the results of
the experimental
cultivation of
Manilla tobacco

2. Samples of produce are sent separately by Banghy post.

3. This report would have been submitted earlier but that the seed could not be sown for 7 or 8 months after its receipt, and that the growth and curing of Tobacco takes nearly a year.

4. The delay in sowing may account for the results not being better as regards quantity of produce. As to the quality of tobacco in the leaf I am not able to offer an opinion.
