*Proceedings of the Madras Government, Revenue Department,
19th February 1875.*

No. 234. Read the following Proceedings of the Board of Revenue, dated 2nd February 1875, No. 222:—

Read the following letter from W. S. WHITESIDE, Esq., Collector of North Arcot, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Palmanair, 17th December 1874, No. 668:—

In reply to the Proceedings of the Board of Revenue, dated 14th ultimo, I have the honor to forward, herewith, copy of letter dated 12th instant, No. 2,597, received from the District Engineer, showing what measures have been taken for the temporary restoration of the anicuts therein referred to.

ENCLOSURE No. 1.

From Captain J. PENNYQUICK, R. E., District Engineer, to W. S. WHITESIDE, Esq., Collector of North Arcot, dated Vellore, 12th December 1874, No. 2,597.

In reply to your letter No. 504, of 26th ultimo (despatched on the 9th instant, and received here this morning), I have the honor to state that orders have already been given for the construction of ring bunds across the breaches in the Palar and Ponney Anicuts, and the work will be put in hand as soon as a sufficient quantity of materials are ready.

2. The Chief Engineer for Irrigation has inspected both anicuts in company with myself; the mode of restoration has been determined on, and detailed estimates are under preparation. Application has been made to Government for the services of the additional subordinates required, and advertisements have been issued calling for tenders for the supply of materials. The work of restoration will be pushed on with the utmost vigour, and such temporary works as may be necessary for turning the water into the anicut channels while the work is in progress will be constructed. At present, there is a considerable quantity of water running off through the breaches, but this is of no consequence, as the tanks have already received a full supply. I have every hope that it will be found possible to prevent any material loss of revenue.
