Cuddalore
Collector's
Office
12 August 1896

This is not sufficient to fill the tanks. Some have received a small supply; but generally they remain dry. In Pullampett, Kadiri, Bodwail, Sidhant, Pulivendala and Cuddalore there has been rather more rain than the other. In Proddatur there was no rain in the Eastern part and a moderate fall in the remaining portion. The accounts of rain from the Sub Division are good & acceptable Volpau where the rain is insufficient for sowing; and the time for sowing the first crop of paddy has passed away and it is too late even if the tanks now receive a full supply. Grain is dearer in this Taluk than any of the others. In the main division the two Taluqs of Proddatur and Jammalamadugu are the worst. The accounts of this week are better than previous ones; but more rain is required even now.
