MADRAS RECORD OFFICE

GOVERNMENT OF MADRAS

Revenue DEPARTMENT

G.O. No.	2369	Press
B.P. No.		Mis. ☒
Dated	12-10-1876	196

Not to be folded or roughly handled

Read the following papers:—

No. 86-W.

No. 443. *Note by the Chief Engineer for Irrigation.*

The sections of the Striviguntum Anicut system are two, viz.:—

North Main Channel (L.B.).

South do. (R.B.).

The sub-sections are the several channels and tanks connected with them in each section.

2. Before finally adopting the arrangements as drawn up by the District Engineer, it may be desirable to see whether the Revenue statements can be prepared for them in the detail shown. If not, some modification in the way of clubbing may be necessary. In Proceedings, Madras Government, 1st October 1875, No. 2,831, is given an abstract of the revised estimates showing the names and description of all the works of the system, and these works will be formed into sub-sections for the convenient exhibition of areas of irrigation and revenue year by year, as also for the record of expenditure.

3. The statement dated 14th June 1876, received from the District Engineer, Tinnevely, is submitted.

OOTACAMUND,
8th September 1876.

(Signed) JOHN MULLINS, Lt.-Col., R.E.,
Chief Engineer for Irrigation.

To the Secretary to Government, Public Works Department.

No. 443-A. From Captain L. CONWAY-GORDON, R.E., Examiner of Public Works Accounts, to Major-General G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Fort St. George, 29th August 1876, No. 192 W.

I HAVE the honor to acknowledge the receipt of G.O., No. 1,971, dated 2nd August 1876, and with reference to paragraphs 1 and 3 of the Note of the Chief Engineer for Irrigation printed in those Proceedings, I beg to point out that I have received no information regarding the sections and sub-sections alluded to by the Chief Engineer.

2. The Chief Engineer for Irrigation mentions these sections as something corresponding to the canals in Northern India. It would seem therefore that these sub-divisions should receive some recognition in the classification of the outlay connected with the Striviguntum Anicut system; but this of course cannot be arranged until the sub-divisions are communicated to me.

No. 444. ORDER THEREON, 27th September 1876, No. 2,574.

IRRIGATION, No. 42.

ORDERED that the Note by the Chief Engineer for Irrigation containing an explanation of the reason for the postponement of a final settlement of the sub-sections of the Striviguntum Anicut system be communicated to the Examiner of Public Works Accounts.

27th September 1966. No. 2,574.

2. A copy of the provisional list of sub-sections, as drawn up by the District Engineer, should be sent to the Examiner the Chief Engineer for Irrigation.

(True [REDACTED] tract.)

W. H. Hammond Colonel,
Offg. Under Secy. to Govt., P.W.D.

To the Examiner of Public Works Accounts.

Chief Engineer for Irrigation.
District Engineer, Tinnevely.
