*Proceedings of the Madras Government, Public Works Department,
20th September 1875.*

Read the following :—

No. 1,050.

No. 466.

Note by the Chief Engineer for Irrigation.

THE following estimates for repairs and improvements to the Goriantlapully Anapavany Coontah have been submitted by the District Engineer, Cuddapah :—

Repairs	...	...	...	...	...	...	Rs. 46
<i>Improvements.</i>							
A. Sluice	...	...	...	...	...	...	110
A. Surplus weir	...	...	...	...	...	...	100
							210
Ayaut area...	...	{ Government	...	...	...	Acres	8
		{ Inam	...	...	...	"	2
" assessment..	...	{ Government	...	...	...	Rs.	79
		{ Inam	...	...	...	"	21
Average revenue	...	...	...	...	...	"	62

2. This Coontah or small tank has a catchment basin of three-fourths of a square mile, so it ought to be capable of irrigating the full ayaut area if not more. It has at present no surplus weir and no sluice, and the surplus water being discharged at a cut and the irrigation water taken off in a similar manner no doubt water is wasted. The intended site of the surplus weir has not been indicated, and that of the sluice is vaguely intimated; both should have been clearly shown on the longitudinal section. Slight modifications of the surplus weir have been shown on the plan. The improvements should be charged to Capital. The class to which the tank belongs should have been noted at the head of the estimate. It appears to belong to Class IV., Rained tanks.

GOTACAMUND,
15th September 1875.

(Signed) JOHN MULLINS, Lieut.-Colonel, R.E.,
Chief Engineer for Irrigation.

No. 467.

ORDER THEREON, 20th September 1875, No. 2,716.
