th May.

It was not possible to resume operations, almost suspended since that date, till about the middle of January of this year, and since that time very good progress has been made with Goriattum, Poiney, and Naggery. The water in Palar river keeps so high that little progress has been made at the works of that bridge up to date. Land for the manufacture of bricks for the Poiney was only placed in possession of the Company on 3rd October 1874. Had it not been for this delay the protective works there would probably have been finished before last monsoon. Every exertion will be made to complete the protective works of the four bridges before next monsoon, but I hardly expect to see it done.

22. The Naggery river protective works 3 miles above the bridge have been completed.

23. Since my last half-yearly report I sent forward an estimate, which has been duly sanctioned, for raising the line at 373rd and 377th miles, South-west Line. The necessity for this was explained in paragraph 7 of that report. The work is now in progress and will cost less than Rupees 7,000.

24. *Maintenance.*—The cost of maintaining the line for the half-year has been Rs. 680-14-6 as against Rupees 735-14-10 for the corresponding half-year in 1873.

This may be considered satisfactory, as the expenditure under the head of "Maintenance" in the last quarter of 1874 includes large outlay on account of damages from floods.

25. *Electric Telegraph.*—The working of the telegraph has been very satisfactory, and the cost of its maintenance has been somewhat lower than for the corresponding half of 1873.

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

26. With this report are furnished the usual quarterly statements of expenditure in maintaining the way and works during the last quarter of 1874, with the Deputy Chief Engineer's report for that period. Also the statement of expenditure in maintaining the Electric Telegraph for the half-year ending December 1874, with the Telegraph Engineer's report for that period.

(True Copy.)

(Signed) J. MELLIS,
for Agent and Manager.

From G. K. WINTER, Esq., Telegraph Engineer, to T. H. GOING, Esq., Acting Chief Engineer of the Madras Railway Company, dated Arcoonum, 24th February 1875, No. 54.

Report for the half-year ending 31st December 1874.

DURING the half-year ending 31st December 1874, Morse instruments on my duplex principle were fixed on the circuit between Salem and Beypore, and have been working very satisfactorily.

2. The final alterations have now been made to the Needle instruments. The old drop handle has been abandoned, and finger keys substituted somewhat on the model of the English Post Office pattern. Two side or controlling magnets have been added, one each side of the induced needle. The substitution of the finger keys will largely reduce the wear and tear of the instrument, and consequently the cost of repairs; while the controlling magnets greatly increase the sensitiveness of the instrument, and at the same time enable the signallers to neutralize the effect of earth currents, and keep the needle vertical, and in its most sensitive and convenient position. These alterations have been very economically carried out, as may be gathered from the fact that the cost of maintenance for the half-year is considerably less than that during the corresponding half of the previous year.

3. The telegraph suffered very severely during the heavy rains of October last, but the damage was quickly repaired. The following is an account of the damage:—

1st.—On the South-west Line one Siemen's long post was carried away at the Goriattum river, and has not since been found. Both wires were submerged, but fortunately not broken. The interruption lasted 26 hours.

2nd.—On the North-west Line, at the 81st mile, one Hamilton's standard was thrown down and the insulators broken. No interruption was caused, and the pole was recovered.

3rd.—107th mile, one Hamilton's standard was thrown down, and the insulators broken. No interruption was caused and the pole was recovered.

4th.—134th mile, about a quarter of a mile of telegraph washed away, the wires broken, and carried into the fields. All the posts except one have been recovered and reset. The damage occurred on the night of the 26th October. The break was impassable up to the night of the 29th, but communication across it was restored on the morning of the 27th.

5th.—Cheyarr Bridge. The wires were broken in two places, three Hamilton's standards and two teak brackets having been carried away. Of these two of the standards were recovered and reset, communication across the Cheyarr was established on the morning of the 29th.

6th.—173rd mile, one Hamilton's standard complete carried away.

7th.—Paupugnee River. Two Siemen's long posts and one teak bracket were carried away and have not been found. The wires were broken in two places. Communication across the Paupugnee was restored on the 29th.

8th.—Chittravutti River. Two teak brackets complete were carried away. The wires were not broken but were in contact with each other and with the iron work of the bridge. Communication was restored on the afternoon of the 29th.

9th.—Huggery River. Two Hamilton's standards complete were carried away. One has been recovered. Communication was restored on the 2nd November. My Inspector was out off from the Bellary branch for several days. I have to thank an Inspector of the Government Telegraph Department for assisting us at this place.

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

Value of Stores lost		Rs.	A.	P.
3 Siemen's long posts iron	...	38	14	3
1 Do. short do.	...	18	0	0
3 Hamilton's galvanized iron posts	...	81	0	0
3 Teak Brackets	...	27	0	0
4 Cwt. No. 5 galvanized iron wire	...	34	0	0
6 Siemen's Insulators	...	7	2	0
30 White invert Insulators...	...	20	4	0
30 Iron arms...	...	26	4	0

Labor employed for repairing the damage	...	288	8	9
	...	48	11	0
	...	337	4	9

4. I trust some part of the lost stores may be recovered during the dry weather.
5. Notwithstanding the unusual weather, however, the actual number of interruptions was less than that during the corresponding half of the previous year. The following table will give the comparative figures:—

	South-east Line		North-west Line		Total
	Interruptions caused by the neglect and carelessness of the Signallers.	Accidental Interruptions	Interruptions caused by the neglect and carelessness of the Signallers.	Accidental Interruptions	
Half-year ending 31st December 1873	5	19	8	4	36
Half-year ending 31st December 1874	6	13	4	6	29

6. Of the eighteen accidental interruptions three only were caused by lightning.
7. The cost of maintenance is given in the annexed table. This shows a total decrease of Rupees 29,038-7-5 as compared with the corresponding half of previous year, from this, however, must be deducted Rupees 27,828, viz. the extraordinary expenditure on account of the substitution of Siemen's posts for the wooden poles on the South-west Line. I also annex a statement of the working of the electric clocks.

Summary of the working of Electric Clocks for the months of July, August, September, October, November, and December 1874.

	1874						Total
	July	August	September	October	November	December	
Clock failure	208	184	100	655	256	169	288
Clock error 2 minutes and over	208	322	168	140	00	218	175

Account.
24th February 1875.

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

From E. C. BOODLE, Esq., Acting Locomotive Superintendent, to R. B. BLWIN, Esq., Agent and Manager of the Madras Railway Company, dated Perambur, 9th April 1875, No. 51.

I HAVE the honor to submit my report for the half-year ending the 31st December 1874.

2. Three statements accompany the report, numbered respectively 1, 2, and 3.

3. No. 1 is an abstract exhibiting the expenditure incurred in each month, under various heads, in working and upholding locomotive engines and tenders and rolling stock during the 6 months.

4. No. 2 is an abstract furnishing similar information for the last three half-years, for the purpose of comparison.

5. No. 3 is a statement showing the classes and numbers of locomotive engines and vehicles on the line, exhibiting also the number of the several descriptions of rolling stock constructed during the half-year, and those at present in course of manufacture in the Workshops.

6. *Locomotive Engines and Tenders.*—The locomotive engines and tenders throughout the line are generally in good order.

7. The repairs to locomotives have been very extensive and heavy during the past half-year. This was anticipated in previous reports, and a large outlay under this head must continue for some time.

8. Three engines were thoroughly renewed during the half-year, and repairs were executed to thirty-six engines. Of this latter number the repairs to nineteen were such as almost to amount to partial renewal. The total number of engines under, and awaiting, repair and renewal on the 31st December was thirty-two.

9. The total mileage run during the period under review is in excess of that shown for the two preceding half-years, being 1,270,459 miles against 1,194,024 miles in the half-year ending June 1874 and 1,250,766 miles in that ending December 1873.

10. The heaviest mileage run was during the month of August, when it stands at 222,912; the least is during November, when it was so low as 193,129, the cause of the reduced mileage in November being due to the number of trains necessarily cancelled in consequence of the interruption to traffic caused by the break on the North-west Line.

11. *Carriage and Wagon Stock.*—The carriage stock is in good working order.

12. The wagon stock generally is also in good running order. The repairs to wagons during the past half-year have been unusually heavy, but the expenditure under this head has been very considerably augmented by the outlay involved in the renewal of timber trucks; the reconstruction of fifty-nine of these wagons having been completed between July and December last. Further renewals of vehicles of this class will be necessary, and the expenditure on this account, combined with the cost of heavy repairs to the wagon stock generally which may be anticipated, will probably cause a continuation of the present heavy outlay under this head.

13. *Rolling Expenses.—Working and repairs of Locomotive Engines and Tenders.*—The report as exhibited in abstract No. 1, shows that the monthly expenditure in working locomotives cannot be said to have great extent, the total cost per mile under this head being shown as Annas 3 Pies 4 in July against Annas 3 Pies 5 27 in December.

14. The cost per mile in July for Enginemen and Firemen's wages is shown as Anna 1 Pies 0 59, and in December as Anna 1 Pies 0 87. The wages of cleaners, cooken and watermen stand for these two months respectively at Pies 3 79 and Pies 3 86 per mile, and the mileage outlay for all descriptions of fuel consumed is shown in July at Annas 3 Pies 3 91, and in December at Annas 3 Pies 10 40 per mile.

15. Under the head of Superintendence and Office Expenses, as shown in the summary of charges No. 1, it will be observed that the amount incurred in the month of November is greatly in excess of the monthly outlay on this account in the remaining months of the half-year. The increase in expenditure, as exhibited in the Revenue Statements, are obviously liable to variations from the respective Public Capital and Revenue Accounts. The increased superintendence in November was, however, principally due to the addition to the ordinary expenditure in that month of the sum of Rupees 1,000, drawn under sanction, by Mr. W. Barton Wright, and included by him in the Chief Account of the accounts of this department.

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

16. Comparative Abstract No. 2 exhibits the total mileage cost of working and upholding locomotives and tenders during the past half-year at Annas 8 Pies 3 86 as compared with Annas 7 Pies 11 68 per mile in the previous, and Annas 7 Pies 8 29 in the corresponding half year, or an increased cost per mile of Pies 4 18 and Pies 7 57 respectively. The increase arising in the comparison of the expenditure with that of the preceding half-year will be found to be attributable to the very large additional outlay incurred between July and December 1874 in the repair and renewal of engines; the increase in the expenditure in labor and material on this account reaching to so large a sum as Rs. 28,864-4-0 or 20·83 per cent. in excess of the expenditure of the previous six months. In the comparison with the corresponding half-year in 1873, the increase in expenditure will be observed to occur partly in the cost of working and partly under the head of Repairs. That under the head of Working is due to the enhanced prices which, as mentioned in my report for the half-year ending June 1874, it was found necessary to fix upon issues of coal.

17. The cost per mile of Enginemen and Firemen's wages for the past half-year contrasts very favorably with that during the two preceding periods. The figures stand at Anna 1 Pies 0 83 against Anna 1 Pies 1 54 during the previous, and Anna 1 Pies 1 87 during the corresponding six months. The mileage cost of cleaners, cooken, and watermen, as also the expenditure, under the head of oil, tallow, and waste, remain so uniform as to need no comment.

18. The results shown under the head of total coke, coal, and patent fuel consumed per mile are also favorable as regards the quantity used, the consumption in the past half-year being lbs. 25·59 per mile as compared with lbs. 26·08 and lbs. 25·64 per mile during the previous twelve months. The cost per mile is higher consequent upon a revision and further slight increase in the prices of coke and coal. Taking, however, the average cost per mile of all descriptions of fuel consumed, the difference between the figures shown under this head for the past half-year and those for that preceding it is very slight. They stand respectively at As. 3 Pies 8 57, and As. 3 Pies 8 40 per mile.

19. *Carriages and Wagons.*—As shown in Abstract No. 1, the cost of running carriages and wagons has decreased during the past half-year, it having stood at Pies 4 22 per mile in July, while in December it was as low as Pies 3 78 per mile. In the comparison of the three half-years (Abstract 2) the cost per mile under this head stands for the past half-year at Pies 4 09, which is lower than that shown for the two preceding periods.

20. A considerable variation appears in the monthly outlay incurred under the head of Repairs of Carriages and Wagons; that shown for the month of July being Rupees 29,867-7-6 against Rupees 16,508-11-2 in the last month of the half-year. The heavy outlay shown in July was caused by a large proportion of the wood-work necessary for the reconstruction of timber trucks having been drawn from stores in that month. To the same cause may be attributed the enhanced expenditure under this head in the month of August. In Abstract No. 2, the cost per mile of labor and materials for the repairs of carriages and wagons is shown as Anna 1 Pies 4 47. This, it will be observed, considerably exceeds previous half-yearly expenditure under this head. The causes of the increased outlay I have already indicated in paragraph 12 of this report.

21. *Summary.*—The results, as summarized in Abstract No. 2, are favorable as regards the working and running expenses, both for engines and tenders, and for carriages and wagons. The very heavy additional expenditure under the head of Repairs has, however, raised the total cost very considerably, and it stands as high as Annas 10 Pies 2 41 per mile. The average number of vehicles hauled per mile is in excess of the two previous half-years, and is shown at 16·84.

22. *Staff.*—The conduct of the staff generally has been satisfactory. Fever has been very prevalent at Jallapett Station, and a large number of the employees there have been temporarily incapacitated from work. With this exception the health of the employees generally has been good.

23. It is with much regret that I have to record the death, on the 4th September last, of Foreman Edward Read. Foreman Read's service extended over a period of nearly 20 years, and his death has deprived the Company of a most energetic and zealous servant.

24. The only other casualties which I have to report are the resignation of Covenanted Fitter and Erector Joseph Irons, who left Madras on the 8th December last; and the re-entertainment as a Covenanted Engineman of Thomas Patnam, who arrived here on the 10th August.

Acting Locomotive Superintendent

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

From H. E. CHURCH, Esq., Traffic Manager, to R. B. ELWIN, Esq., Agent and Manager
of the Madras Railway Company, dated Madras, 15th April 1875.

I HAVE the honor to submit my report upon the traffic for the half-year ended December 1874.

2. *Open Mileage*.—The mileage worked over was 858, as compared with 851 for the corresponding period of 1873.

3. *Rates and Fares.*—There has been no change in the ordinary rates and fares, but the following special rates for goods were introduced during the half-year:—

Article.	REDUCTION PER TON PER MILE.		In Wagon loads.	Condition.
	From	To		
	PIES.	PIES.		
Kerosine oil	36	18	...	Madras to Raichore.
Plantains	14	12	60 Maunds ...	Erode to Madras.
Salt	12	8	6 Tons... ..	Madras to Tadialore, Karamady, and Mettappolliem.
Stone	12	8	6 "	Arcot and Tiravellem to Madras.

4. *Train Mileage.*—The train mileage for the last and corresponding half-year of 1873 was as follows:—

Description of Train.										1873.	1874.
Mail	...	...	...	...	...	...	...	...	...	331,662	319,658
Passenger and Mixed	...	...	...	...	...	...	...	...	...	351,490	336,684
Goods	...	...	...	...	...	...	...	...	...	182,018	204,228
Extra Passenger and Extra Troop...	...	...	...	...	...	...	...	...	...	4,630	3,719
" Goods	...	...	...	...	...	...	...	...	...	94,225	97,210
Special	...	...	...	...	...	...	...	...	...	609	624
Ballast for construction	...	...	...	...	...	...	...	...	...	10,211	1,507
Total...										974,845	957,020

5. *Interruption to Traffic.*—Serious interruption to traffic occurred during the half-year. Through booking to and from Bangalore was suspended from the 18th to the 28th September in consequence of a break at the 203rd mile on the Bangalore branch, and from the 17th November to the 2nd December in consequence of the removal of a part of the Tiger Rock on the Coopara Ghaut. Through booking was suspended on the South-West Main Line from the 25th October to the 14th November, and a day service of trains for mails and passengers was only maintained by transshipment at the Gomathi river. On the North-West Line, where the floods were much more severe, traffic was entirely suspended between Tirupetty and Ghooty on the 25th, 26th, and 27th October. On the 28th October a day service of trains was resumed between Tirupetty and Rajampett (130 miles from Madras). On the 30th October a day service of trains was resumed between Nundaloro and Cuddapah, thus providing a daily service for passengers and mails between Madras and Cuddapah, the distance between Rajampett and Nundaloro stations (7 miles) being performed partly by road and across the Cheyair river on rafts. On the 3rd November a day service of trains was resumed for passengers and mails between Cuddapah and the south bank of the Paupugnee river, between the north bank of the Paupugnee and Moodanoor station, and between the north bank of the Pennair river and Ghooty, still leaving a gap of 37 miles between Moodanoor and the south bank of the Pennair to be performed on foot or by country cart. Passengers and mails were carried across the rivers on rafts. On the 17th November a day service of train for passengers and mails was resumed between Moodanoor and the south bank of the Chit-

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

travutty River and between the north bank of the Chitravutty and south bank of the Pennar, thus completing a day service between Chidambaram and Gooty, enabling passengers and mails to perform the journey between Madras and Bellary in two days, and between Madras and Rameswaram in two and a half days; passengers and mails were then carried across the river in bullock carts. The goods traffic was entirely suspended on the North-West Line between Rajamundry and Gooty from the 25th October to the 17th November, when communication was restored between Tadipatri and Gooty by land-hauling wagons over the Pennar Bridge. On the 12th December goods traffic was blocked through between Chidambaram and stations south, all traffic being transhipped at the Chayam River. On the 21st December goods traffic was resumed throughout the North-West Line by transhipping at the Chayam, Paopagnoo, and Chitravutty Rivers.

6. *Gross and Net Earnings*.—Compared with the corresponding period of 1873, the earnings from all sources were Rupees 29,18,829 against Rupees 31,18,942, and the net earnings were Rupees 2,71,556 against Rupees 19,12,829, which cannot be regarded, under the very exceptional circumstances above alluded to, as other than satisfactory. The falling off in the gross earnings will be found in the following items of traffic, &c. —

	Rs.
Decrease in passengers	3,483
Soldiers	1,200
Horse, carriage, &c.	4,805
Extra troop trains	21,221
Goods	1,40,178
Bambies	7,068
	1,78,448
Increase in baggage and parcels	3,398
Materials	2,355
Damirags	1,035
Telegraph	2,928
	9,633
Net decrease ...	1,69,115

The working expenses stood as follows:—

	Rs.
Increase maintenance	21,110
Locomotive	61,759
Carriage and wagons	38,461
Traffic	12,501
Special	6,578
	1,50,415
Decrease in general charges	46,582
Chayam Bridge	2,31,773
	2,78,355
	1,27,940

7. The falling off in the traffic is very easily accounted for by the very serious and prolonged interruptions, and, looking at the total cessation of all through traffic on the North-West Line for a period of fifty-eight days, there is great reason for congratulation that the falling off was not very much larger.

8. The increase in the departmental working expenses may be generally attributed to the cost of working the Nilgiri branch and the accelerated mail service for six months against four months in 1873 and to the additional cost of working the passenger traffic and mails on the North-West Line during the break, there being no less than seven different trains engaged in carrying this traffic between Madras and Rameswaram, a distance of 351 miles.

9. *Passenger Traffic*.—The receipts from passenger traffic (exclusive of Soldiers) were Rupees 10,61,931 against Rupees 10,68,477, or a decrease of Rupees 3,486.

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

The receipts from each class will be found in the following table:—

Period.	First Class.	Second Class.	Third Class.	Cooly Class.	Total.
	Rs.	Rs.	Rs.	Rs.	Rs.
December 1874	60,245	54,301	8,31,655	1,18,790	10,64,991
" 1873	64,143	54,607	8,41,653	1,08,074	10,68,477
Increase in 1874	...	...	...	...	...
Decrease in 1874	3,898	306	9,998	9-9	3,486
Increase per cent.	...	...	...	...	...
Decrease "	6-0	0-55	1-1	...	0-3

10. The number of passengers carried was as follows:—

Period.	First Class.	Second Class.	Third Class.	Cooly Class.	Total.
December 1874	6,825	24,744	1,067,679	292,029	1,391,277
" 1873	5,894	22,207	1,044,426	268,477	1,341,004
Increase in 1874	931	2,537	23,253	23,552	50,273
Decrease in 1874	...	...	...	...	...
Increase per cent.	15-7	11-4	2-2	8-7	3-7
Decrease "	...	...	...	...	...

11. The percentage of numbers and average mileage in each class were as follow:—

Period.	PERCENTAGE OF NUMBERS.				AVERAGE MILEAGE.			
	First.	Second.	Third.	Cooly.	First.	Second.	Third.	Cooly.
1874	0-50	1-78	76-74	20-93	142	81	51	98
1874	0-44	1-66	77-88	20-02	158	89	52	86

12. The average fare paid by each class of passenger was as follows:—

Period.	First.	Second.	Third.	Cooly.
	Rs. A. P.	Rs. A. P.	Rs. A. P.	Rs. A. P.
December 1874	8 13 3	2 3 1	0 12 6	0 6 6
" 1873	10 14 1	2 7 4	0 12 10	0 6 5

13. The return fare and festival traffic was as follows, and shows an increase in all classes:—

Period.	First Class.	Second Class.	Third Class.	Total.
	No. Rs.	No. Rs.	No. Rs.	No. Rs.
December 1874	3,483 22,392	4,845 15,204	1,03,404 89,612	111,532 1,27,208
" 1873	2,963 21,663	4,327 13,021	98,492 83,979	105,782 1,19,263
Increase 1874	520 729	518 1,583	4,912 5,633	5,750 7,945

14. The following table exhibits the second-class traffic between Coimbatore and Baypore where an exceptional fare of 4 pice per mile has been in operation since the 1st March 1869.

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

Period.	Through Passengers at 5 Paces per Mile.	Local Passen- gers at 4 Paces per Mile.	Total.	Amount.
December 1869	...	32,158	32,158	18,749
" 1870	319	34,435	34,754	19,766
" 1871	290	38,575	38,865	21,261
" 1872	372	38,930	39,302	21,761
" 1873	698	5,026	5,724	3,411
" 1874	854	5,285	6,139	4,042

15. The result of the passenger traffic was a decrease in money of 6.8 per cent. and an increase in number of 3.7 per cent., but, except in the cooly class, the increase in number is to a certain extent fictitious, as passengers earned over the North-West Line during the breaks were booked three or four times during the journey. Compared with 1873, the receipts from ordinary traffic were less by Rupees 11,432, while the extraordinary or festival traffic shows an increase of Rupees 7,945. The falling off in the ordinary traffic will be found in the first, second, and third classes, and amounted to Rupees 22,147, the cooly class having increased by Rs. 19,716. The falling off in the first, second, and third classes is easily traced to the breaks on the North-West Line, the traffic on the South-West Line having manifestly increased, except between Pothumuri and Beypore, where there is very little apparent development, leading to the inference that the change in the constitution of the trains in July 1873 has not yet been attended with any financial success. It will be seen from paragraph 14 that, consequent on this change, the second-class traffic between Pothumuri and Beypore has fallen off largely both in number and receipt.

16. The falling off under the head of "Extra Troop Trains" is due in part to some of the reliefs of the season being marched, and in part to the inability of the Company to move troops over the North-West Line.

17. The increase under the head of "Parcels" is due, not to any particular development in the parcels traffic per se, but to the fact that large quantities of betel leaves were carried at the low and vegetable rate at the special request of producers who considered it worth their while to pay an enhanced rate for quicker despatch than the goods train afforded. The through parcels traffic with the Railways north of Ranchoor was entirely suspended from the 25th October until through trains were resumed in January of this year.

18. *Goods Traffic.*—Compared with the corresponding period of 1873, the receipts from goods (exclusive of materials for construction) were Rupees 16,12,526 against Rupees 17,59,703, and the tonnage was 136,570 against 133,244, the average mileage having fallen from 160.7 in 1873 to 121.84 in 1874. The falling off in receipt will be found in the following table:—

INCREASE.			DECREASE.		
Article.	Tons.	Rupees.	Article.	Tons.	Rupees.
Brass and copper	53	1,032	Ballast and stone	1,584	2,622
Coal	327	2,412	Bamboo	311	1,500
Cloth and piece-goods	42	...	Betel-nuts	334	6,176

			Timber	61	13,905
			Twist	421	3,238
			Items under 1,000 Rs.	...	...
Total	16,718	88,400	Total	15,392	2,23,578
	1,326	...		...	1,40,178

19. The following table exhibits the receipt from each class of goods for the two half-years:—

Class.	1873.	1874.
	Rs.	Rs.
Special and first class	11,97,150	10,94,954
Second class	2,43,006	2,54,662
Third	1,38,104	1,46,533
Fourth	1,03,182	83,884
Fifth	78,311	39,493
Total	17,59,703	16,19,526

20. The tonnage of goods in each class for the same period was as follows:—

Class.	1873.	1874.
Special and first class	137,141	157,414
Second class	21,560	22,525
Third	9,540	10,649
Fourth	4,292	4,014
Fifth	2,712	1,968
Total	195,245	196,570

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

21. The average receipt per ton carried in each class was—

Classes	1873.	1874.
Special and first class	RS. 7.31	RS. 6.86
Second class	12.37	11.31
Third	14.47	13.78
Fourth	21.02	20.40
Fifth	28.87	29.07
Total	9.01	8.24

22. The average receipt per ton per mile in each class was—

Classes	1873.	1874.
Special and first class	RS. 9.17	RS. 8.00
Second class	13.43	15.37
Third	17.03	16.03
Fourth	22.02	21.47
Fifth	33.10	33.41
Total	19.76	19.42

23. The total quantity of cotton carried over the whole of the Company's system was tons 12,017, yielding a receipt of Rupees 1,77,508 against a tonnage of 11,317 and a receipt of Rupees 1,84,690 for the corresponding half of 1874. In other words, there was an increase in weight of 700 tons, but a decrease in money of Rupees 7,121. The increase in tonnage, however, is to be ascribed to the fact, as some 100 tons of pressed cotton loaded during the breaks, were loaded three or four times during the journey, and in this way the tonnage, as shown above, was increased by some 500 tons. The explanation of the falling off in the receipt is that a smaller quantity of "loose" cotton was brought into Madras, the growers apparently preferring to sell it when it was green, whence it was carried by Railway to the Cotton Factories to be pressed. The quantity so carried was 1,030 tons, and the whole of this found its way on to the Railway again "pressed" and fit for shipment.

24. The following table exhibits the condition in which the cotton was carried:—

Condition.	1873.		1874.	
	TONS.	RS.	TONS.	RS.
Loose	1,930	21,120	1,722	14,068
Half-pressed	140	3,760	58	597
Full	9,259	1,59,750	10,262	1,62,823
Total	11,317	1,84,690	12,047	1,77,508

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

25. The average receipt per ton carried was—

Condition.	1873.	1874.
	RS.	RS.
Loose	11	8
Half-pressed	27	11
Full	17	16

The small average receipt per ton carried of "full-pressed" cotton was due to the fact that, whereas in 1873 only 66 tons of cotton were sent from Madras Railway Stations (Bellary and Adoni) to Bombay, no less than 674 tons were so sent in 1874, in consequence of the breaks on the North-West Line.

26. The quantity of cotton sent from Bellary and Adoni to Madras and Bombay was as follows:—

	Madras.	Bombay.	Total.
Bellary	3,272	477	3,749
Adoni	2,318	107	2,515
Total	5,590	674	6,264

27. The following table exhibits the tonnage of cotton brought into Madras by Railway and the tonnage exported in the two half-years:—

District.	Brought by Railway		Exported.	
	1873.	1874.	1873.	1874.
Arcoot and Vellore...	154	...	...	...
Coimbatore and Salem	1,311	1,470	...	...
North-West Line	8,158	7,723	...	...
Total	9,623	9,193	10,685	9,403

28. The following figures will be interesting as showing the progress which has been made in pressing cotton in the interior:—

Tonnage of cotton carried over the whole system during the half-years ending December 1870, 1871, 1872, 1873, and 1874.

Half-years.	Half-pressed.	Full-pressed.	Loose.	Total.
				TONS. RS.
1870	362	2,112	1,915	4,389 1,18,504
1871	4,030	3,706	3,716	11,452 3,70,343
1872	1,054	4,598	1,917	7,564 1,64,053
1873	140	9,238	1,939	11,317 1,84,690
1874	58	10,262	1,732	12,047 1,77,508

29. The tonnage of coffee carried over the whole line and tonnage carried from Bangalore to Madras will be found in the following table.

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

Half-year.	Grain and other goods.			Fresh Manufactures to Madras.		
	Tons.	Assessment.	Total.	Assessment.	Other.	Manufactures.
December 1870	704	13,842	14,546	168	106	274
1871	657	12,800	13,457	8	149	157
1872	504	8,780	9,284	40	140	184
1873	607	12,103	12,710	2	170	172
1874	604	11,022	11,626	2	170	172

32. The tonnage of food grains earned during the two half-years was as follows:—

Half-year.	East and North.		West and North.		Total.	
	Tons.	Rs.	Tons.	Rs.	Tons.	Rs.
1873	20,767	1,34,024	42,225	2,58,728	63,092	4,12,752
1874	24,710	1,00,448	50,700	4,11,200	75,410	4,20,108
Decrease	3,943	2,416	8,475	27,472	24,532	30,226

33. The traffic was, no doubt, very seriously affected by the break on the North West line but to what extent it is difficult at present to say with any degree of certainty. Before the break on the North West Line, upwards of 400 tons of grain per month passed from the Great Indian Peninsula Railway to Madras, Vellore, and Bangalore on this line, and this traffic, it is estimated, ceased on the 21st October. From the returns of foreign traffic furnished direct to this office by station Masters, it would appear that during the break, this grain found a market at Bellary and Adoni, and increased very largely. The increase in the total traffic received from the Great Indian Peninsula at stations north of Bangalore during the first four months of the half-year was 1,910 tons, or at the rate of 477 tons per month, but in the last two months of the half-year the traffic averaged 1,450 tons per month. For the same reason, the traffic sent to the Great Indian Peninsula by stations north of Bangalore increased from 574 tons in 1873 to 1,450 tons in 1874, while the traffic from stations south of Bangalore fell from 1,450 tons in 1873 to 287 tons in 1874.

34. Regarding the "north" salt held for over last year, the falling off in "sea" salt sent from Madras to the North West Line was upwards of 700 tons as will be seen from the following table:—

District.	1873.		1874.	
	Tons.	Value.	Tons.	Value.
Between Madras and Arcot	...	1,198	310	900
Cuddapah	420	...	...	...
Other stations on the North West Line	2,575	...	2,314	...
Arcot and Vellore	...	5,400	...	6,415
Between Goriatum and Vaniembady	...	430	2,316	...
Bangalore	2,381	...	704	...
Other stations on Bangalore Branch	640	...	3,020	...
Salem	1,271	...	1,580	...
Other stations in Salem District	1,870	...	4,103	...
Erode, Avanshy, and Coimbatore	...	3,504	2,611	...
Total	10,918	...	19,420	...

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

34. The following table exhibits that salt traffic out of Madras in each year for the five years ending December:—

Districts.	1870.	1871.	1872.	1873.	1874.
	TONS.	TONS.	TONS.	TONS.	TONS.
Between Arcotum and Conjeveram	3,098	1,775	2,689	2,484	1,902
Cuddapah	2,248	1,550	1,347	1,225	727
Other stations on North-West Line	6,602	6,620	5,747	5,627	4,441
Arcot and Vellore	10,625	8,482	11,033	10,618	10,142
Goriatum and Vaniembady	2,785	2,165	2,122	2,101	1,984
Bangalore	4,249	4,389	3,761	4,312	4,040
Other stations on Bangalore Branch	1,365	1,465	1,268	1,097	1,221
Salem	1,593	1,876	1,522	2,989	2,922
Other stations in Salem District	3,571	4,210	3,110	3,936	4,805
Erode, Avanshy, and Coimbatore	6,767	6,348	5,586	6,366	5,247
Total	44,803	38,880	38,135	40,655	37,431

35. Receipt from each class of goods moved northward and westward during the half-years ending December 1873 and 1874:—

Class.	1873.	1874.
	RS.	RS.
Special and first class	6,59,309	6,37,803
Second class	88,089	92,007
Third	62,563	82,606
Fourth	88,954	60,125
Fifth	54,154	25,309
Total	9,53,068	9,06,920

The falling off in this direction will be found principally in cloths and twist, food grains, salt, sundries, skins, timber and Commissariat stores, and is undoubtedly due to the interruption on the North-West Line. Details of the increase and decrease in the several commodities will be found in the following tables:—

36. Increase in commodities moved westward.

Tons.	Commodities.	Amount.	
		RS.	A. P.
58.51	Ballast and stone	1,005	7 0
32.80	Brass and copper	...	...
15.42	Chillies	...	...
119.49	Cloths and piece goods	1,811	5 7
376.19	Cotton, loose	3,473	12 0
555.04	Do. B-pressed	2,366	5 0
927.32	Firewood	1,652	15 0
335.69	Fruit and vegetable	28,284	8 0
3071.20	Grain	...	...
31.10	Grains	...	...
91.43	Gunnies	3,098	6 10
441.58	Iron of all kinds	3,428	9 0
306.93	Jaggery	...	...

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

From	Commodities	Amount
24000	Oil of all kinds	2,013 13 0
24000	Paddy	3,000 0 0
24000	Grains of all kinds	20,313 8 4
24000	Sugar of all kinds	3,320 12 0
24000	Firewood	1,000 0 1
24000	Waxes and spirituous liquors	1,303 15 10
24000	Minor items less than 1,000 Rs.	1,563 9 4
12,700 00	Total	85,201 3 0

39. Increase in commodities moved eastward—

From	Commodities	Amount
24000	Charcoal, coke, and coal	1,700 4 0
24000	Clotted and butter-ghee	10,070 1 0
24000	Commissionariat stores	9,871 12 6
24000	Timber	3,022 1 0
24000	Loggery	1,200 0 2
24000	Raggy	30,727 11 0
24000	Rice	25,211 2 5
24000	Salt	4,533 10 5
24000	Skins	5,106 12 0
24000	Sundries	12,267 13 11
24000	Sugar of all kinds	2,000 4 0
24000	Wines and spirituous liquors	7,803 12 0
24000	Twist	9,703 1 4
24000	Minor items less than 1,000 Rs.	8,300 6 8
11,200 00	Total	1,01,331 6 2

40. Receipts from each class of goods moved southward and westward—

Class	1874	1875
First and first class	1,37,841	1,37,351
Second class	1,54,016	1,62,555
Third	15,543	53,928
Fourth	14,150	14,730
Fifth	24,167	14,183
Total	8,06,534	7,13,006

The falling off in this direction will be found in hotel-out, large quantities of which are carried from Bellary and were shot out by the levees, in grain which found a better market in the other direction; in potatoes owing to an indifferent crop; in sundries which cannot at present be satisfactorily explained, and in timber which finds its way in large quantities from the Western Coast to the North-West line. The particulars of the increase and decrease in the several items will be found below.

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

39. Increase in commodities moved eastward—

Tons.	Commodities.	Amount.
		RS. A. P.
261-62	Chillies	3,318 5 4
678-16	Cotton, D-pressed	10,345 11 0
815-51	Dye and redwood	3,950 14 6
693-59	Firewood	1,197 15 7
457-20	Fruits and vegetables	5,321 7 0
1403-94	Grains	1,577 9 0
119-50	Indigo	1,264 6 2
570-50	Paddy	8,264 5 11
1227-97	Raggy	7,329 1 9
1491-26	Rice	5,576 5 6

9404-84	Total	57,179 9 3

40. Decrease in commodities moved eastward—

Tons.	Commodities.	Amount.
		RS. A. P.
1642-49	Ballast and stone	2,175 10 0
322-53	Bamboos	1,613 2 9
284-55	Betal-nuts	5,517 0 1
235-95	Charcoal, coke, and coal	1,173 15 0
57-02	Cloth and piece-goods	2,619 1 0
60-77	Coffee	1,156 1 0
43-68	Commissionariat stores	2,364 0 0
584-45	Cotton, loose	8,842 12 0
105-54	Do. B-pressed	2,945 11 0
216-17	Do. E-pressed	10,858 8 0
122-84	Ghee	4,172 11 10
726-72	Gram	19,960 2 11
...	Grain	1,023 3 7
137-70	Gunnies	1,789 7 11
101-79	Iron of all kinds	1,624 6 0
875-69	Jaggery	9,159 14 7
454-85	Oil of all kinds	5,882 1 4
670-67	Potatoes	13,726 5 3
262-06	Seeds of all kinds	6,763 10 7
...	Skins	5,613 1 0
466-82	Sundries	22,459 8 11
447-80	Tamarind	2,422 13 8
1811-90	Timber	12,354 13 4
99-74	Twist	4,141 13 5
228-89	Minor items less than 1,000 Rs.	946 6 10
9952-52	Total	1,51,208 6 0

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

41. The percentage of tonnage moved month by month during the half-year in each direction, based upon the ton mileage, was as follows:—

Months	East.	West.
July...	43	55
August...	43	57
September...	41	59
October...	37	53
November...	35	55
December...	37	53
Total...	40	50

42. The tonnage of materials carried on revenue account "free of charge" was as follows:—

Department.	Tonnage.	Average Mileage.
Engineering...	4,674	112
Locomotive...	3,348	171
Stores...	14	176
Total...	7,926	137

43. Working Expenses.—The increase in the departmental working expenses is explained as follows:—

Traffic Manager and Assistants...	Increase of Deputy Traffic Manager's salary.
Office Establishment...	Additional staff of Clerks and salaries of Travelling Ticket Collectors for which no specific sanction existed.
Station Masters...	Increased pay to Station Masters and Pointsmen, and new appointments.
Quartermasters...	Promotion to higher grade and additional staff.
Engineers...	Sixteen months' bill of the Locomotive Department, amounting to Rs. 7,725, under dispute, for renewing centre chains, adjusting weighing machines, and minor repairs charged to this half-year.
Wagon section...	Decrease due to short stock of canvas.
Office fittings...	Renewal of commodore stands and other station fittings.
Clothing...	Charged to previous half-year, but paid this half-year.
Printing and stationery...	Decrease due in part to more favorable contract prices for printing and in part to issues of books in previous half-year in excess of requirements.
Mileage of foreign work...	Increased foreign traffic received.

(Signed) H. E. CHURCH
Traffic Manager.

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

APPENDIX A.
1. Gross Traffic Receipts in each month for the half-year ending December 1874.

Months.	COACHING.				GOODS.				Total Receipts.			
	Passengers.	Soldiers and Extra Troop Trains.	Parcels and Luggage.	Horses, Carriages, Dogs, and Special Trains.	Merchandise and Miscellaneous.	Materials.			Rs.	A.	P.

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

From J. CRAMP, Esq., Chief Accountant, to R. B. ELWIN, Esq., Agent and Manager of the Madras Railway Company, dated Madras, 8th April 1875, No. 120.

I beg to send you, herewith, the usual statements of the Company's accounts for the half-year ending 31st December 1874.

2. The addition to the capital expenditure during the half-year amounts to Rs. 2,31,091-1-4, made up of cash and stores in the following proportion:—

Cash Outlay.		RS.	A.	P.	RS.	A.	P.
In England	...	7,144	6	2			
In India	...	1,61,149	9	8			
Store issues	...				1,57,005	3	6
Total	...				1,24,085	13	10
					2,31,091	1	4

3. The general details of this expenditure will be found in form No. 5 of the printed series in which the principal heads of expenditure are the following:—

Permanent-way Rupees 11,422 incurred on the 4th division, South-West Line, for renewal of line with pot sleepers between Avenashy and Palghat, Cheyannur bridges, Rs. 10,410, being one-sixth of the total expenditure on this work during the half-year.

Stations and buildings Rupees 10,132 principally for station machinery.

Construction of line Rupees 72,681 including a sum of Rupees 12,020 for the Huggly bridge, and Rupees 34,384 for protective works on the 1st divisions of the South-West and North-West Lines.

Nilgiri branch Rupees 34,269 includes a sum of Rupees 20,364 expended on the large bridges at 5 miles 68 chains, 11 miles 7 chains, and 19 miles 4 chains of this branch.

Preliminary expenses Rupees 15,821, being the amount transferred from "Miscellaneous Surveys Account" for the cost of the Raichore survey, per Consulting Engineer's letter No. 841, dated 7th September 1874.

Engines and tenders Rupees 28,357 cost and fitting of the two engines purchased from the Calcutta and South-Eastern State Railway.

Carriages Rupees 23,621 chiefly due to the construction of second-class sleeping carriages.

Wagons Rupees 10,473 is the cost of fitting an additional plate to springs and of axle-box oil keeps.

Locomotive Shop Plant Rupees 24,464 for which authority was given in Consulting Engineer's letter No. 309, dated 1st April 1874.

4. The following summary shows the receipts and issues of stores during the half-year:—

Balance of stores on hand, 1st July 1874		RS.	A.	P.
	...	3,766,139	1	4
Receipts.				
From England	...	5,35,068	5	0
From purchases, India	...	3,80,501	3	1
		9,21,569	8	1
Issues.				
Capital Account	...	1,24,085	13	10
Revenue	...	7,93,980	11	1
Sales	...	58,416	12	5
		9,16,433	5	4

Store balances, 31st December 1874 ... 37,71,275 4 1

5. The cash expenditure on stores in India, as shown above, amounts to Rupees 3,86,501-3-1, the principal items on which it has been expended being the following:—

General Store Account.		RS.	A.	P.	RS.	A.	P.
Firewood	...	91,936	14	4			
Oils	...	45,848	8	9			
Indian coal	...	45,143	15	11			
Canvas	...	25,132	6	6			

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

<i>General Store Account.—(Concluded.)</i>							
	Rs.	A.	P.	Rs.	A.	P.	
Ropes	7,520	5	9				
Printing and binding	7,295	11	4				
Landing charges	18,918	5	4

Manufactures, &c.	26,037	15	7				
				42,835	15	7	
Traffic store account				135	6	2	
Total ...				3,86,501	3	1	

6. The balance sheet shows a sum of Rupees 82,317-13-6 at the debit of "Bank of Madras, Bellary." This sum is the amount of traffic collections paid into the Bellary branch of the Bank of Madras from 31st October to 31st December 1874, in consequence of the break on the North-West Line. During the month of January 1875, a further sum of Rupees 59,600-10-8 was also paid into this account for the same reason, making a total of Rupees 1,42,518-9-2. This money was withdrawn when through communication was again established, and the account at Bellary closed on the 26th January 1875.

7. It will be remembered that the forms of account Nos. 1-18 of the Government series have been revised during the half-year per G. O., No. 3,344, dated 26th November 1874. The revised forms are used for the first time for the statements herewith submitted. The following alterations will be noticed:—

Form No. 6.—A column is added to show "Total Expenditure to end of the previous half year."

Form No. 9.—Abstract A expenditure on the Choyaur bridge is included under "Repairs of bridges," and not shown separately, but a note is added to show the amount so charged.

Form No. 15.—Distribution statement of audited salaries. The proportions charged to Capital and Revenue are made to agree with the other forms in consequence of which the usual memorandum is omitted.

Form No. 18.—The balance sheet of the Indian books is now given complete, and divided between the Capital and Revenue Accounts.

8. A list of statements that accompany is annexed.

LIST OF STATEMENTS.

Forms Nos. 1-18 of the series issued by the Government of India.

19. Balance Sheet for the half-year ending 31st December 1874.
20. Statement of Capital Receipts and Expenditure to 31st December 1874, as per Secretary's letter, dated 21st October 1873.
21. Details of Cash Expenditure on the purchase of Stores and Issues of Stores on Capital and Revenue Accounts.
22. New Disbursements Fund Account.
23. Sleeper Statement.
24. Statement of Stores in Transit.
25. The Agent and Manager in Assistant with London Office.

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

26. Memorandum of Materials Lost Account.
27. Do. of Short Landings.
28. Do. in Explanation of Short Landings.
29. Statement of Interest on Monthly Balance.
30. Do. of Wood Fuel.
31. Do. of Payments made in England for quarter ending 31st December 1874.
32. Certificates of Locomotive Superintendent, Chief Engineer, Cashier, Traffic Manager, and General Storekeeper, of Cash Balances against them.
33. Certificates of the Agent of the Oriental Bank Corporation, regarding Fire Insurance Fund.
34. Do. of Cash Balances in the Bank of Madras and Oriental Bank Corporation.
35. Certificates of Balance of Cash on fixed Deposits, held by the Bank of Madras, Oriental Bank Corporation, Messrs. Arbuthnot and Co., and Chartered Mercantile Bank of India, London, and China, and of fixed Deposit Receipts held by Messrs. R. B. Elwin and F. Church for safe custody.
36. Six printed copies of the Government Series of Accounts.

(Signed) J. CRAMP,
Chief Accountant.

8th April 1875.

From Surgeon E. F. BROCKMAN, Acting Consulting Physician, Madras Railway Company, to R. B. ELWIN, Esq., Agent and Manager of the Madras Railway Company, dated Royapuram, 22nd February 1875, No. 90.

1. *Annual Return of Sick.*—During the past year ending 31st December 1874 the number of sick amounted to 6,779, which in addition of 78 remaining on the 31st December 1873, makes up the total 6,857 treated during the above-named period. Of this number 3 died, and 82 remained under treatment on the 31st December last. By comparison with the year 1873, an increase of 817 in the number of admissions will be observed in the preceding year above that of the year 1873.

The principal disease were fevers of kinds which numbered 2,177 being about 500 in excess of 1873. This may be in part attributed to the large amount of malarial fever which followed the heavy rains and the flooding of the country during the south-west and north-east monsoons.

Diseases of the bowels furnished 1,649 of the admissions. None of these were of any serious importance. Two admissions were made from cholera.

This year is remarkable for the absence of Dengue.

2. *Accidents.*—The following accidents have been reported to this office:—

- (a.) At Jollapett, a Carriage Examiner was run over by a pilot engine and killed.
- (b.) At Vellore, a Cooly sustained a very severe injury of the head which was smashed. The man died almost immediately. Also a woman, the wife of a Ticket-collector, slipped and fell, fracturing both bones of the right leg. She was transferred to the Civil Dispensary at Vellore.
- (c.) At Arcotum, a Pointsmen died from an injury of a very severe nature, caused by a wheel running over the leg carrying away the calf of the leg from the ham to the heel.
- (d.) At Tripetty, a Gang Cooly sustained an injury to the left foot by an engine wheel passing over it. The man was sent to the General Hospital, Madras.
- (e.) The Cook at the station at Pothanore was run over by a wagon and was sent to the Civil Hospital at Coimbatore, where amputation of both legs was performed by the Civil Surgeon. The man subsequently died.
- (f.) At Cuddapah, two accidents are reported to have occurred. One in the person of a Head Porter whose left foot was smashed by an engine running over it. The man was sent to the Civil Dispensary where he died. Another happened to a Watchman who was run over by the engine of the mail train. This man also died.
- (g.) At Bellary, a simple case of fracture is reported which recovered.

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

(A). At the Cheynar Bridge, while at work two men coolies were killed by the sudden sinking of a cylinder loaded with 700 iron nails.

(t.) The most important and disastrous of all took place at the Paupugnee Bridge on the 18th June 1874 by the trial train running off the line. On this occasion Mr. Robinson and Mr. Haworth met with bruises and cuts, besides receiving a general concussion of the body. At the same time Engine Driver Lem was scalded over the greater portion of his body, extremities, and head, besides meeting with severe cuts on the face. He was brought down to the General Hospital, Madras, for treatment.

Mr. Sauri, a Eurasian, lost his life on the same occasion, and two native Ferozees died subsequently in the Civil Hospital at Cuddispath from the severity of the injuries sustained by them. An account of the accident and of the state of the injured persons was duly forwarded on the 18th June to the Agent and Manager from this office.

3. *Injured Officers.*—The Locomotive Superintendent, Mr. W. Barton Wright, is the only officer of the Company who went home sick during the past year.

4. *Medical Staff.*—This comprises 19 Apothecaries. During the past year two were dismissed for intemperate habits, *viz.*, Messrs J. Pettigrew and H. Seelana, six resigned their appointments, *viz.*, J. Megler, J. Martin, E. G. Satt, J. Stokes, J. West, and W. Watson.

Apothecaries J. Chandi, Rangasawmy Nair, and Bowin have been admitted on the staff to fill the vacancies caused by the removal of the above-named from the service of the Company. Apothecary Pereraul has resigned his appointment and is conducting his duties.

6. *Consuming Establishment.*—No change has occurred in this staff from that of last year. It consists of Inspectors 15, Peons 14, and Toldes 67.

6. *Diua*.—These amount to Rupees 77-3-7; of this sum Rupees 45 were levied on the Apothecaries for purchase of duty, &c. The Writer in this office was fined Annas 8, the Poona Rupees 3-15-9, and the Tehas Rupees 27-11-10, making up the difference between the sum total and the fines on the Apothecaries.

7. *Registration*.—These are covered and covered regularly. There is nothing of special interest in bringing to notice under this head.

8. *Vaccination.*—No cases of vaccination have been reported. This is a matter to which I shall direct my attention in the coming year.

9. *Claims of Medical Officers.*—The only claims against the Company are those brought forward by Mr. Rogers of Combarage of Rupees 45 attendance on Mr. Armstrong, and Rupees 100 for amputation of both legs in the case of the Cook at Pathanote station.

10. *Cost of Medicines*.—I regret to say that the expenditure of medicines amounts to a larger sum than the preceding one, being an increase of Rupees 751.41.3 above that of the year 1873 (2 Rupees 4.06.5). Deducting from this sum the amounts recovered from the families of Europeans from Great Indian Peninsula and Great Southern Indian Railways, the sum of Rupees 3,441.7.4 will be found to have been actually expended for medicines, or at the rate of about Annas 8 for each patient, being in excess of the preceding year by Annas 1 Pie 1. I have it to call to observe, and

It has to be able to show a considerable decrease in the outlay for medicines for the year 1875 by procuring a strong experience over the quantities supplied to the various stations.

11. *Revenues for Medicine*.—These have amounted to Rupees 577-14-8, being made up as follows:—

Supplied to the Legislature	Rs.	A.	P.
Great Southern of India Railway	520	9	2
Great Indian Peninsula	17	1	10
Office collection	8	10	10
	25	8	10
Total	577	14	8

An inspection of the stations was performed in August last by Dr. Vansomeran, and in December last by myself. Reports of these have been duly forwarded.

*Proceedings of the Madras Government, Public Works Department,
10th September 1875.*

MADRAS,
22nd February 1875.

(Signed) E. F. BROCKMAN,
Acting Consulting Physician, M. E. C.

From F. CHURCH, Esq., Chief Auditor, to R. B. ELWIN, Esq., Agent and Manager, Madras Railway Company, dated Madras, 7th April 1875, No. 1,587.

I HAVE the pleasure to submit a report on the Revenue Accounts, &c., for the half-year ending 31st December 1874.

2. Mileage open for traffic was 858 against an average of 851 in the corresponding half of 1873.

3. The traffic, however, was subjected to the following interruptions:—

On the 24th October the Cheyarr and Paupugnes bridges, and on the 25th October the Chittravutti and Pennair, and on the 26th October the Goornattam bridges were rendered useless for the purposes of traffic. On the 5th November the last-named bridge (Goornattam) was made available for traffic, but through communications were not resumed at the other points named until the 18th January 1875. On the 17th November traffic on the Bangalore branch, with the exception of passengers, parcels, and mails was stopped, and was not resumed until 2nd December.

4. Thus, for upwards of two months out of the six, the communications of the North-West Line were so obstructed, as to be useless, comparatively speaking, for the purposes of traffic, whilst the traffic on the South-West Line was considerably interfered with on two different occasions for 10 days and 15 days, respectively.

5. These disasters must have paralysed trade to a very considerable extent; therefore, the following figures will be regarded with considerable satisfaction, inasmuch as a much greater loss was to have been expected under the circumstances.

6. The gross revenue of the half-year was Rs 29,43,828-14-10 against Rs 31,18,042-3-4 in the corresponding half, showing the comparatively small loss of Rupees 1,19,213-4-6 on the half-year.

7. The expenditure was Rupees 19,77,273-2-8 as compared with Rupees 21,05,212-15-1, but it has to be borne in mind that the latter includes a sum of Rupees 2,31,772-9-5 on account of the reconstruction of the Cheyarr bridge. Making a deduction on this account from the expenditure of 1873, and deducting Rupees 52,053-9-9 from the expenditure of 1874, the figures in the two half-years compare thus:—

	RS.	A.	P.
December 1874	19,25,219	3	11
December 1873	18,73,440	5	8

The increase in expenditure in 1874, as compared with 1873, is therefore 2.76 per cent.

8. The net revenue was Rupees 9,71,555-12-2 as compared with Rupees 10,12,829-4-5 in the corresponding half-year; it gives at 1s. 10d. exchange 389,059-5-7 sterling equivalent to a dividend at the rate of 51-15-1 per cent. per annum on the half-year. Taking the whole of 1874 together, the percentage is 51-17-8.

9. The following are the results of our traffic operations in the way of dividend continued from my last report.

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

	Miles open.	Capital raised at 31st December.	Net Revenue.	Equal to per cent. per annum.
	Average	£	£ s. d.	£ s. d.
1868	656	9,748,339	331,217 6 11	3 7 11
1869	690	9,763,765	286,012 19 0	2 18 6
1870	711	9,939,075	233,518 17 10	2 6 11
1871	826	10,161,854	267,608 3 0	2 12 8
1872	Actual	10,155,844	271,945 0 6	2 13 6
1873	Average	10,154,432	271,697 9 6	2 13 6
1874	Actual	10,156,730	191,305 9 5	1 17 8

10. The following table gives the results under each of the four heads into which the revenue is divided:—

	Half-year ending December 1874.	Half-year ending December 1873.	Increase.	Decrease.
	RS. A. P.	RS. A. P.	RS. A. P.	RS. A. P.
Coaching traffic ...	11,99,778 11 6	12,22,473 11 1	...	28,694 15 7
Goods do. ...	16,37,262 13 8	17,77,841 12 4	...	1,40,578 14 8
Electric telegraph ...	11,668 14 7	8,740 4 8	2,928 9 11	...
Sundries ...	1,00,118 7 1	1,07,986 7 3	...	7,868 0 2
Total ...	29,48,828 14 10	31,18,042 3 4	2,925 9 11	1,72,141 14 6

11. The following are the items of goods traffic from which increased revenue above Rupees 5,000 has been derived. For further particulars, see Statement No. 19:—

	Tons.	Amount.
Cotton, D-pressed ...	686	10,458
Fruits and vegetables ...	693	6,975
Gum ...	2,214	8,324
Salt-fish ...	710	5,602
Seeds of all kinds ...	4,209	19,750
Sugar of all kinds ...	427	5,861

12. The falling are the items in goods traffic which show a falling off in revenue above Rupees 5,000:—

	Tons.	Amount.
Betal-nuts ...	334	6,178
Cloths and piece-goods ...	...	12,689
Commissariat stores ...	446	12,236
Cotton, loose ...	208	7,031
Cotton, D-pressed ...	...	7,385
Jaggery ...	568	5,731
Potatoes ...	706	14,161
Raggy ...	2,257	12,464
Rice ...	2,685	27,382
Skins ...	166	10,719
Sundries ...	656	34,728
Timber ...	2,936	20,239
Twist ...	61	13,904

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

13. The following classification of our goods traffic was opened last half-year, and is repeated on this occasion with a comparison of the corresponding period in 1873:—

	HALF-YEAR ENDING DECEMBER 1874.		HALF-YEAR ENDING DECEMBER 1873.	
	Weight.	Amount.	Weight.	Amount.
	MDS. S.	RS. A. P.	MDS. S.	RS. A. P.
Food grains ...	3,226,983 36 1	5,38,551 11 8	3,120,252 36 1	5,49,497 12 0
Articles of domestic consumption ...	614,682 20 1	1,79,265 14 4	601,439 32 1	1,96,227 6 7

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

The statements which accompany the report are the following :—

No. 1.—General Results.

- 2.—Earnings under Coaching and Goods Traffic.
- 3.—Earnings per Mile Open.
- 4.—Passenger Traffic, including Excess Return Fares and Soldiers.
- 5.—Percentage of Numbers and Percentage of Receipts in each Class.
- 6.—Miscellaneous (Coaching.)
- 7.—Goods Traffic (Merchandise.)
- 8.—Weight carried and amount earned per mile open.
- 9.—Material Traffic.
- 10.—Miscellaneous Goods Traffic.
- 11.—Abstract of Expenditure.
- 12.—Return showing the Outwards and Inwards Traffic at each Station for the Half-year ending December 1874.
- 13.—Comparative Statement showing the Quantity and Amount of the Principal Commodities of Merchandise Traffic for the Half-years ending December 1874 and 1873.
- 14.—Statement of Quantity of Merchandise Traffic (mentioning the chief staples) forwarded from, and received at, the Principal Stations during the Half-year ending December 1874.
- 15.—Statement of Mileage of Vehicles for the Half-year ending December 1874.
- 16.—Statement showing the Number and Mileage of Engines and Trains run up and down, distinguishing between Passengers, Goods and Mixed; also between Engines and Trains run for Traffic, Locomotive and Maintenance for the Half-year ending December 1874.
- 17.—Statement showing the Number and Mileage of Passengers, Horses, Carriages and Dogs, the weight (in tons), and Ton Mileage of Merchandise and Materials, &c., for the Half-year ending December 1874.
- 18.—Statement showing the Weight, Carrying Capacity, Number and Mileage of Vehicles run during the Half-year ending December 1874.
- 19.—Comparative Statement showing the Weight and Earnings of the Principal Commodities during the Half-years ending December 1874 and 1873.
- 20.—Statement showing the Locomotive Power for the Half-year ending December 1874.

(Signed) F. CHURCH.

Chief Auditor.

From W. S. BETTS, Esq. Agent of the South Indian Railway Company, to the Chairman and Directors of the South Indian Railway Company, dated Negapatam, 29th April 1875.

I HAVE the honor to submit my usual annual report upon the operations of the Company in India.

The Royal assent to the Act (37 and 38, Vict. Chapter CXXII.) for the amalgamation of the Great Southern of India and Carnatic Railway Companies was accorded on the 18th of July last; but, as I had under my charge the Indian affairs of both Companies during the full period of the year under review, it will be convenient in this report to assume the amalgamation to have taken effect from the commencement of 1874.

The works along the Southern Extension, with the exception of laying rails and fixing of bridge girders, were nearly completed, and the Chief Engineer expects to have the section from Trichinopoly to Madura ready for public traffic by the 1st of July, and to finish this extension throughout by the 1st of November next. Upon the Northern Extension the work was retarded by an unfavorable season, but the Chief Engineer anticipates that the section from Madura to Chingleput will be sufficiently forward by the 1st of August next to admit of its being used for public traffic.

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

During the year the following quantities were executed :—

	Northern Extension C. FEET.	Southern Extension C. FEET.
Earthwork	11,384,585	14,072,704
Bridges	521,606	202,376
Ballasting	4,983,753	191,214

The total capitalized expenditure amounted to Rupees 28,31,820-5-9; the principal portion of which was incurred on account of the construction of the line (earthwork, bridgework, &c.) and for ballasting and permanent way.

The section of line between Chingleput and Conjeeveram has not yet been commenced. In February I submitted to Government a survey and estimate for this work, and in May the detailed land plans and schedules were rendered. The Government of India in August recommended the Secretary of State for India to sanction the construction of the line, but further information has been since called for regarding its traffic prospects, and also regarding the cost of converting the gauge (3 feet 6 inches) of the section between Conjeeveram to Arcotum to the metre standard.

In order to secure economy in working, the Government of India decided in favor of the early conversion to the metre gauge of the entire open line. Negapatnam to Erode, and estimates for this work were prepared and submitted in November last. Sanction has since been obtained to a portion only (Negapatnam to Trichinopoly) of this conversion being at first effected, and the preliminary arrangements for carrying out this work are now in hand. The Government of Madras desire to reconsider the point at which the break of gauge shall take place, and this question will be reopened and determined on its own merits.

Forty-seven consignments of material, inclusive of rolling-stock and general stores, were received at the ports of Madras, Cochin, Negapatnam and Tuticorin, representing a tonnage of 39,266. The operation of landing and afterwards distributing the material up-country was safely accomplished.

The changes in our list of officers during the year were not numerous. They include the addition of Assistant Engineers Messrs. G. Anderson, A. Beeson, C. J. Bond, A. Ellis, and C. H. Nias, and the retirement from the service of Assistant Engineers A. H. Irvine, G. E. Welleley, and J. S. Whitlock. In the Locomotive Department Mr. J. M. Budge was appointed as an Assistant Superintendent. I regret to record a death that of Mr. Fisher, the late Agent of the Carnatic Railway Company. He had to leave India in consequence of severe sickness and died in the Red Sea the day before the steamer reached Suez.

The receipts on Revenue account amounted to Rupees 9,69,746-10-7, and the expenditure to Rupees 4,39,638-8-8; the net earnings were, therefore, Rupees 5,30,068-1-11, and the percentage of working expenses 60.8.

These results, in comparison with the working of the line during the previous year, show a falling off in receipts of Rupees 1,80,165, or of about 16 per cent.; and an increased expenditure of Rupees 11,217, or of about 21 per cent.

The decrease under the heading of Gross Earnings is accounted for by the inclusion in the accounts of 1874 of the receipts derived from the carriage of material transferred to the Nizam's State Railway, an exceptional item of traffic which realized nearly two lakhs of Rupees. The passenger traffic produced Rupees 85,321 less; this reduction is entirely due to the holding in 1873 of the Madras Madam feast (a festival which occurs but once in twelve years), and to this year's accounts containing the traffic arising from two feasts held at Seringapatam, whereas but one Seringapatam feast fell within the year under review.

Excluding feast receipts, the ordinary passenger traffic shows an increase in numbers of 80,700, and in money of Rupees 4,621. The total number of passengers carried was 1,515,633. The third-class passenger fare of 2 pice per mile continues in force. The Consulting Engineer for Railways, when reporting to the Government of Madras on this subject, remarked, "as to the effect of the change in the fare upon the numbers carried, there can be no doubt; but, after full consideration, I am bound to state my opinion that the increase has not proved financially

Proceedings of the Madras Government, Public Works Department,
10th September 1875.

successful, as the small increase in receipts does not cover the additional working expenses." The expediency of revising the existing scale of passenger fares still remains under consideration.

An increase of Rupees 15,307, or of about 5 per cent., was derived from the carriage of merchandize. The following figures give the freight value of the principal commodities carried during the last six years :—

The increased working expenses were principally in the Locomotive and Traffic Departments. The erection of the metre gauge rolling-stock and the approaching extension of the Locomotive Department called for an addition to the supervising staff, and an Assistant Locomotive Superintendent was appointed. Upwards of Rupees 10,000 additional expenditure had to be incurred for repairs to carriages and wagons. The high prices at which fuel ranged caused an extra outlay of Rupees 4,143 on that account, notwithstanding the train mileage was reduced by upwards of 8300 miles.

In the Traffic Department the chief item of increased expenditure was for the use of Madras Railway rolling-stock, the debit for which amounted to Rupees 15,029 against Rupees 10,894 in the previous year.

A reduced charge of Rupees 9,172 appears under the heading of General Charges for the cost of direction in England and of management in this country; this is a debit which varies according to the annual cash expenditure, as distinguished from the value of stores issued upon the Revenue account.

A saving of Rupees 5,000 for special and miscellaneous expenditure is occasioned by the closing of the Fire Insurance Fund.

Nos. 243 & 244. ORDER THEREON, 10th September 1875, No. 2,605.

RAILWAY, No. 27-A.

ORDERED that these reports be forwarded for the information of the Government of India.

2. It is observed from paragraph 5 of the report of the Agent and Manager of the Madras Railway that during the year under review special rates were in operation for the conveyance of, redwood, and carriages, confined apparently to one individual and a firm. This statement is not in consonance with paragraph 18 of the report of the Railway Commission, from which it would appear that special rates on the Madras Railway are never restrictive in their character but are available to the public generally.

3. With reference to the section of the Chief Engineer's report dealing with the question of repair of damages to bridges by the floods of 1874, it is remarked that plans and estimates, based on the suggestions of the Company's Consulting Engi-

near at home, have since been prepared, and that the measures to be finally taken for future security have been remitted for the consideration of the Government of India.

4. The attention of the Board of Revenue will be drawn to the falling off in the salt traffic between Madras and the North-West Line of the Madras Railway, the decrease having been upwards of 700 tons, *vide* paragraph 32 of the Traffic Manager's report.

5. The Honorable the Governor in Council notices with satisfaction from the report of the Chief Auditor of the Madras Railway that, notwithstanding the serious nature of the interruptions caused by the floods of October 1874, the loss of traffic to the Company has been comparatively small.

(True Extract.)

Major-General, R.E.,
Secretary to Government.

To the Consulting Engineer for Railways,
Revenue Department,
Board of Revenue.
