Municipal—Reports.

No. 7. Read the following letter from W. P. AUSTIN, Esq., Vice-President of the Municipal Commission, Vellore, to W. S. WHITESIDE, Esq., President of the Municipal Commission, Vellore, dated Vellore, 28th September 1875, No. 106:—

I have the honor to report on the working of the Vellore Municipality during the past official year 1874-75.

2. As the accounts of the year were audited by the Treasury Deputy Collector of this district, a copy of his report and the following statements are herewith forwarded:—

- I.—Statement of Revenue and Receipts, with one enclosure.
- II.—Statement of Expenditure, with two enclosures.
- III.—Abstract of Deposit Accounts.
- IV.—Statement of Demand, Collection, and Balance.
- V.—Balance-sheet.
- VI.—Statement showing the Incidence of Taxation.

Proceedings of the Madras Government, Financial Department,
4th July 1876. No. 1195.

3. The actual Receipts and Expenditure of the year are

4. It will be seen from the foregoing statements that the amount collected during the year, including the opening balance, was Rupees 59,637-13-0, the amount expended was Rupees 49,530-4-3, and the balance at the close of the year was Rupees 10,107-8-9 exclusive of deposits from Contractors which amounted to Rupees 3,479-13-11.

5. As the actual receipts and expenditure differ from the Budget Estimates, the causes of such differences are explained below.

6. The opening balance exceeded the estimate by Rupees 7,080-12-4 chiefly because the actual expenditure fell below the estimate by Rupees 2,399-11-9, and Government promissory notes for Rupees 4,300 belonging to the Civil Dispensary and Lungerkhana were not taken to account in the estimate.

7. The Surplus Pound Collections received for the second half-year in the preceding year amounted to Rupees 22-11-6; they were therefore estimated for a whole year at Rupees 40, but the actual income proved no more than Rupees 16-1-0.

8. The decrease of Rupees 639-3-0 in the House-tax represents the balance, which, owing to the prevalence of severe fever in some parts of the town, remained uncollected at the close of the year. The current demand of this tax was Rupees 6,215-14-0, the demand for arrears was Rupees 1,321-14-0, making the total demand to be Rupees 7,537-12-0, the whole of which has been collected except Rupees 6-6-0 remitted on appeal, and Rupees 45 outstanding against defaulters absent from the town.

9. The recovery of arrears of Trade tax after the abolition of the tax appeared doubtful, and was not therefore entered in the Budget, but the arrears have since been realized.

10. The decrease in the Tax on Vehicles and Animals is attributable to natural fluctuations in their number.

The falling off in the fees for the registration of carts is very small, and hardly needs a remark.

11. The receipts from tolls were over-estimated as the average for the five years prior to 1874-75 was only Rupees 13,366.

12. The discontinuance of a few brick-kilns accounts for the falling off in the income from fees.

13. Fines were levied in a greater number of cases than anticipated, hence the increase under this head.

14. The decrease in the school-fees being very small calls for no remark.

15. The increase in the receipts on account of Lungerkhana and Dispensary consists of interest on Government promissory notes inadvertently omitted in the Budget Estimate.

16. The rental of the market was sold for a higher sum than expected.

17. The decrease of fees in the slaughter-house is too small to need explanation.

18. The sale of a large number of empty tin and dealwood boxes and old materials increased the sale proceeds above the estimate.

19. The sale of avenue clippings brought in a larger amount than expected.

20. The contract for the sweepings of cart-stands was sold for a higher sum than estimated.

21. The sale of the Municipal detached bungalow was the cause of decrease in the rent received for the building.

22. A small portion of the land made over to the Municipality under G.O., dated 1st June 1868, No. 672, was sold and realized Rupees 790-13-1. This, and the sale proceeds of the Municipal bungalow, were not included in the Budget Estimate, as their sale was not then intended.

23. The expenditure on New Works and Repairs exceeded the estimate, but the excess being small calls for no explanation.

24. The cost of the Public Works Establishment rose above the estimate in consequence of unforeseen charges noted in the margin. The extra coolies were entertained to repair the damages caused to the roads by floods.

	RS.	A.	P.
Horse Allowance to the Overseer.	160	0	0
Salary of new Peon	72	0	0
Salary of Extra Coolies	1,413	2	1
Total	1,645	2	1

25. The excess in the outlay for tools is attributable to mamooties purchased for the extra road coolies.

26. The reduction in the amount of contribution to the Local Fund was the result of the G.O., dated 30th May 1874, No. 929, postponing the payment of half of the tolls to the Local Fund Board.

27. The cost of the Municipal School was put down in the estimate in round figures, instead of the exact sum, the difference between them being small.

28. Results grants being no longer required to be paid to Girls' Schools, the expenditure on this account fell short of the estimate.

29. The allotment for Educational Inspection was reduced by the Board of Revenue to Rupees 180—vide Board's Proceedings, 1st April 1874, No. 766.

30. There is no particular reason for the Miscellaneous charges on account of schools being a little less than the estimate.

31. Medicine purchased at a less cost than the estimate caused short expenditure under the head of the Civil Dispensary.

32. Payment of batta to the vaccinated did not cost as much as was expected.

33. The returns of births and deaths furnished by four village Monigars, who received a monthly allowance of Rupees 4 from the Municipality for this work, having been found unsatisfactory, three better class of Registrars were entertained on Rupees 10 each per mensem, which is the cause of the expense being in excess of the estimate.

34. The excess in the expenditure under the head of Conservancy was occasioned by incurring the following charges not provided for in the Budget:—

	RS.	A.	P.
Removing silt from Suriagunta	662	14	5
Killing Dogs	418	3	0
Extra Sweepers	98	0	4
Extra Toties	245	15	6
Total	1,425	1	3

35. The extension of lighting increased the expenditure on that account. There were twelve Silbers and 356 ordinary lamps, all lighted with kerosene oil. The total number of lights in the preceding year was 339.

36. The necessity of employing two water coolies, instead of one for the market, caused the expenditure to exceed the estimate by Rupees 37.

37. The contract for the supply of rice to the paupers in the Lungerkhana was, owing to want of brisk competition, accepted at a higher price than that estimated, and caused the increased expenditure.

38. The planting of avenue trees was managed by the road coolies without any separate outlay for the purpose.

39. The Rupees 208-2-0 entered as paid for land purchased was expended in the purchase of land for the widening and improving of the Voilapadi and Suriagunta Channels. This outlay and the remaining pretty charges were not anticipated when the Budget was prepared.

40. The works executed during the year were as follow :—

	RS.	A.	P.
Rough stone revetment to the drain at Kandasami Jamadar Street	2,448	6	8
Construction of 102 new Tunnels in different parts of the Town	2,941	6	4
Bridge across the Nullah at Yada Street	350	0	0
Rough stone revetment to Suriagunta Supply Channel	667	5	6
Do. to Basabuthan Nullah	147	9	2
Do. to Voilapadi Channel	758	3	4
New form of Latrine near Commissariat Bazaar	124	4	5
Improvement of old dust-boxes and construction of new ones... ..	166	2	0
Construction of a tiled shed at the cart-stand on the Bangalore Road	366	12	0
Improvement of Cusbah Channel	1,489	12	7
Do. of the Municipal Market	838	10	0
Total	10,298	8	0

41. The Suriagunta, the Voilapadi Tank, and the wells in different parts of the town which supply drinking water to the people were maintained in good order.

42. The town roads and streets were repaired at a cost of Rupees 4,134-8-8. The repair of the Cantonment roads cost Rupees 2,120-12-8, or 1,010-12-8 more than the Government allowance for the same. This extra expenditure was rendered necessary by the damage done to these roads by excessive rain.

43. The conservancy of the town was carefully attended to by the following establishment :—

	RS.	A.	P.
Three Sanitary Inspectors at an annual cost of	900	0	0
Six Sanitary Peons	432	0	0
Twenty-six Sweepers	1,598	0	4
Do. Toties	1,685	15	6
Ten Drain-cleaning Coolies	497	15	0
Thirty Conservancy Carts	2,996	1	6
Two Night-soil Carts	272	2	0
Total	8,382	2	4

44. There was not a single case of cholera during the year; small-pox caused only five deaths; but fever and bowel-complaints were more destructive; and deaths from other causes were also numerous as shown below :—

	RS.
Small-pox	5
Fever	501
Bowel-complaint	153
Other Causes	734
Total	1,393

45. The births registered during the year were 712 males and 708 females, total 1,420.

46. The total number of persons vaccinated during the year was 1,500. Of these, 327 were vaccinated by municipal vaccinator, and 1,173 by the medical subordinates under the Civil Surgeon of Vellore. The operations proved successful in 1,381 cases, unsuccessful in fifty-four, and doubtful in one, while the result was unknown in sixty-four cases. The payment of rewards to the poor among the vaccinated amounted to Rupees 141-4-0.

47. The total number of persons supported at the Lungerkhana during the year was 3,232, they were each allowed 60 Rupees weight of rice per day, and received the allowance weekly, but as this practice led to some of them selling their rice, it was decided in March last that the weekly issue should be discontinued and the daily issue reverted to, and that as raggi was cheaper than rice, to substitute a daily allowance of one-half rice, and one-half ground raggy, by which arrangement a larger number of paupers could be admitted on the rolls of the charity.

48. It will be observed from the report of the Civil Surgeon of Vellore, herewith submitted, that 804 in-patients and 7,210 out-patients were successfully treated in the Civil Dispensary, and that the working of the Institution during the year was satisfactory.

49. One Salary School and eighteen Results Schools were maintained by the Municipality during the year under report. The Salary School was started in May 1873; its present strength is forty-four boys; it did not pass well at the last examination owing to want of co-operation on the part of the head and second masters, but the former having now been transferred to a Local Fund School, better results are expected hereafter.

The following table shows how the Municipal School and Results Schools did in the principal subjects of their study :—

Number of Schools.	Number of Pupils presented for Examination.	NUMBER OF PUPILS PASSED IN		NUMBER OF PUPILS PASSED IN		
		Reading and Writing together.	Reading, Writing, and Arithmetic.	Reading alone.	Writing alone.	Arithmetic alone.

*Proceedings of the Madras Government, Financial Department,
4th July 1876. No. 1195.*

Arrangements have been made to open two more Salary Schools—one in Sydapet, and the other at Voilapadi.

No. 88.

True copy submitted to Government. The Vice-President having fully entered upon the working of the Municipality, the President has no remarks to offer.

PALMANAIR, (Signed) W. S. WHITESIDE,
11th November 1875. President.
To the Offg. Chief Secretary to Government, Fort St. George.

ANNUAL Medical Report on the Civil Dispensary, Vellore, for 1874-75.

I. *Observation on the Climate and Season of the past Year and the Condition of Public Health in the Station and surrounding District.*—The average temperature was higher than last year, still there was a very seasonable cold season. The rainfall was greater than the previous year, being 58.74 against 27.06. The north-east monsoon was very severe and many floods were the consequence and much damage done by the inundations, particularly to roads, bridges, and bunds of tanks.

The general health of the public and of the surrounding villages has been comparatively good.

II. *Detailed Narrative of any Epidemic Disease.*—Fever of an intermittent type prevailed to a very great extent over the district, and it increased in severity. During the months of January, February, and March it was very prevalent in Vellore itself, and several of the adjoining villages, particularly Voilapadi and Sullivanpett. Besides the patients treated in the dispensary, one of the subordinates itinerated with a supply of medicines to the villages referred to as many of the people were so ill that they could not leave their houses; during the three months he treated 1,068 cases, of these 1,068 cases 1,003 were fevers, and sixty-five principally dysentery and diarrhoea. There was a small shed erected by the people where I was able to see the work carried on by the medical subordinates.

The total number of fever-cases treated during the year, including those treated at Voilapadi and Sullivanpett, amounted to 3,294, besides 298 cases of fever and six of dysentery were treated by the Hospital Assistant attached to the Sub-Collector's Establishment at Voilapadi.

III. *Principal Diseases and Classes of Diseases prevalent during the Year.*—One thousand nine hundred and ninety-six cases of diseases of the bowels, 1,429 cases of skin diseases, 385 of rheumatism, 280 diseases of the ear, 1,698 other diseases. No cases of cholera occurred in the station during the year; eight cases were reported to have occurred in a village situated about ten miles north-east of Vellore called Wallaja Cananoor. Small-pox did not prevail in Vellore during the year.

IV. *Special or Remarkable Cases suited for communication to Profession extracted from the Case Book.*—None.

V. *Surgical Operations performed during the Year with the Results.*—There were six important operations performed during the year. One amputation of the penis for a large cancerous growth. One amputation of the thigh for a large tumour connected with the bone. One amputation of the arm in an old enfeebled man for extensive disease of the hand and forearm. Two excisions of portions of lower jaw for cancer. One case of lithotomy. The case of amputation for disease of the forearm did well apparently for a few days, when he was attacked with diarrhoea from which he sank on the 17th day after the operation. One of the cases of excision of the lower jaw was removed from the dispensary by his relatives twelve days after the

*Proceedings of the Madras Government, Financial Department,
4th July 1876. No. 1195.*

operation; this was done contrary to the advice given them at the time; it appears he subsequently died. The other four cases made good recovery.

VI. *Economic Statistics and Management of the Hospital accompanied by Financial Statement showing the Income and Expenditure and Funded Capital of the Year.* Form No. 36.—Form accompanied.

VII. *Condition as to Usefulness of Lying-in Ward, if any.*—There is no Lying-in Hospital, but there is always a spare ward available for these cases, and none are refused admittance.

VIII. *Changes in or Additions to Hospital Buildings, &c., during the Year.*—None.

Agreeably to Circular Memorandum, No. 7204, dated Fort St. George, 4th November 1874.

I. *Name of the Town, Population of the Town, and of the District.*—Vellore. By the last Census the population of the town was 37,969, and of the district 547,868.

II. *Date of Establishment.*—It appears that the dispensary was established on the 21st June 1854.

III. *By whom Originated.*—There is no record of any kind to show by whom the dispensary was originated.

IV. *How Supported.*—Not known. At present it is supported by the Municipality of Vellore.

V. *What Medical Officers have been in Charge.*—When first established Garrison-Surgeon C. Kevin was in medical charge of the Institution from 5th August 1854 to 6th February 1856. Assistant-Surgeon W. H. Harris, M.D., from 7th February 1856 to 7th November 1856. Surgeon G. Morrogh, M.D., from 3rd February 1857 to 8th November 1857. Surgeon C. Barclay from 19th May 1857 to 31st December 1859. Assistant-Surgeon W. Fry from 1st January 1860 to 2nd March 1865. Surgeon-Major H. Young from 1st January 1866 to 31st December 1866. Assistant-Surgeon W. F. DeFebeck from 1st January 1866 to 8th December 1868. Assistant Surgeon W. S. Fox from 8th December 1868 to 13th January 1875. Surgeon-Major H. Ross, M.D., from 13th January up to present date.

VI. *In each Year since opening or as far back as possible give the following data:—*

Years.	Total Admissions.		Average Daily Sick.		Total Deaths.	
	In.	Out.	In.	Out.	In.	Out.
1870	221	4,672	17.49	22.33	14	1
1871	282	6,863	20.21	46.32	20	1
1872	441	5,058	28.39	34.84	24	3
1873	506	4,047	26.30	35.33	24	...
1874-75	804	7,210	36.90	48.39	34	...

The total number of in-patients treated in 1873-74 was 517 and in 1874-75; 804 out-patients in 1873-74, 5,255, and 1874-75, 7,210, showing a considerable increase over that of the previous year.

VII. *Dimensions of Hospital.*—Given in accompanying form.

VIII. *If there be any Police Hospital or Lying-in Hospital their History and good doing.*—There is a Police Hospital attached to the Civil Dispensary, one of the wards of the institution being set apart for their (police) accommodation. The working of this institution is satisfactory. There is no Lying-in Hospital, but there is always a spare ward available for these cases, and none are refused admittance.

IX. *State of Medicines among Native Practitioners, Hakeem, Saheb, Pundith or Vythian or others.*—The native practitioners in Vellore treat cases with their native remedies, which are chiefly preparations of mercury, arsenic, copper, iron and other inorganic drugs in various forms.

Proceedings of the Madras Government, Financial Department
4th July 1876. No. 1195.

X. *What European Medicines are available in the Bazaar and to what extent do Native Practitioners or the People use them.*—The chief European medicines that are procurable in the native medicine shops in the town are as follow : Quinine, chlorodyne, sulphuric and nitric acids, and oil of turpentine. Out of these drugs the native practitioners chiefly make use of quinine in all forms of fever, and chlorodyne in dysentery, diarrhoea, and colic.

XI. *State of Vaccination and View of the People as to its Virtues; are these Inoculators present.*—The view that the people take regarding the virtues of vaccination is greater than in former years, and it is kept up steadily by the medical subordinates and the municipal vaccinator. From my experience there is no inoculator at present in the town of Vellore.

There is one native oculist.

XII. *Are there any Native Oculists or Lythotomists in the District.*—There are no lythotomists in this district that I have heard of.

The contract system of dieting the sick was carried out as usual, the rates were from 1st April 1874 to the close of the year as follows :—

Europeans.			
Adults	...	R.	A. P.
		0	8 0

Natives.			
Adults	...	R.	A. P.
Youths	...	0	1 11
Children	...	0	1 3
		0	0 5

From 1st January 1875 to 31st March 1875.

Europeans.			
Adults	...	R.	A. P.
		0	8 0

Natives.			
Adults	...	R.	A. P.
Youths	...	0	2 4
Children	...	0	1 9
		0	1 0

This includes lighting all hospital supplies and extras, and all being supplied by the Contractor, except European medicines, instruments, bedding and clothing, &c. Second-class Hospital Assistant T. Varadarajooloo, No. 602, is an excellent subordinate, and continues to deserve the high character always given him.

I do hereby certify that the orders respecting the custody of poisonous drugs, issued by the Surgeon-General, Indian Medical Department, 23rd January 1873, are fully carried out.

(True Copy.)

(Signed) H. ROSS, M.D., Surgeon-Major,
Acting Civil Surgeon.

Vellore,
1st April 1875.

From J. A. MARJORIBANKS, Esq., Deputy Collector appointed to Audit the Accounts of the Vellore Municipality for the year 1874-75, to W. S. WHITESIDE, Esq., Collector of North Arcot and President of the Vellore Municipality, Palmanair, dated Vellore, 19th May 1875.

Having, in obedience to your instructions, duly audited the accounts of the Vellore Municipality for the past official year 1874-75, I have now the honor to submit a balance-sheet showing the particulars of the receipts and charges of that period.

Proceedings of the Madras Government, Financial Department
4th July 1876. No. 1195.

2. I have also examined the usual annual statements noted below for the past year, signed them in token of their correctness, and have left them at the Municipal office to be forwarded to you with the annual report by the Vice-President :—

I.—Statement of Revenues and Receipts of the Municipal Fund of Vellore Town.

I-A.—Statement of Endowments entrusted to the Municipal Commissioners under Sections 15 and 16.

II.—Statement of Expenditure from the Municipal Fund of the town of Vellore.

II-A.—Statement of Detail of Allotment of Expenditure on Public Works estimated to cost Rupees 100 or upwards.

II-B.—Statement of Municipal Establishment.

III.—Abstract of Deposit Accounts.

IV.—Statement of Demand, Collection, and Balance for current and arrears.

3. The audit was conducted by me precisely in the same manner as in last year, and I am glad to be able to state that the suggestions then made by me as to the closing of the day book daily, numbering of vouchers, and filing them in due order, &c., are being attended to. The postings in the ledger though made with more care than in last year, yet they have in a few instances been entered out of their proper order. I have pointed these out to the Manager, who has promised to see that such irregularities shall not occur again.

Communicated to the Vice-President, Municipal Commission, Vellore, together with the balance-sheets.

PALMANAIR,
21st May 1875.

(Signed) W. S. WHITESIDE,
President.
