Famine Relief.

Read the following paper :—

No. 238-A. Proceedings of the Board of Revenue, dated 2nd April 1877.

Read the following letter from A. KRISHNA ROW, Acting Deputy Collector, to J. F. PRICE, Esq., Acting Collector of Cuddapah, dated Jammalamadugu, 17th March 1877, No. 76.

IN Obedience to orders from the Board of Revenue, No. 100, of 20th April 1877, I have to inform you that I have personally examined the bags in all the three grain depôts of Jammalamadugu Taluq. In almost every bag in these depôts weevils are found. It is stated that these worms existed also when the bags were first delivered by the Company's Agent. The rice in some of the bags I have examined has been damaged, as the worms have made holes in and eaten away the substance of grain to some extent. Considerable damage, no doubt, would be caused if the worms are not soon extirpated. The Proddatoor depot has been examined by the Serishtadar of the taluq and the remaining two (at Mydukoor and Tangatoor) by the Tahsildar. The result has been the same.

Extra No. 435.

FORWARDED for the information of the Board of Revenue. The state of the rice in the Jammalamadugu Division is evidently bad, but only what could be anticipated. Mr. Weekes has been requested to try the experiment of putting the bags out in the sun for a time, which is believed to be the only means of getting rid of weevils.

PULLAMPET,

Acting Collector.

SUBMITTED for the information of Government.

2. Unless the grain is taken out of the bags and spread out, exposure to the sun will do little good.
