The Government sees no objection to
the course proposed, which is, in many
respects, desirable.

resolve to refer the matter to the Commis-
after communicating with the Superin-

trust.)

Signed)

A. MACGREGOR,

Acting Secretary to Government.

Portsmouth.
19 June 1878.

Sir, I have the honor to inform
you that I have prepared
the apparatus formerly used
by the Govt. Geologist & find
that much of it could be profit-
ably employed by myself & the
Laboratory upon illustrating
my chemical physics
lectures. The apparatus is
not likely to find any further
application here, as it can be
employed only by one skilled
in the use of it. In a very
short time, it will be used by the
Laboratory for a great number of
experiments. I am, therefore,
very glad to see it
in the hands of the
Govt. Geologist.

Collyer, when in addition to being
of use, it will meet with the same
care & attention. The apparatus
is of a very delicate & fragile
nature, & unless packed with great
care would suffer greatly in transit.
It would require the attention
that I should personally super-
intend its packing. I shall
therefore be in great haste
to receive your excellency's
reply on this subject, as I am en-
gaged to return to Madrid in
a week. Should you ex-
celency therefore interpose
my respects I am obliged to
you & suggest that your excellency
should request me to be
rejoined as soon as possible.
The Government purchased
for Mr. Brown the set of
instruments of which I have
been in possession of some
of them from the office of

Regency of which
I would suggest that I should be
allowed to at the same time
be authorized to make arrange-
ments for forwarding them to
Madrid with the apparatus.
In conclusion I would add
that I submit the above
proposals for your excellency's
consideration with the entire
approval of Mr. P. J. Est.
I have the honor to remain

Sir
Yours most obedt. servant
William H. Miller

Prof. Dr. Schumacher is a genuine
genuine professional. He would rather be
a student. *Dr.*

Aggravating with the applicative formulae
used by the 1st. Periodicist, may be their
simplex, his change at the 2nd. Step, also that he
may be allowed the use of the descriptive books
frequently for the 1st. Periodicist.
