Dated 15.11.1876 196-

Not to be folded or roughly handled

Proceedings of the Madras Government, Revenue Department,
15th November 1876.

No. 268. Read the following Proceedings of the Board of Revenue, dated 9th November 1876, No. 3788:—

Read the following letter from R. W. BARLOW, Esq., Collector of the Chingleput District, to H. E. STOKES, Esq., Acting Secretary, to the Board of Revenue, dated Saidapet, 4th November 1876, No. 615:—

Referring to paragraph 2 of the Proceedings of the Board, No. 1491, dated 6th June last, and with reference to my Nos. 249 and 316, dated respectively 1st and 30th May 1876, in which I reported on the agricultural prospects of the district and the relief works which might be required hereafter, though not then necessary, I regret now to have to inform the Board that the total failure of the north-east monsoon up to date, following a loss of dry crops and the bad seasons of the previous year, makes the opening of relief works in certain localities imperatively called for at once.

2. The parts where relief is most required are, as I anticipated at paragraph 10 of my No. 316, quoted, the northern portion of the district and the western part of Chengam Taluk; to these I must add the southern part of the Trivellore Taluk and the part of Saidapet bordering on Conjeeveram and Trivellore.

3. I have just returned from Ponneri, and have visited some of the principal villages, where distress was reported to be most felt, and there can be no question that things are in a critical state; the poorer classes are on short fare and cannot get work and are beginning to leave their villages, while the well-to-do are pinched and cannot afford to help them. This was only what I anticipated, and what I was watching carefully, if we did not have a good north-east monsoon. Last year, though heavy remissions were granted, the ryots lost all profit; this year the dry crops are an utter failure as a rule, and now there is no north-east monsoon, and no wet crops. I passed fields and fields of manavari (rain-fed) lands, of which there is so much in the Ponneri Taluk, planted with wet crops in anticipation of heavy rainfall, withered or withering; in fact those who have not planted nurjah are better off than those who have, as they have saved their seed.

4. I enclose a table (A) showing the cultivation of this and the past three years. The falling off this year as compared even with last, a bad season, is most marked. I enclose translations of extracts (B, C, D, E, F, G, and H) from arzi and season reports received from the Tahsildar of Ponneri. I propose the following relief works* in the Ponneri Taluk, and request an immediate grant of Rupees 15,000. No ponds will

* Vide Tabular Statement marked L. be deepened or repaired, unless they have springs and are near roads, and therefore useful to the general public:—

Earthwork to road from Arnee to Poriapellam, an important junction, 2 miles, at Rupees 1,000 per mile	2,000
Gravelling do. do. at Rupees 500 per mile	1,000
Gravelling cross road (earth) from Panjetty to Ponneri, 4 miles, at Rupees 500 per mile	2,000
Gravelling cross road (earth) from Arnee to Poodoovail, 4 miles, at Rupees 500 per mile	2,000
Gravelling cross road (earth) from Poodoovail to Ponneri, 4 miles, at Rupees 500 per mile	2,000
Deepening drinking pools to be selected from list marked I	6,000
Gravelling earth road from Ponneri to Pulicat, 9 miles, at Rupees 500 per mile	4,500

Proceedings of the Madras Government, Revenue Department,
15th November 1876.

I do not wish to undertake this last, unless the distress continues, and becomes more felt.

5. The Superintending Engineer, has suggested that the embankment for the Coriilar and Naranavem rivers, for which estimates have been already sanctioned. But the execution thereof is deferred, pending the receipt of certain revenue information called for by the Engineer, and should be proceeded with, and should be given to see this done also if funds are available.

6. I further propose, with the permission of the Board, to postpone for the present all collection of ryotwary revenue by coercive process, both as regards arrears and the approaching kistbunds; this will be a great boon to the ryots, and will lighten the present pressure considerably. In every village I passed through, some without any notice, ryots turned out of their own accord and made one and the same complaint—want of water even for drinking purposes, high prices, and total loss of crops.

7. I shall visit Trivellore and the western part of Suddipet next week, and report on the necessity for commencing the road from Sathaved to Tadda from the north end and the two minor roads entered in the list, which accompanied my No. 249, after consulting the Tahsildars. The following week I propose going again to the Ponneri Taluq, and in the meantime, I trust money will be placed at my disposal. I should note here that I have had to add relief works to those entered in the original list, owing to the total failure of wet and manavari cultivation in and around Ponneri itself.

8. I enclose copy (J) of a letter from the Acting Sub-Collector reporting on the state of parts of the Conjeveram Taluq, and asking for an immediate grant of Rs. 5,000. It requires no comment, except that I strongly support the application and approve of the measures for relief proposed, though I doubt whether the sum asked for will be sufficient. I visited all this locality recently, at the close of what should have been the south-west monsoon; the ryots were complaining bitterly of the failure of their dry crops and water was scarce for men and cattle. A heavy shower or two, however, while I was there, put a little water into the pools and encouraged the ryots to plough, and I was in hopes that, if the north-east monsoon set in early, the crisis might be tided over; but total failure of rain has ensued instead. I have been expecting this report from the Sub-Collector, who had been requested to watch this locality narrowly, but I made no special reference to him since, and he has arrived at his conclusion that the that the Sub-Collector apprehends the necessity for relief in the Madrantakum and Chingleput Taluqs also and promises details and definite proposals hereafter.

9. As regards supervision, the Board will observe from the map (K) herewith forwarded that the roads at issue are to be convenient of access from the Northern Trunk Road. I hope to be able to visit them all about once a week; while as regards Trivellore and the western part of Conjeveram, I have exceptional advantages as regards transit by rail, and the last will have the benefit of the Sub-Collector's personal supervision as well. I shall put each Tahsildar in immediate charge of the works in his taluq, the Sheristadar managing at Head-quarters, with a picked Revenue Inspector to assist him.

10. If more details are required, I will furnish them hereafter, but I hope I have sufficiently shown that assistance is necessary. I only returned from Ponneri late last night, and am anxious that this report should be in the hands of the Board on Monday, as work should be commenced without delay.

Proceedings of the Madras Government, Revenue Department,
15th November 1876.

Enclosure No. 1.—Cultivation Statement.

Enclosures Nos. 2 to 3.—Translations of Extracts from Arzis, &c.

Enclosures Nos. 9 and 10.—Statements of Work.

Enclosure No. 11.

From S. T. McCARTHY, Esq., Acting Sub-Collector of Chingleput, to R. W. BARLOW, Esq., Collector of Chingleput, dated Goolovanjeri, 31st October 1876, No. 733.

With reference to your letter, No. 1,874 of the 10th instant, I beg to inform you that I have since been to Conjeveram, in which place and at Wallajahbad I have made full inquiries regarding the present condition of the people. The result is that, owing to the very unfavorable character of the season arising from the want of rain and consequent failure of the crops, the distress is beginning to make itself felt. It is not very serious at present, and there is yet room for hope that, with a good monsoon, matters may assume a more favorable aspect, but the present condition of things is such that I consider it necessary to adopt without delay some measures of relief. From information supplied by the Tahsildar and others, I find that many people have had to leave their villages in search of employment in Madras and other localities, especially in places where there are Coffee Plantations. There is also a great scarcity of drinking water in many villages. The prices of rice and other grains have risen considerably, and difficulty is now felt in obtaining them at reasonable prices. Some merchants, who have paddy in store, are very unwilling to dispose of it, and the intervention of the Tahsildar has, in some cases, been necessary, to persuade them to do so. Others sell rice in large quantities and at high prices to merchants in Bellary, Cuddapah, &c.; some of the inhabitants of Conjeveram raised an alarm about this state of things, and made complaints to the Tahsildar; but as I have abovementioned, he with the aid of the Town Deputy and the Inspector of Police, has succeeded in persuading some of the grain-merchants to sell rice in small quantities for ready money and to procure some from Madras for that purpose. So he has contrived to soothe their alarms for the present. The Tahsildar, however, urges the necessity of opening out relief works at once, as matters are beginning to assume a serious aspect, and the state of things will be very bad, indeed, if the monsoon should fail. Many of the laboring classes are unable to find employment. I think, therefore, it is advisable to lose no time in asking you to apply for a special grant of money to be spent in useful works, such as deepening ponds and repairing roads. There are some useful roads which I think it would be desirable to seize the present opportunity of putting in repair and many new roads which might be constructed.

I would instance, in particular, the following three works:—

- (1.) Repairing road from Conjeveram to the Palar river by Sevilinedu (2½ miles).
- (2.) Repairing road from Conjeveram to Kuram (6 miles).
- (3.) Making new road from Sunkuvur's choultry to Maduramangalam.

(The Local Fund Board are not in a position at present to carry on this last-mentioned work).

* Herein below appended.

The Tahsildar gives a list* of 16 tanks in different villages, which he proposes should be deepened.

Such works will be very useful, and will afford a good measure of relief to the laboring classes in providing them with employment. I propose, therefore, that you apply at once for a grant of Rs. 5,000 to enable me to put relief works in hand in the Conjeveram Taluq. Some works of the kind will also be necessary in the Chingleput Taluq, wherein I have heard many complaints of distress, and for that taluq, too, I think it is necessary to obtain a grant of a similar amount. I am not without hopes that a copious fall of rain may yet revive the dying

Proceedings of the Madras Government, Revenue Department,
15th November 1876.

crops, and provide a good supply of water in places where a want of it is at present felt. I think it is as well to be prepared for the worst. I shall afterwards report in detail the measures of relief which I may think necessary in this and Madhavaram Taluqs.

Name of tanks in need of repairs in the Conjeveram Taluk :-
Kondappa Naiken tank at Pandal.
Tank near S. Alimudai.
Tank near Serukaveripakkam.
Tank near Reganambet.

Collector

Enclosure No. 12.—Map.

SUBMITTED for the information of Government.

2. The Board regret to learn that the prospects of the Chingleput District are so bad. The Collector proposes to start relief works at once in the Ponneri Taluk, and asks for a grant of Rupees 15,000 (Rupees 9,000 for road works and Rupees 6,000 for works of water-supply) for expenditure in that taluk. He also supports the application of the Sub-Collector for a grant of Rupees 5,000 for relief works in the Conjeveram taluk. The Sub-Collector asks in addition for Rupees 5,000 for works in Chingleput.

3. The Board resolve to place the sum of Rupees 25,000 at the Collector's disposal. The works so far as specified by Messrs. Barlow and McCarthy are approved, but, as regards works of water-supply, the orders conveyed in G.O., No. 929, dated 11th July 1876, should be observed. Details of the appropriation of the grants of Rupees 5,000 each for the taluqs of Conjeveram and Chingleput should be reported.

4. Mr. Barlow anticipates necessity for further relief works in the southern part of Trivellore and in the parts of Saidapet bordering on Conjeveram, but promises further report on these tracts after personal inspection and inquiry.

5. In paragraph 5 the Collector recommends, in accordance with the suggestion of the Superintending Engineer, that, if funds can be made available, the embankments of the Cortilliar and Naranaveram rivers for which estimates have been sent to the Chief Engineer for Irrigation should be proceeded with. These are very important works, and the Board support the Collector's recommendation to which they request the attention of Government.

6. The Collector is authorized with reference to paragraph 6 to suspend collections of ryotwary land revenue for the present, and while the pressure continues.

7. Board's Proceedings. No. 2,764, dated 7th November 1876, containing suggestions by the Director of Revenue Settlement for the organization of village relief works will be communicated to the Collector. The arrangements proposed for the supervision of the works proposed for execution at once have the Board's approval.

No. 239.

ORDER THEREON 15th November 1876, No. 1,687.

Miscellaneous.

The Governor in Council is of opinion that it would be preferable to employ the distressed laboring population of the Chingleput District in the conversion of the ~~Madras~~ ~~Public Works~~ ~~Department~~ ~~to the metro gauge~~ ; sanction for which was conveyed in G.O., Public Works No. 2,634 of 30th September last.

2. The South Indian Railway Company's Agent will be requested, through the Public Works Department, to avail himself of this sanction. The work, it is presumed, would afford all the relief desired by the Collector.

Wm. Barlow

may assume a more favorable aspect,
but the present condition of things is such
that I consider it necessary to adopt with-
out delay some measures of relief. From
information supplied by the Tahildar
and others, I find that many people
have had to leave their villages in search
of employment in Madras and other locali-
ties especially in places where there are coffee
plantations. There is also a great scarcity of
drinking water in many villages. The
prices of rice and other grains have risen
considerably, and difficulty is now felt in
obtaining them at reasonable prices. Some
merchants, who have stock in store, are
very unwilling to dispose of it, and the in-
tervention of the Tahildar has, in some
cases, been necessary, to persuade them
to do so. Others sell rice in large quantities
and at high prices to merchants in Bellary
Cuddapah &c. Some of the inhabitants of
Conjeveram raised an alarm about this
state

168
state of things, and made complaints to
the Tahildar, but as I have above mentioned
he with the aid of the Poon Deputy and
the Inspector of Police, has succeeded in
persuading some of the grain merchants
to sell rice in small quantities for ready
money and to procure some from Madras
for that purpose. So he has continued to soothe
their alarms for the present. The Tahildar,
however, urges the necessity of opening out relief
works at once, as matters are beginning to assume
a serious aspect, and the state of things will
be very bad indeed, if the monsoon should
fail. Many of the laboring classes are unable
to find employment. I think therefore it is
advisable to lose no time in asking you to
apply for a special grant of money to be spent
in useful works, such as deepening ponds and repairing roads.
There are some useful roads, which I think it
would be desirable to seize the present
opportunity of putting in repair and many
new roads which might be constructed.
I would instance in particular the
following

following three works

1. Repairing road from Cojournam to the Palas River by Sankhmeda (2 1/2 miles).
2. Repairing road from Cojournam to Kuram (6 miles).
3. Making new road from Sankhmeda to Madhura Mangalam.

(The Local Fund Board are not in a position at present to carry on this last mentioned work.)

The Tahildar gives a list of 16 Tanks in different villages, which he proposes should be repaired.

Below
appended

Such works will be very useful and will afford a good measure of relief to the labouring classes in providing them with employment. I propose therefore that you apply at once for a grant of Rs 5000 to enable me to put relief works in hand in the Cojournam Taluq. Some works of the kind will also be necessary in the Chughat Taluq.

1457/10
Taluq, wherein I have heard many complaints of distress and for that Taluq too, I think it is necessary to obtain a grant of a similar amount. I am not without hopes that a copious fall of rain may yet revive the dying crops, and provide a good supply of water in places, where a want of it is at present felt, but I think it is as well to be prepared for the worst. I shall afterwards report in detail the measures of relief, which may be necessary in this and Madhura Taluqs.

which might be required here-
after-though not then necessary-
I regret now to have to inform the
Board that the total failure of
the North-East monsoon up to date

The above is a copy of the
original letter from the
Collector of the Chengizpur District
to the Secretary to the Board of Revenue
dated 1st June 1876.

1

By a Letter from
the Collector of
Chengizpur and
1st June 1876
No. 494/76
J. G. O. No. 1881/76

following a loss of dry crops and the bad seasons of the previous year, makes the opening of relief works in certain localities imperatively called for, at once.

2. The parts where relief is most required are, as I anticipated, at para. 10 of my No 316 above quoted, the northern portion of the District and the western part of Cojiveram Taluk; to these I must add the southern part of the Trivallor Taluk and the part of Soidapett bordering on Cojiveram and Trivallor.

3. I have just returned from Ponnery, and have visited some of the principal villages, where distress was reported to be most felt, and there can be no question that things are in a critical state; the poorer classes are on short fare and cannot get work and are

150/2
are beginning to leave their villages, while the well-to-do are pinched and cannot afford to help them. This was only what I anticipated and what I was watching carefully, if we did not have a good north east monsoon. Last year though heavy rainfalls were granted, the crops lost all profit; this year, the dry crops are an utter failure as a rule, and now there is no north east monsoon and no wet crops. I passed fields and fields of manavay (rainfed) lands, of which there is so much in the Ponnery Taluk, planted with wet crops in anticipation of heavy rainfall, withered or withering; in fact those who have not planted kuzhah are better off than those who have, as they have saved their seed.

4. I enclose a table (A) showing the

the cultivation of this and the past
three years. The falling off this
year as compared even with the
last, a bad season, is most marked.

Enclose translations of extracts (B.C.
D.E.F.G. & H.) from *argis* and season
reports received from the *Lahoolar*

of *Ponimery*. I propose the following
relief works in the *Ponimery* *Lahoolar*

and request an immediate grant
of Rs 15,000. No ponds will be deepened

or repaired, unless they have springs
and are near roads and therefore
useful to the general public.

Earthwork to road from *Stree* to
Pariapolicum, an important junction } Rs
2 miles at Rs 2000 per mile — } 2000

Graveling do do at 500 Rs per do — 1000

Graveling cross road (earth) from
Punjetty to *Ponimery* 4 miles at } 2000
Rs 500 per mile — }

Graveling

Graveling cross road (earth) } Rs
from *Stree* to *Pordoorab* 4 } 2000
miles at Rs 500 per mile }

Do do from *Lahoolar* to } 2000
Ponimery 4 miles at Rs 500 per do }

Deepening *dhun* *Kipools* to be } 6000
selected from list marked I }

Graveling earth road from
Ponimery to *Pulicat* 9 miles at } 4500
Rs 500 per mile — }

I do not wish to undertake this
last, unless the distress continues and
becomes more felt.

5. The Superintending Engineer
has suggested that the embankments
to the *Coastalliar* and *Varanaver* *am*
*river*s, for which estimates have
been already sanctioned, but the
execution whereof is deferred pending
the receipt of certain revenue infor-
mation called for by the Chief Engineer
should be proceeded with, and I
should

should be glad to see this done
also, if funds are available.
6. I further propose with the
permission of the Board to postpone
for the present all collection
of ryotwary revenue by Correo
process, both as regards arrears
and the approaching list bundles;
this will be great boon to the ryots
and will lighten the present pressure
considerably. In every village I
passed through - some without
any notice - ryots turned out of
their own accord and made out
and the same complaints, want of
water even for drinking purposes,
high prices and total loss of crops.
7. I shall visit Sivellone and
the western part of Saidapet next
week, and report on the necessity
for

165/15
for commencing the road from
Sathiaerob to Sudda, from the northern
end and the two minor roads entered
in the list, which accompanied my
P. 269, after consulting the Tahsildar.
In following week, I propose
going again to the Ponnery Taluk and
in the meantime, I trust money
will be placed at my disposal.
I should note here that I have had
to add relief works to those entered
in the original list owing to the
total failure of wet and Kharavy
cultivation in and around Ponnery
itself.
8. I enclose copy of a letter from
the Agency Collector reporting
on the state of parts of the forjmuram
Taluk and asking for an immediate
grant of Rs. 5000. It requires no
comment, except that I strongly
support

support the application and
approve of the measures for relief
proposed though I doubt whether
the sum asked for will be suf-
ficient. I visited all the locality
recently, at the close of which I found
have been the South west Monsoon
the ryots were complaining bitterly
of the failure of their dry crop
and water was scarce for man and
cattle. A heavy shower or two,
however, while I was there, put
a little water into the pools and
encouraged the ryots to plough and
I was in hopes that if the North
East Monsoon set in early the crisis
might be tide'd over; but total
failure of rain has ensued instead.
I have been expecting this report
from the Subcollector who had been
requested to watch this locality
narrowly

* K

1682
17
narrowly, but I made no special
reference to him since, and he
has arrived at his conclusion
that the time has come for starting
relief works, quite apart from mine.
I observe further that the Subcollector
apprehends the necessity for relief
in the Madurantakam and
Chengalpet Taluqs also and promises
details and definite proposals
hereafter.

As regards supervision, the
Board will observe from the map
herewith forwarded, that the roads
all lie so as to be convenient of
access from the Northern Truck Road.
I hope to be able to visit them all,
about once a week; while as regards
Trivellore and the western part of
Coimbatore. I have exceptional
advantages as regards transit by
rail

at the collector's disposal. The works
so far as specified by Messrs Barlow
and McCarthy are approved; and
as regards works of water supply
the orders conveyed in G. O. No. 929
dated 11 July 1876, should be observed.
Details of the appropriation of the
grants of Rs. 5000 five thousand
each for the taluks of Onjiveram
and Chinglput should be reported
to Mr. Barlow. anticipated necessity
for further relief works in the Southern
part of Trichlore, and in the parts
of Saidapett bordering on Coim-
batur, but promises further report
on these tracts after personal
inspection and enquiry.

5. In para 5, the collector
recommends, in accordance
with

187/19
with the suggestions of the Superin-
tending Engineer that if funds
can be made available the embank-
ments of the Corbilliar and Naravara
rivers, for which estimates
have been sent to the Chief Engineer
for Irrigation should be proceeded
with. These are very important
works, and the Board support
the collector's recommendation
to which they request the attention
of Government.

6. The collector is authorized
with reference to para 6 to suspend
collections of ryotwary land
revenue for the present, and
while the pressure continues.

7. Board's Proceedings No.
dated 7 November 1876, containing
suggestions by the Director of
Revenue

at the collector's disposal. The works
so far as specified by Messrs Barlow
and McCarthy are approved; and
as regards works of water supply
the orders conveyed in G. O. No. 929
dated 11 July 1876, should be observed.
Details of the appropriation of the
grants of Rs. 5000 five thousand
each for the taluks of Coimbatore
and Chingleput should be reported.
4. Mr Barlow anticipates necessity
for further relief works in the southern
part of Travancore, and in the parts
of Pandalam bordering on Coimbatore,
but promises further report
on these tracts after personal
inspection and enquiry.

5. In para 5, the collector
recommends, in accordance
with

1876/19
with the suggestion of the Superin-
tending Engineer that if funds
can be made available the embank-
ments of the Corbilliar and Karanave-
ram rivers, for which estimates
have been sent to the Chief Engineer
for Irrigation should be proceeded
with. These are very important
works, and the Board support
the collector's recommendation
to which they request the attention
of Government.

6. The collector is authorized
with reference to para 6 to suspend
collections of ryotwary land
revenue for the present, and
while the pressure continues.

7. Board's Proceedings No.
dated 7 November 1876, containing
suggestions by the Director of
Revenue

Revenue Settlement for the
organization of village relief
works will be communicated
to the collector. The arrangements
proposed for the supervision of the
works proposed for execution, at
once have the Board's approval.
