6/544

Dec 907/75

3. The detailed statements of the Godavery and Kistna Deltas, and the similar statements for all other systems of Irrigation or large individual works for which separate Capital and Revenue Accounts are to be kept, which are under preparation by the Revenue Officers, will give for the year the gross revenue derived from the works. This gross revenue will be reduced to net revenue by the deduction of charges, and there will then be for the particular tracts of country affected—

1st.—The gross revenue, charges and net revenue for a series of years prior to the commencement of the extensive improvements, the result of which is to be ascertained and recorded, and the averages will form the standard comparison.

2nd.—Similar information for the years subsequent to the investment of Capital in improvements.

The difference between the average net revenue of the first series of years, and of any subsequent year, will be the profit of that year and between the former and the total net revenue of the second series, the total profit.

The effects of Capital outlay and the return it may have secured in each case will then become apparent, as also the absolute profit after covering the interest on Capital sunk.

4. No steps can be taken towards the determination of profit until the standard of comparison in each case shall have been settled, but in the meantime the net revenue of each year can be worked out, as also the Capital expenditure up to the close of each year, and then when the Board of Revenue have prepared and submitted the returns on which the computation of standard net revenue will be made, the results will be readily ascertainable.

5. Looking to the great importance of the subject in itself, and to the desire expressed by the Government of India that every endeavour should be made to complete the Capital and Revenue Accounts as soon as possible, the Board of Revenue will be desired to report what steps have been taken in the case of each work or system, for which such accounts are to be kept, to prepare the statements for the series of years from which the standard revenue is to be determined, what progress has been made, and when these statements will be finished and submitted; also when statements, like those furnished for the Godavery and Kistna Deltas for Faslies 1281 and 1282, will be furnished for each of the other works, and, lastly, when the statements for the intermediate years are likely to be ready. The Government consider that it will be necessary to inform the Government of India, as early as may be possible, when the information required will be forthcoming, first for each work in particular, and generally for the whole Presidency.

6. It is observed that only the review by the Chief Engineer for Irrigation of the statements of the Godavery Delta furnished by the Board for Fasli 1282 has been printed in Public Works G. O. of the 13th November 1874, No. 3,219. The detailed statements will now be printed as an appendix to those Proceedings as they are required for the exhibition of important particulars other than area and water-rates, and in future all such Revenue statements will be embodied in the Proceedings of Government as was done for the Godavery Returns of 1871-72, and those of the Kistna for that year and 1872-73.

7. The Controller will observe that the Revenue statements of the two deltas for the years referred to cannot be finally adopted in the accounts until the explanations called for have been received and disposed of, neither can it be now stated what amount should be taken as the gross revenue of the year for each delta, as it will depend upon the detail in which the returns for the first series of years may be prepared in what way the revenue and profit of recent years will have to be deduced.

(True Extract.)
