*Proceedings of the Madras Government, Revenue Department,
21st April 1876.*

No. 144. Read the following Proceedings of the Board of Revenue, dated 3rd April 1876, No. 905 :—

Read the following letter from J. G. HORSFALL, Esq., Acting Collector of South Canara, to C. A. GALTON, Esq., Acting Secretary to the Board of Revenue, dated Mangalore, 13th March 1876, No. 556.

ADVERTING to the Orders of Government conveyed in their Proceedings, dated the 10th July last, No. 1,037, communicated with the Board's endorsement, dated 28th idem, No. 6,798, I have the honor to submit herewith a revised estimate supplied by the District Engineer for the additions and alterations proposed to the Collector's Office in this district, amounting to Rupees 19,600, which reduces the original estimate by Rupees 2,800.

2. I beg also to submit the District Engineer's covering letter to the address of the Secretary to Government in the Public Works Department offering an explanation on the remarks of the Chief Engineer on the original estimate.

3. With reference to paragraph 2 of the Government order, I have the honor to state that I am unable to devise any other less expensive arrangement which will obviate the dismantling of the present Treasury, unless the compactness of the building is sacrificed which is undesirable.

ENCLOSURE No. 1.

From A. C. LAWFORD, Esq., District Engineer, South Canara, to Major-General G. W. WALKER, R.E., Secretary to Government, Public Works Department, dated Mangalore, 16th November 1875, No. 54.

WITH reference to G.O., No. 270, of 27th July 1875, I have the honor to submit, through the Collector, a revised estimate for additions and alterations to the Huzoor Cutcherry at Mangalore, amounting to Rupees 19,600, duly revised in accordance with the instructions given by the Chief Engineer and Under-Secretary to Government, Public Works Department, in their Memorandums therewith printed.

2. With reference to the provision of an iron-girder in the original estimate, I have the honor to state that a masonry wall with semi-circular openings in lieu of girder would have been provided, but the Collector specially objected to this arrangement, as he wanted an iron railing a cross the whole breadth.

3. The nature of wood to be used and the number of coats of paint were detailed in the specification report which accompanied the original estimate.

	RS.	
Flooring with planks 1½ inches thick	25	4. A Memorandum showing the data or details of the rates for the items noted in the margin is herewith submitted. The details have been obtained from the actual work executed on the Court-house and Coir godown.
Roofing with rafters 6"×3", reapers and ceiling with planks, nails, machine tiles and channam borders 100 square feet	38	
Flooring with machine-made tiles on a bed of concrete, 3 inches deep	15	
Fan-light, 6 feet diameter	75	

5. I also beg to submit herewith a statement showing the details of valuation of the building in support of the item deducted from the estimate, but the rate allowed for old masonry appears to be rather too high to be realized, unless the stones can be removed without much breakage, and be such as can be either useful for the new building or would sell for a good price.

*Proceedings of the Madras Government, Revenue Department,
21st April 1876.*

6. It would appear that the rate allowed for ladders in the original estimate was rather low. The ladders are in dimensions similar to that fixed for the existing Collector's Cutcherry.
7. The original estimate, &c., is herewith returned.
