*Proceedings of the Madras Government, Revenue Department,
31st October 1876.*

No. 285. Read the following Proceedings of the Board of Revenue, dated 24th October 1876, No. 2,649:—

Read the following letter from J. H. MASTER, Esq., Collector of Bellary, to H. E. STOKES, Esq., Acting Secretary to the Board of Revenue, dated 23rd October 1876, No. 391, 343, dated the 9th ultimo, I have the honor to forward copy of a further report on the Pennacondah Taluq received from the Head Assistant Collector, Mr. Ross.

2. The Board will observe his statement that the Bookapatnum tank ran dry in the second week of September. This shows what an utter absence of rain there has been in the Mysore plateau. The river Chitrautty runs through this tank into that at Dhurmavaram, and neither of these tanks have failed for a long time.

3. Mr. Ross reports that as yet grain supplies in the large markets are plentiful. It is true that Pennancondah lies at a distance from a railway, but I hope that when local supplies fail they will be attracted from Bangalore as also from Gooty and Tadpatry in the North-west Line.

4. I have authorized Mr. Ross to make the tools he says he requires, as also to open relief-houses for the distribution of cooked food to the aged, infirm, and to the very young when the necessity arises.

5. The works proposed by him appear to have been judiciously selected.

ENCLOSURE No. 1.

From H. T. ROSS, Esq., Head Assistant Collector, to J. H. MASTER, Esq., Collector of Bellary, dated Hindupur, 16th October 1876, No. 268.

I HAVE the honor to inform you that I have just completed a tour through the eastern and southern portions of Pennacondah Taluq, and beg now to report on the same as promised in paragraph 2 of my letter, No. 223, dated 2nd September 1876.

2. I regret to say that distress requiring relief prevails everywhere except at Kapalbanda and Brahmenapally and along the river Wuntaperu at Nidamamedy, Kottapally, Settypally, Bundlapally, Potalcoota, and Mallelampally.

3. The existing distress is marked by all the usual features, and, having been continued for some time, has become intensified, so that the condition of the whole taluq is now much worse than was that of the western portion at the time of my former report. In the south the distress is more serious than in the east. The poorer people of the southern villages have been for some time living mainly on the "Yetharaku" and a tolerably pleasant root called "Kunkaragadda," but the supply of these is exhausted, and they are now reduced to eating a root called "Thilagadda," which is not nutritious and causes great irritation. When this too is exhausted, there will be nothing between the people and starvation except our relief works, many of which I have therefore commenced without waiting for your approval. In the east there are cases in which immediate rain might save a fourth of the dry crops sown in July and August, but in the south nearly all have withered, past saving. Much raggi has been sacrificed for sugarcane where there was an insufficiency of water for both, and much more has been lost owing to the complete drying up of what water-supply there was. Although a small supply was received a few weeks ago in many of the southern tanks, it was of no use to the crops. What raggi has come to ear is being reaped, and the yield averages from one-fourth to one-eighth of the usual outturn, but the extent so far successfully cultivated is so small that the harvesting has afforded little or no work to the cooly classes. Under the Bookapatnum tank, which ran dry in the second week of September,

there is a fine spread of paddy cultivation now in a perilous state, the only chance of saving it being an immediate supply, which there is little hope of. Among the hills in the east there has been sufficient pasture to keep off death among the cattle, but the people complain that the large numbers of being driven into the taluq from the adjoining part of Cuddapah are dying from lack of the water supply. In the south cattle have been relieved of what was at wells be sunk. I have, therefore, had to include many such in my list of relief works though the amount of direct relief they may afford will of course be insignificant. The price of raggi and cholam has risen since my former report from 16 to 11 seers per rupee, and the pressure thus caused is now being felt by many classes, e.g., Wudders, Kapas, Weavers, Tailors, Mussalmans, Setty Baljas, who were not seriously inconvenienced at that time. I took this opportunity of revisiting Brahmamudrum, Mondli, and one or two other villages included in my former report, and I found that the young dry crops I was then hopeful about had since failed hopelessly; many of the poorer cultivators are already seeking relief. The distress has developed rapidly, and matters are becoming more serious every day, for there is not the slightest sign of the north-east monsoon yet. Luckily there is still plenty of grain coming into the local markets, and all we have to do is to put money into the hands of the people, but when once the failure of the north-east monsoon becomes certain, as it is likely to be very soon now, there is sure to be a general collapse. The grain still going (though in diminishing quantities) from private stores to the markets will then be held back, and I beg respectfully to urge that you may be prepared with a scheme of importation which can be put into operation at very short notice, for I am very far from the railway and can look to no supplies from the adjoining districts, which are also, I believe, in distress.

4. The pressure is now so general that I am compelled to open relief works at all points of the taluq. I am making a separate reference regarding the strengthening of the taluq staff, which has now become necessary for the supervision of so many works. It will be clear from the sketch map (Enclosure No. 3) and the last column of Enclosures Nos. 1 and 2 that the list of relief works (Enclosure No. 1) will completely meet the wants of the southern and eastern portions of the taluq for some time to come. Where more works than one are provided for any village or villages, it will be understood that they are to be undertaken successively. As the District Engineer says, he has no money in his budget grant for irrigation repairs, and, as you have expressed your opinion that such works are the best I can do myself, I have included several of them in my present scheme. They are all simple earthworks. I have also added to this list some works which are required for further relief in the west of the taluq. There has been no time to frame estimates for all these works, and most of the figures are rough guesses after personal inspection of the several localities. The chief object held in view has been to meet all the real requirements of the taluq, but, if the works now selected do not provide work for a sufficiently long period, I will submit further proposals in good time. The total amount for which sanction is now required is Rupees 31,840, of which I request you will be good enough to send Rupees 5,000 to the Tahsildar for the present.

5. As the number of works increases, the greatest difficulty we have to contend with here is the provision of tools. Very few of the distressed laborers have anything except baskets; there are not many local fund tools, and the Public Works Department cannot lend me many. As the numbers on our relief works are increasing daily, it will be necessary to supplement what we are able to borrow by purchasing a considerable quantity, and I therefore request your early sanction to purchase tools to the amount of Rupees 500 in each taluq if necessary. The tools can be made by local ironsmiths.

6. I had nearly omitted to mention that there are now large numbers of aged and infirm persons in distress who are being fed by organising local charity, but, if the north-east monsoon fails, we cannot expect this charity to be continued much longer in all cases, and it will be necessary to institute Government relief-houses in the different taluqs. I, therefore, request

Proceedings of the Madras Government, Revenue Department,
31st October 1876.

that I may be authorized to open relief-houses whenever the time arrives at which we must do so without making any further reference to the fact.

Statement of relief works proposed for the Eastern and Southern portions of Penukonda Taluk with additional works for the continuance of relief in the Western portion.

No. of work	Description of works & length of road locality &c.	Probable cost	Source from which funds are to be provided.	Whether estimates have been proposed and sanctioned with the date & number of order.	By what agency the execution of the work is to be supervised.	Estimated number of people requiring employment in the locality and number & period for which each work will provide labour.	Remarks.
1	2	3	4	5	6	7	8
1	Byrapuram. Repairing tank & bund.	200	Special relief fund	Estimate sanctioned by Government	Revenue Department	80 persons labour for 80 persons for about a month calculating at an average wage of $1\frac{1}{2}$ annas per labourer	For the relief of Byrapuram and 2 hamlets (80)
2	Jagarazpalli. Repairing Supply Channel	200	do.	do.	do.	150 persons labour for 150 persons for about 15 days and so on	For the relief of Jagarazpalli and hamlet (150)
3	Improving track from Reddappalli. Cocheru road near Jagarazpalli to Penukonda. Boskapakam road near Byrapuram 4 miles	600	do.	do.	do.	230 persons labour for 100 persons for about 2 months	For the relief of Jagarazpalli (150) and Byrapuram (80). This is the present route by which traffic goes on between Reddappalli and Penukonda: the track is much needed and is now in very bad order.
4	Improving track from	1200	do.	do.	do.	890 persons labour for 200 persons for about 2 months or 400 for 1 month and so on	For the relief of Ramapuram & 3 hamlets (80) Kondam pulli (20) Chinnampalle (100) Chinnampalle (30) and perhaps Chinnampalle & 3 Inazras (200) & Yerramanthi (300). There is an existing track in considerable use and it has been found difficult to devise any other sufficient work for the relief of these villages which are undoubtedly in distress.
5	Locherla. Repairing Channel	200	do.	do.	do.	200 persons labour for 200 persons for about a fortnight	For the relief of Locherla & hamlet Shamprast (200)
6	Shamprast. Filling pits	200	do.	do.	do.	do.	do.
7	Improving track from Locherla to Talamerla 3 miles	450	do.	do.	do.	550 persons labour for 200 persons for about 3 weeks	For the relief of Locherla & hamlet (200) Maracountapalli (20) and Talamerla & hamlets (250). This is the line of traffic from Mysore & Chinnampalle via Reddappalli to Chinnampalle & Bellary the road via Cocheru and Chinnampalle being not much used.
8	Cotta cheru Filling tank & ditch	400	do.	do.	do.	400 persons labour for 200 persons for about a month	For the relief of Cotta cheru and hamlet (400)
9	Improving track from Cotta cheru via Chinnampalle to Gostoor 9 miles	1350	do.	do.	do.	1150 persons labour for 500 persons for about a month	For the relief of Cotta cheru & hamlet (400) Chinnampalle & hamlet (200) Gostoor & hamlets (200) Yerramanthi and hamlets (300) Maracountapalli (100) Locherla & hamlets (200) Mos Rajpalli (50).
10	Talamerla Filling tank & ditch	150	do.	do.	do.	250 persons labour for 100 persons for about a fortnight	For the relief of Talamerla & Inazras (250)
11	Chinnampalle enlarging a well	150	do.	do.	do.	200 persons	For the relief of Chinnampalle & Inazras (200). Doubtful as a relief work but necessary to supply water to the village.
12	Gostoor						Inazras (200)
13	Maracountapalli						Chinnampalle (100)

10	Maachanurva & Thunimadugu to Gostoot 9 miles	1000					1450 persons. Labour for 500 persons for about a month	For the relief of Cotta chenna & hamlet (400) Am & hamlet (200) Gostoot & hamlets (200) Yerram hamlets (300) Maracountaputti (100) Socila & Mos Rajaputti (50).
11	Talamarla. Filling Fort Ditch	150	0°	0°	0°	0°	250 persons. Labour for 100 persons for about a fortnight	For the relief of Talamarla & Amazaras (250)
11	Thunimadugu enlarging a well.	150	0°	0°	0°	0°	200 persons.	For the relief of Thunimadugu & Amazaras (200) & a relief work but necessary to supply water to the the poor. Amazaras & Gostoot.
12	Gostoot. Filling pits	250	0°	0°	0°	0°	200 persons. Labour for 200 persons for about a fortnight	For the relief of Gostoot & Amazaras (200)
13	Maracountaputti. Repairing Supply Channel	200	0°	0°	0°	0°	200 persons. Labour for 200 persons for about fortnight.	For the relief of Maracountaputti (100)
14	Myhasannudram 0°	200	0°	0°	0°	0°	50 persons. Labour for 50 persons for about 2 months	For the relief of Myhasannudram (50)
15	Pentatagiri paliam. Filling ditch	200	0°	0°	0°	0°	375 persons. Labour for 100 persons for about a month	For the relief of Gostoot & Amazaras (200) Gostoot & Duddebanda (150)
16	Kesapoor. Repairing supply channel	200	0°	0°	0°	0°	60 persons. Labour for 60 persons for about 3 or 4 weeks	For the relief of Kesapoor (60)
17	Kodapaganaaputti 0°	200	0°	0°	0°	0°	60 persons	For the relief of Kodapaganaaputti & hamlet (30) Tirumaladevaraputti & hamlet (30)
18	Gollay. Sinking a well	150	0°	0°	0°	0°	150 persons. Labour for 100 persons for about fortnight	For the relief of Duddebanda & hamlets (150) but as a relief work. It is necessary to supply water at Gollay. The poor here have also works at 9 & 15 to go to. etc. to be found at Duddebanda itself.
19	Lingaredelipully. Sinking a well	150	0°	0°	0°	0°	50 persons. Labour for 50 persons for about a month	For the relief of Lingaredeliputti (50) & necessary supply water.
20	Bookapattam. Filling Fort Ditch	150	0°	0°	0°	0°	550 persons. Labour for 200 persons for about 8 days.	For the relief of Bookapattam & hamlets (400) Kamin (100) Lingaredeliputti (50)
21	Improving track from Bookapattam to Vengalcheru 5 miles	1500	0°	0°	0°	0°	900 persons. Labour for 500 persons for about a month	For the relief of Bookapattam & hamlet (400) Kamin (100) Pottipatty & hamlets (150) Yerrimalaputti (50) & chenna & hamlets (200) Lingaredeliputti (50)
22	Yerrimalaputti. Repairing Supply Channel	200	0°	0°	0°	0°	50 persons. Labour for 50 persons for about a month	For the relief of Yerrimalaputti (50)
23	Road from Bookapattam to Pandurati 14 miles	2800	0°	0°	0°	0°	1200 persons. Labour for 600 persons, for about 2 months	For the relief of Bookapattam & hamlets (400) Kamin & hamlets (110) Gostoot (40) Maracountaputti (30) Mangalamadaka and hamlet (30) & hamlets (400) Kaminettiiputti (100) Lingaredeliputti (50)
24	Siddharampuram. Repairing tank bund	150	0°	0°	0°	0°		Siddharampuram & hamlets (110)
25	Gostoot. Road from village to main road 1/2 mile	40	0°	0°	0°	0°		Gostoot (40)
26	Improving track from Chundarayanaiputti to Cotta chenna 3 miles	500	0°	0°	0°	0°		Siddharampuram & hamlets (110)
27	Mangalamadaka. Repairing Supply Channel	200	0°	0°	0°	0°		Mangalamadaka & hamlet (30)
28	Improving track from	1350	0°	0°	0°	0°		Chundarayanaiputti & hamlet (40) Yerrimalaputti (50) Pandurati & hamlet (30)

						persons for about 3 weeks.	
25	Goompully. Road from village to main road 1/2 mile - 83	40	0.	0.	0.	40 persons	For the relief of Goompully (40)
26	Improving track from Chundarayanaipulli to Cottakota 3 miles	500	0.	0.	0.	310 persons. Labour for 200 persons for about a month	For the relief of Sildarampuzam & hamlets (110) & hamlets (200)
27	Mangalamadaka. Repairing Supply channel	200	0.	0.	0.	30 persons Labour for 30 persons for about 3 months	For the relief of Mangalamadaka & hamlet (30)
28	Improving track from Kailakota via Yalakuntla Marala to Pandurthi 9 miles	1350	0.	0.	0.	580 persons Labour for 250 persons for about 2 months	For the relief of Kailakota & hamlet (40) Yeil & hamlet (60) Marala & hamlets (30) Pandurthi & (400) Mangalamadaka & hamlet (30)
29	Improving track from Kristinapure to Pandurthi 8 miles	800	0.	0.	0.	480 persons. Labour for 200 persons for 6 weeks	For the relief of Kristinapure & hamlets (20) & hamlets (30) Mangalamadaka & hamlet (30) Pandurthi & hamlets (400).
30	Pandurthi. Filling ditch & pits	200	0.	0.	0.	400 persons. Labour for 200 persons for about a fortnight	For the relief of Pandurthi & hamlets (400)
31	Improving track from Pandurthi via Agraharam to Cottakota 4 miles	1000	0.	0.	0.	650 persons. Labour for 400 persons for about a month	For the relief of Pandurthi & hamlet (400) Agrah & hamlets (150) Cottakota & hamlets (200).
32	Cottakota. Sinking a well	100	0.	0.	0.		Necessary to supply water to Cottakota
33	Karasinipully. Sinking a well	150	0.	0.	0.		Necessary to supply water to Karasinipully.
34	Road from Samandapulli to Chembloos as far as Pankanda Taluk frontier 10 miles	5000	0.	Estimated amounting to Rs. 71000 and sanctioned by Govt. (reference not in Camp)	0.	1070 persons. Labour for 500 persons for about 3 months.	For the relief of Samandapulli & hamlets (300) Pandurthi & hamlets (200) Magecheruvu (100) Echal Ballapuram (100) Chulkoor & hamlets (150) Katgancheruvu & hamlets (100) Zoolpanta (70)
35	Improving track from Samandapully to Jakkalcheruvu 15 miles	2250	0.	No Estimate sanctioned by Government.	0.	About 1700 persons. Labour for 500 persons for about 6 weeks	For the relief of Samandapulli & hamlets (300) Pungay (50) Magecheruvu (100) Samipalli (30) Adalakatap (200) Cogira (200) Boorampully (50) Camblapully (50) Camblisannuram (50) Jakkalcheruvu (50) Shalapuram (50).

Revenue Department

Proceedings of the Board of Revenue
Dated 24th October 1876.

Read the following
No. 391.
From the Collector of Bellary.
To the Secretary to the Board of Revenue.

Sir,

In continuation to my letter No. 34.
dated the 9th ultimo I have the honor to
forward copy of a former report on the
Punnacondah Taluq received from the
Jd. Asst. Collector, Mr. Ross.
2. The Board will observe his statement
that the Boorkapatnam tank
in the second week of September. It
shows what an utter absence of rain there
has been in the Mysore plateau.
The river Chittavaty runs through this
tank

tank into that at Dhurmararum
and number of these tanks have
failed for a long time.

3. Mr. Ross reports that as yet
in supplies in the large markets
plentiful. It is true that
in arondah lies at a distance from
Railway, but I hope that when
local supplies fail they will be
attracted from Bangalore as also
from Gooty and Tadpatry in the
Northwest line.

4. I have authorized Mr. Ross to
make the tools he says he requires,
as also to open relief houses
for the distribution of cooked food
to the sick, infirm, and to the very
poor when the necessity arises.

The works proposed by him
appear to have been judiciously
selected
