*Proceedings of the Madras Government, Public Works Department,
6th February 1875.*

No. 172. Read the following letter from Colonel F. J. MOBERLY, R.E.,
Superintending Engineer, Chingleput, to Colonel G. W. WALKER, R.E.,
Secretary to Government, Public Works Department, dated 5th January
1875, No. 3,382:—

IN reply to G. O., No. 3,552, 17th ultimo, I have the honor to observe that no
provision is made in the estimate for channels from Chembrumbakum Tank.

2. The irrigation under Red Hill and Cholaveram requires to be regularly
systematized. At present the drainage is intercepted and dams raised across the
channels for minor supply in the most reckless manner.

3. An establishment has been sanctioned for survey purposes, which will be
employed as soon as the state of the country will allow.

No. 173. ORDER THEREON, 6th February 1875, No. 341.

IRRIGATION, No. 8.

RECORDED with the remark that
the absence of special provision for new
distribution channels under the Chem-
brumbakum Tank renders it none the less necessary that the Superintending
Engineer should ascertain what facilities, if any, are needed for bringing the lands,
the irrigation of which has been provided for by the increased capacity of the tank,
under its influence; and that the detailed arrangements for extending the irrigation
under the Red Hills and Cholaveram tanks ought to have been settled long ago.

(True Extract.)

G. W. Walker Colonel, R.E.,
Secretary to Government.

To the Superintending Engineer, Chingleput.

Red Hill and Cholaveram Tanks.—
Letter from the Superintending Engineer,
Chingleput, reporting that the necessary
surveys and levels will be taken for the
formation of irrigation channels under the
Red Hill and Cholaveram Tanks as soon
as the state of the country will allow,
recorded with remarks.
