*Proceedings of the Madras Government, Revenue Department,
6th November 1876.*

No. 63. Read the following Proceedings of the Board of Revenue, dated 4th November 1876, No. 2,743 :—

Read the following letter from F. R. H. SHARP, Esq., Acting Collector of Nellore, to H. E. STOKES, Esq., Acting Secretary to the Board of Revenue, dated 31st October 1876, No. 3,038 :—

IN continuation of my letter, No. 2,998, of 27th instant, I have the honor to forward herewith an application* from the Acting Sub-Collector for a sum of Rupees 0,000 for expenditure on relief works in the Kandukur Taluq together with extracts of a letter from the Range Officer to him on the subject. It will be observed that Mr. Ottmann asks for relief only for the western part of the taluq. The Tahsildar in an arzi to Mr. Hardinge, commenting on Mr. Ottmann's letter, asks for relief works all over his range, but I do not think there can be necessity for such works in the eastern portion, judging both from Mr. Ottmann's report and other information I have received from time to time. There is the usual business connected with the coast and the maintenance of the Trunk Road to give employment, though I gather but little is spent on the latter, apart from collecting material, on account of the want of rain and water.

2. I am asking Mr. Hardinge to send further information about the Kandukur Taluq, and, as there may be necessity for emergent expenditure in the western part, should he be convinced of pressing need for the same. The works which appear to be most suitable, should necessity arise, are the following, which may all have Pokoor as their centre, a village some six miles south-west of Kandukur Cusbah. The works would be central for that part of the taluq most likely to suffer :—

- (1). Road from Kandukur to Chundy *via* Pokoor; the distance from Chundy to Pokoor is about ten miles; total length about sixteen miles.
- (2). Road from Pokoor to Lingasamudram, about nine miles.
- (3). Deepening and banking north supply channel of Pokoor Tank.

These works would be carried out under the Sub-Collector by the Tahsildar with the advice of the Public Works Department.

I would take them up in the order in which they stand. They are all useful works which would be carried out in due course under ordinary circumstances. I request that the sum sanctioned may be considered as separate from that allotted for relief works in the principal division.

3. I may note here that the general condition of the district is at present as follows :—

The prices of food-grains are very high, and the grains are offered sparingly in

The latest prices are as follows in Nellore bazaar :—

	SEERS.
Rice, 1st sort, per Rupee	8½
Do. 2nd do. do.	9½
Paddy, 1st sort, do.	17½
Cholum do.	11
Baggy almost, if not quite, unprocureable from time to time, per Rupee	11

the market. The ordinary coolies have now been more or less without work for the three or four months during which they might have expected to have had an opportunity of earning enough for their support; consequently from every part of the district is coming the complaint of people being without food for two or three days and the call for relief works. I have

*Proceedings of the Madras Government, Revenue Department,
6th November 1876.*

been extremely reluctant to encourage a cry of famine or to ask for funds for relief works unnecessarily, but we have arrived at the point where the holding off of the north-east monsoon for a week or two longer may cause actual distress and risk of starvation amongst the poor in parts of the district hitherto considered in a fairly prosperous condition.

4. I apprehend it is the wish of the Board and of Government that on no account should any one be allowed to die of starvation as far as district officials can prevent such a calamity; and that wherever there is a risk of such a calamity occurring relief should be afforded by Government funds spent chiefly in the way of providing work. That is being furnished, as the Board are already aware, in the Kavali, Atmakur, and Udayagiri Taluqs, and sanction is being asked for giving it in Kanigiri and Kandukur. But from all the information I am able to gather, derived from various sources, we are in the verge of risk of such a calamity in the south-west of the district, and I intend submitting proposals in detail for that part in the course of a day or two.

5. I may add that the symptoms indicative of an impending break of the rain-fall of the north-east monsoon, of which I wrote hopefully in my letter, No. 2,998, of the 27th instant, have all passed away, and our sky is bright and cloudless. Should the rain-fall commence soon of course for the time the necessity for relief works would immediately cease, and this is being borne in mind in the carrying on of the different works.

ENCLOSURE No. 1.

From T. VON D. HARDINGE, Esq., Acting Sub-Collector of the Nellore District, to F. R. H. SHARP, Esq., Acting Collector of the Nellore District, dated Podily, 28th October 1876.

I HAVE the honor to enclose an Arzi (to be returned), received this day from the Kandukur Tahsildar, and a letter, No. 502, of the 17th instant, from Mr. Ottmann, and to request that a sum of Rs. 10,000 be placed at my disposal in the Kandukur treasury for the relief road works mentioned in the above communications.

2. The Range Officer will be requested to supply tools to the gangs at work on the roads, and to direct his subordinates to assist in supervising the actual operations of the coolies employed.

3. I will address you on the subject of the other relief works mentioned by the Tahsildar hereafter.

From S. OTTMANN, Esq., Sub-Engineer in charge of Northern Range, to T. VON D. HARDINGE, Esq., Acting Sub-Collector of Nellore, dated Ongole, 17th October 1876, No. 502.

I THINK the time has arrived for starting "relief works" without further delay in the Kandukur Taluq also (you have already determined for Kanigiri), for the poor are suffering very very badly, and cattle are faring worse. I have been over the greater portion of the taluq; the indications of suffering and distress are unmistakable.

2. I would commend the following public works being undertaken in the taluq, besides repairs and clearings of existing ponds and such like "village works" which the Tahsildar should be left to determine in each case to the best of his judgment:—

Proposed road from Kandukur to Goodlore (to meet the proposed line from Titto via Lingasamudram to Pamore) via Mopaud and

Note by Collector.—Through a difficult line of country.

Machavaram.

*Proceedings of the Madras Government, Revenue Department,
6th November 1876.*

Proposed road from Kandukur via Pokoor to Chundi.

Note by Collector.—Partly in Ongole Taluq. Proposed road from Ongole via Kongadoo and Kondapy and Putchona, to join Oolapalliem road about Venkoopalliem. This line has been recently marked out from Ongole to Putchona.

Deepening and banking Pokoor large tank north supply channel (which must be done sooner or later).

Improving Vellatore tank to render it capable of producing wet cultivation under it.

Making short branch road from Mopaud to tank-bund to join the Kandukur and Goodlore line.

Deepening the gunta of Kondamutusoopalliem on north-east corner of village. This last is a village-work.

3. I do not consider any relief works along the coast line necessary just now. There will, I doubt not, be found many "village works" that might be taken up if necessary. I would commend branch roads from Koradoo to trunk road and upon Pakala to trunk road about this particular locality as "relief works" should such be started.

SUBMITTED for the information of Government.

2. The Board doubt the necessity, and would decline to sanction relief works in Kandukur at present. The northern portion of the taluq is well off, and there are relief works in operation in Kavali Taluq close to the south-west side of Kandukur. The Collector will report the prices prevailing at Kandukur and in the distressed villages.

Proceedings of the Board of Revenue

Dated 4th November 1876.

Read the following:-

No-3038.

No-27431-

From.

F. R. H. Sharp Esq.

As Collector of Bellary

To H. E. Stokes Esq.

As Secretary to the Board of Revenue
Mysore

Sir,

In continuation of my letter No 2498
of 27th instant, I have the honor to forward
herewith an application from the Acting
Sub Collector for a sum of Rs 10,000 for
expenditure on relief works in the Kankankur
Taluk together with extracts of a letter from
the Range Officer to him on the subject. It
will be observed that Mr. Ottumman asks for
relief only for the western part of the Taluk.
The Tahsildar in an Arzi to Mr. Hardinge
commenting on Mr. Ottumman's letter, asks
for relief works all over his range, but

I do not think there can be necessity for such works in the Eastern portion judging both from Mr. Ottomani's report & other information I have received from time to time. There is the usual business connected with the Coast & the maintenance of the Trunk Road to give employment, though I gather but little is spent on the latter in part from collecting material on account of the want of rain & water.

2. I am asking Mr. Hardinge to send further information about the Handukur Taluk, & as there may be necessity for emergent expenditure in the western part am authorizing him to expend a sum not exceeding Rs. 1000 on relief works should he be convinced of pressing need for the same. The works which appear to be most suitable should necessity arise, are the following, which may all have Pokoor as their centre a village some six miles South

South-west of Handukur Costa. The works would be central for that part of the Taluk most likely to suffer.

I Road from Handukur to Chundy, via Pokoor, the distance from Chundy to Pokoor is about 10 miles; total length about 16 miles.

II Road from Pokoor to Lingasamudram about 9 miles.

III Deepening and banking north Supply Channel of Pokoor Tank.

These works would be carried out under the Sub Collector by the Tahsildar with the advice of the Department Public Works.

I would take them up in the order in which they stand. They are all useful works which would be carried out in due course under ordinary circumstances. I request that the sum sanctioned may be considered as separate from that allotted for relief works in the principal Division

Division.

3. I may note here that the general Condition of the District is at present as follows:-

The prices of food grains are very high, & the grains are offered sparingly in the market. The ordinary Coolies have now been more or less without work for the three or four months during which they might have expected to have had an opportunity of earning enough for their support, consequently, from every part of the District is coming the Complaint of people being without food for two or three days and the call for relief works. I have been extremely reluctant to encourage a cry of famine or to ask for funds for relief works unnecessarily, but we have arrived at the point where the holding off of the North-East Monsoon.

The latest prices are as follows in Kallora bazaar.

1 st Sort rice	per Ruyun	8 1/2
2 ^d sort rice	- - - - -	9 1/2
Paddy 1 st Sort	- - - - -	17 1/2
Cholam	- - - - -	"
Raghi	almost	"
if not quite un- obtainable from time to time.		

Monsoon for a week or two longer may cause actual distress & risk of starvation amongst the poor in parts of the District hitherto considered in a fairly prosperous Condition.

4. I apprehend it is the wish of the Board & of Government that on no account should any one be allowed to die of starvation as far as District officials can prevent such a calamity; & that wherever there is a risk of such a calamity occurring relief should be afforded by Government funds spent chiefly in the way of providing work. That is being furnished, as the Board are already aware, in the Kavalikottam & Udayagiri Taluqs, & sanction is being asked for giving it in Kaniyir and Kandiur. But from all the information I am able to gather, derived from various sources, we are in the verge of risk of such a calamity in the South-west of the

the District, & I intend submitting propo-
sals in detail for that part in the course
of a day or two.

5. I may add that the symptoms in-
dicative of an impending break of the
rainfall of the North East monsoon, of
which I wrote hopefully in my letter
No. 2998 of the 27th Instant, have all passed
away, & our sky is bright & cloudless. Should
the rainfall commence soon of course
for the time the necessity for relief works
would immediately cease & this is being
borne in mind in the carrying on of the
different works.

Submitted for the information of
Government.

2. The Board doubt the necessity and
decline

decline to sanction relief works in
Kandukur at present. The northern
portion of the Taluk is well off and
there are relief works in operation
in Kavali Taluk close to the South west
side of Kandukur. There is still a
fair chance of Kandukur Taluk
getting the North East monsoon. The
Collector will report the prices prevailing
at Kandukur & in the district villages.
