REMARKS.—(a.) The amount of water-rate calculated at 6 rupees on the extent exhibited in Column 2 under first crop does not tally with the total amount of water-rate in Column 4, owing to the operation of G. O. No. 154, dated 7th February 1874, in this Fasli and the inclusion of water charges for hotel gardens.

(b.) The same difference is visible under these heads, owing to the inclusion under them of the extent irrigated in the periods concerned.

(c.) A like difference is observable under these heads, firstly, because the late Deputy Collector appears to have found at his inquiry less number of floodings to have been used by crops than those given in the accounts by Curram, and to have charged accordingly, and, secondly, because of the operation of G. O. No. 154, dated 7th February 1873.
