Dated 2.3.1875 ~~196~~.

*Not to be folded or roughly handled*

333/1

*Proceedings of the Madras Government, Revenue Department,*
*2nd March* 1875.

No. 11. Read the following Proceedings of the Board of Revenue, dated 13th February 1875, No. 332, Forest No. 18 :—

Read the following letter from Captain CAMPBELL WALKER, Officiating Inspector of Forests, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Seerady, 11th December 1874, No. 500.

With reference to Proceedings, No. 200-3,014, dated 16th October 1874, I have the honor to report that I think Teak of the kind described by Colonel Beddome can be supplied from our natural Teak forests.

2. Colonel Morgan reports that he could supply 10,000 cubic feet per annum from Mudumallay, and Mr. Douglas believes he could supply 5,000 cubic feet next season from the Anamallay, and could then afford more reliable information as to future out-turn.

Mr. Douglas points out that drawings to scale of the most useful crooks in demand be applied for, of which canvass patterns would also prove useful.

3. I would recommend that application be made for the drawings and patterns, and that Mr. Douglas be instructed to prepare and despatch 2,500 cubic feet, or 50 tons, of Teak of the curves required as a trial consignment.

4. I do not think that it will be necessary to issue any orders regarding the artificial curving of Teak at Nelumbur, as there will probably be an ample supply from our natural Teak forests, whence its removal is advisable, and will apparently be highly remunerative.

---

Submitted to Government, with reference to G. O., dated 30th September 1874, No. 1,243, and with request that the drawings and patterns applied for by the Inspector of Forests may be obtained.

(A true Copy and Extract.)

(Signed) H. E. STOKES,
Acting Secretary.
