No. 41. Read the following Proceedings of the Board of Revenue, dated 15th February 1875, No. 350:—

Read the following letter from H. S. THOMAS, Esq., Collector of Tanjore, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Pundi, 18th January 1875, No. 39:—

WITH reference to the Board's Proceedings, dated 27th July 1874, No. 1,970, I have the honor to report that 160 lbs. of Carolina paddy were supplied to this district by the Superintendent of Government Farms in July 1873 under the authority of the Board's Official Memorandum, dated 21st May 1873, No. 715, and of this quantity, 100 lbs. were given to the Tahsildar of Tanjore, and 30 lbs. to each of the Tahsildars of Mayaveram and Sheally, for distribution among wealthy and respectable mirassidars with the view of making experiments. Anantaramayyar, the late Tahsildar of the Tanjore Taluq, distributed the paddy among three mirassidars* at between 30 and 40 lbs. each. Pundi Vandayar prepared a seed-bed of 128 square yards in Nattangal (paddy nursery) land in the village of Pundi and sowed the seeds. Arunachala Pillai sowed the seeds in a seed-bed of 96 square yards in the village of Rajendram. Chinnasami Mudali sowed 20 lbs. of seed in a Nattangal seed-bed of 120 square yards, and the remainder broadcast in a field of the extent of 1,344 square yards. The seeds sown broadcast by Chinnasami Mudali failed entirely, as likewise the seeds sown in the Nattangal land, owing to failure to transplant the seed-plants, the quantity of outturn being only $34\frac{1}{8}$ lbs.

* Pundi Vandayar, Rajendram Arunachala Pillai, and Ramapuram Chinnasami Mudali.

Pundi Vandayar and Arunachala Pillai transplanted the plants in fields of the area of 960 and 900 square yards respectively. The outturn of the former was $136\frac{1}{2}$ and of the latter $113\frac{3}{4}$ lbs.

Anantaramayyar, the late Tahsildar of Tanjore, who had undertaken to conduct the experiments, having died in April last, the Deputy Collector, Tanjore Division, reports that he is unable to furnish more detailed information regarding them.

The experiments made in the Mayaveram and Sheally Taluqs were utter failures. The available information regarding these experiments is given in the accompanying statement.

The experiments were evidently not conducted with any intelligence or interest, and no reliable conclusions can, therefore, be drawn from them. The mirassidars, as a general rule, evince but little interest in these matters. The subject, however, has now been taken up by the Native Association at Mayaveram, and from their efforts the Head Assistant Collector expects useful results.

ENCLOSURE No. 1.—Statement showing Results of Cultivation of Carolina Paddy.

SUBMITTED to Government in continuation of Board's Proceedings, dated 9th December 1874, No. 3,565.

2. The information given is very meagre, and, as remarked by the Collector, the experiments were evidently not conducted with any care.

Carolina Paddy.—Ordering to forward to the Government of India Proceedings of the Board of Revenue on report of the Collector of Tanjore on the experiments made with — in the district.

No. 350.

PROCEEDINGS OF THE BOARD OF REVENUE, dated 15th February 1875.

Read the following letter from H. S. THOMAS, Esq., Collector of Tanjore, to J. GROSE, Esq., Secretary to the Board of Revenue, dated Pundi, 18th January 1875, No. 39:—

WITH reference to the Board's Proceedings, dated 27th July 1874, No. 1,970, I have the honor to report that 160 lbs. of Carolina paddy were supplied to this district by the Superintendent of Government Farms in July 1873 under the authority of the Board's Official Memorandum, dated 21st May 1873, No. 715, and of this quantity, 100 lbs. were given to the Tahsildar of Tanjore, and 30 lbs. to each of the Tahsildars of Mayaveram and Sheally, for distribution among wealthy and respectable mirassidars with the view of making experiments. Anantaramayyar, the late Tahsildar of the Tanjore Taluq, distributed the paddy among three mirassidars* at between 30 and 40 lbs. each. Pundi Vandayar prepared a seed-bed of 128 square yards in Nattangal (paddy nursery) land in the village of Pundi and sowed the seeds. Arunachala Pillai sowed the seeds in a seed-bed of 96 square yards in the village of Rajendram. Chinnasami Mudali sowed 20 lbs. of seed in a Nattangal seed-bed of 160 square yards, and the remainder broadcast in a field of the extent of 1,344 square yards. The seeds sown broadcast by Chinnasami Mudali failed entirely, as likewise the seeds sown in the Nattangal land, owing to failure to transplant the seed plants, the quantity of outturn being only 34⅛ lbs.

* Pundi Vandiar, Rajendram Arunachala Pillai, and Ramapuram Chinnasami Mudali.

Pundi Vandayar and Arunachala Pillai transplanted the plants in fields of the area of 960 and 900 square yards respectively. The outturn of the former was 136½ and of the latter 113¾ lbs.

Anantaramayyar, the late Tahsildar of Tanjore, who had undertaken to conduct the experiments, having died in April last, the Deputy Collector, Tanjore Division, reports that he is unable to furnish more detailed information regarding them.

The experiments made in the Mayaveram and Sheally Taluqs were utter failures. The available information regarding these experiments is given in the accompanying statement.

The experiments were evidently not conducted with any intelligence or interest, and no reliable conclusions can, therefore, be drawn from them. The mirassidars, as a general rule, evince but little interest in these matters. The subject, however, has now been taken up by the Native Association at Mayaveram, and from their efforts the Head Assistant Collector expects useful results.

ENCLOSURE No. 1.—Statement showing Results of Cultivation of Carolina Paddy.

SUBMITTED to Government in continuation of Board's Proceedings dated 9th December 1874, No. 3,565.

2. The information given is very meagre, and, as remarked by the Collector, the experiments were evidently not conducted with any care.
