GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

18th May 1877, No. 1,751.

Famine Relief.

Read the following paper:—

No. 359. From Surgeon-General G. SMITH, M.D., Surgeon-General, Indian Medical Department, to the Hon. D. F. CARMICHAEL, Officiating Chief Secretary to Government, dated Fort St. George, 12th May 1877, No. 279.

In forwarding the ~~accompanying~~ weekly report on the physical condition of the relief coolies employed at Nellore on the ~~reduced wage~~, I have the honor to solicit the attention of His Grace the Governor in Council to the heavy loss of infant life referred to in the penultimate paragraph as the result of starvation, and to recommend, for the early and favorable consideration of Government, that the issue be sanctioned of rolong and milk, if procurable, to the infants in relief-camps at the discretion of the Zillah Surgeon until their mothers are able to nourish them. Some such measure appears to be urgently called for, owing to the partial or entire cessation of the lacteal secretion in starved mothers, and to the pitiable condition of attenuation to which the infants are reduced. In the event of Government sanctioning the measure, I would suggest that the Commissary-General be authorized to comply with the Zillah Surgeon's indent for rolong and sugar, and also for preserved milk in cases where a sufficient quantity of fresh milk is not procurable.

ENCLOSURE No. 1.

From Surgeon-Major Æ. M. ROSS, Zillah Surgeon, Nellore, to Deputy Surgeon-General W. J. VANSOMEREN, M.D., Indian Medical Service, Presidency and Northern District, dated 30th April 1877, No. 77.

I HAVE the honor to report the result of my examination of the relief-work coolies in the neighbourhood of Nellore on the 21st instant, of the gratuitous relief people on the 21st instant, and of a new batch of relief coolies employed on road-work in the neighbourhood of Nellore examined on the 23rd instant.

RELIEF COOLIES BEFORE EXAMINED—*Men.*—Of these eleven were examined. Six had lost weight: one had lost 3 lbs., two had lost 2 lbs., one 1½ lbs., one 1 lb., and one ½ lb.

Four had gained weight: one 3 lbs., two 2 lbs., and one 1 lb.

One remained stationary.

Women.—Twenty were examined. Nine lost weight: one lost 4½ lbs., one 4 lbs., two 3 lbs., one 2 lbs., one 1½ lbs., two 1 lb., and one ½ lb.

Nine gained weight: one 4 lbs., one 3 lbs., four 2 lbs., and three ½ lb.

Two remained stationary.

Boys.—Six were examined. Two had lost weight to the extent of 2 lbs. each.

Four had gained weight: one 2½ lbs., one 2 lbs., one 1½ lbs., and one 1 lb.

Girls.—Seven were examined. Five gained weight: one (a girl of twelve years of age) 7½ lbs., one 2 lbs., [illegible] lbs., and one 1 lb.

Two remained stationary.

RELIEF COOLIES NOT BEFORE EXAMINED—*Men, Women, and Children.*—Table of weights, &c., appended. Those examined were mostly in tolerable condition, although no fair deductions can be drawn until further examinations can be made. Many of the most robust coolies absented themselves I believe under the fear that they would be sent to the East Coast Canal "with a view to their

deportation to Burmah." Almost all were below the proper proportion of weight to height. I noted particularly Nos. 25, 27, 31, and 36 on the list of men who were very thin, almost emaciated, with harsh, dry skin. On the women's list Nos. 2, 11, 13, 17, 23, 26, 32, and 33 looked very bad, the last particularly so. All of them were anæmic with much wasting of the muscular substance, and these were young women with one exception (No. 26) in the prime of life. The weight of the boys and girls also was much below what it should be. Some of them looked in good, others in tolerable condition, but the majority of them were anæmic with harsh, dry skin.

RELIEF-HOUSES—*People.*—The increased scale of diet (20 oz. of rice, &c.) [illegible] on the whole to have made itself beneficially felt.

Seventeen were examined. Of these ten gained weight: one 5½ lbs., three 5 lbs., one 4 lbs., one 3 lbs., one 2 lbs., two 1 lb., and one ½ lb.

Four lost weight: one 5 lbs., one 1 lb., and two ½ lb.

Three remained stationary. Some of these gratuitously-fed people still manage to escape and beg in the towns, and among these are some of those who were examined. The amount of food they obtain in this way cannot, of course, be calculated.

Two of those formerly weighed (Nos. 2 and 3) were sent to hospital, having fallen ill with dysentery and become much reduced.

In connection with these examinations and their objects, I may mention that large admissions are now beginning to take place in to the relief-houses and on relief works. The numbers in the Nellore Relief-house have suddenly risen from a little over 300 to over 1,100, and the same thing is taking place over almost every part of the district. This is due partly to the abolition to a considerable extent of local relief-works, partly to other causes.

It will be remembered that in one of my earlier reports I stated my belief that most of the poorer cultivators even had some reserves of grain (likely to be soon exhausted) on which they lived, or with which they eked out their famine wages. The Nellore Tahsildar, who is a very intelligent, hard-working man, told me when I visited the northern relief-camp on Saturday that he believed the great influx of applicants for gratuitous relief or for employment on relief-works was due to the final exhaustion of the stores of grain on which the people had been living wholly or in part. Many of the wealthier ryots have hitherto been feeding their cultivators in whole or in part from the stores of grain which they had laid by in the hope that timely showers would even now have admitted of cultivation being carried on. But of this they now despair, as no rain has fallen since the 31st March and the hot winds have begun to set in, after which they believe that no rain will fall for at least six weeks (rain fell, however, last year five times in May).

They are, therefore, hopeless of being able to accomplish anything of importance in the way of cultivation, and are dismissing their coolies to obtain support as best they may on relief-works or otherwise.

The numbers of famine patients brought to hospital are also increasing. This is doubtless due, in some degree, to improved village inspection, but it is also due in great part undoubtedly to increasing want. In the Civil Hospital, Nellore, alone 901 famine patients were admitted during the month of April, of whom 89 died of disease induced by absolute starvation.

On the other hand the raggy crop has come forward in some parts, and cholum is being harvested in the neighbourhood of Nellore. As both of these grains are more nutritious than rice, and even now much cheaper, it may be expected that relief coolies feeding on these grains will continue to do well on their present wages. But the amount of raggy and cholum likely to come into the market is small, and will not likely last long, and then I look to a rapidly-increasing pauperism and death-rate.

Even now the mortality among infants at the breast is very high. One of almost the first effects of insufficient food in the suckling mother is the cessation of the lacteal secretion, and the effect is pitiable. Scores of nursing mothers have come to the relief-house here or to the hospital, whose milk secretion had wholly or partially stopped. In those cases where it had not ceased it had become watery and unfit to support the infant life.

The children were almost all reduced to perfect skeletons and blanched almost to whiteness. The secretion in almost all the mothers was restored after a few days of good feeding, and a large number of the infants recovered wonderfully.

Municipal Dispensary Nellore
30th April 1877

From -

Assistant Surgeon M. Ross Esquire
Relief Surgeon
Nellore.

To

Surgeon Major
Superintending Civil
Medical Officer
Presidency & Sub Dist.
Madras

Sir,

I have the honor to report the result of my Examination of the Relief work Coolies in the neighbourhood of Nellore on the 21st inst. of the gratuitous Relief people on the 21st instant and of a new batch of Relief Coolies employed on road work in the neighbourhood of Nellore examined on the 23rd instant

Relief Coolies first examined -

Of these seven were examined - Six had lost weight - one had lost 3 lb, two had lost 2 lb, one 1½ lb one 1 lb and one ½ lb

Seven had gained weight, one 3 lb, two 2 lb and one 1 lb

One remained Stationary

Women. Twenty were examined.
Nine lost weight, one lost 4 1/2 lb
one 4 lb, two 3 lb, one 2 lb, one 1 1/2 lb,
one 1/2 lb.

Nine gained weight
one 4 lb, one 3 lb, four 2 lb and
three 1/2 lb.

Two remained Stationary

Boys Six were examined
Five lost weight to the extent
of 2 lb each.

One had gained weight
one 2 1/2 lb, one 2 lb, one 1 1/2 lb and
one 1 lb.

Girls Seven were examined
Five gained weight one (a girl of
12 Years of Age) 7 1/2 lb, one 2 lb
two 1 1/2 lb and one 1 lb

Two remained Stationary

Cities/Coolies & others examined — Men-Women-Children

Table of weights suspended. Those unable to walk unassisted in consequence of weight & condition after weighing & examination deducted & can be examined with further examinations can be made. Many of the Merchant Coolies absented themselves I believe under the fear that they would be sent to the East Coast Canal "with a view to their deportation to Burmah." Almost all were below the proper proportion of weight to height. Particularly as Nos 25, 27, 31, and 36 on the list of Men, who were very thin almost emaciated, with harsh dry skin. In the Women's list Nos 2, 11, 13, 17, 23, 26, 32, and 33 look very bad, the last particularly so, all of them were anemic, with much wasting of the muscular Substance

are some of those who were examined. The amount of food they obtain in this way cannot of course be calculated.

Two of those formerly weighed (Nos 2 & 3) were sent to Hospital having fallen ill with Dysentery & become much reduced.

In Connection with these examinations & their objects. I may mention that the admissions are now beginning the relief Houses & on relief works. The numbers in the Nellore relief House have suddenly risen from a little over 300 to over 1100 & the same thing is taking place over almost every part of the District. This is due partly to the abolition of a Considerable Extent of local relief works partly to other Causes.

It will be remembered that in one of my Earlier reports I stated my belief that most of the poorer Cultivators were dependent for the reserves of grain likely to be soon Exhausted on which they lived or with which they effected their Famine wages. The Nellore Tahsildar who is a very intelligent hard working European told me when I visited the Northern Relief Camps on Saturday that he believed the great influx of applicants for gratuitous relief on relief works was due to the exhaustion of the Stores of grain on which the people had been living wholly or in part. Many of the wealthier Ryots have hitherto been feeding their Cultivators in whole or in part from the Stores of grain which they had laid by in the hope that timely Showers would [illegible]

[illegible] and Children of any two years of age (about 26) in the prime of life - their weights of the boys and girls also was much below [illegible] Some of them looked in good, others in tolerable Condition but the majority were Anæmic with harsh dry Skin.

Relief Houses } The increased
People } Scale of diet (20 Oz of rice &c) would seem to have been probably Ample.

Seventeen were examined - Of these two gained weight one 5½ lb, three 5 lb one 4 lb, one 3 lb one 2 lb, two lb and one ½ lb. Four lost weight one 5 lb, one 4 lb, three lb, and two ½ lb. Four remained stationary - Four of these [illegible] probably [illegible] [illegible] and [illegible] and among these

[illegible] Dhan as we saw the
[illegible] the S.E. Wind & the hot winds have
[illegible] after which they believe that the
rain will fall for at least six weeks (Rain fell
in same last year 5 times in May)

They are therefore hopeless of being
able to accomplish any thing of importance in the
way of cultivation & are dismissing their Coolies to
obtain support as best they may on relief works or
otherwise.

The numbers of Famine patients
brought to Hospital are also increasing. This
is doubtless due in some degree to improved
village inspection, but it is also due in great
part undoubtedly to increasing want. In the
Hospital alone 901
famine patients were admitted during the month
of April of whom 89 died of disease in-
duced by absolute Starvation.

On the other hand the Raggy
Crop has come forward in some parts and
Cholum is being harvested in the neighbourhood
of Bellary. As both of these grains are hard
[illegible] contain less water than rice & even more [illegible] than
[illegible] may be expected that Relief Coolies feeding on
[illegible] grains will continue to do well on their
[illegible] as soon as the Removal of Raggy & cholum
[illegible] into the Market in small quantities
[illegible] only last long & then check to a rapidly
[illegible] increasing number & death rate
[illegible]

- infants at the breast is very high. One of al-
=most the first effects of insufficient food in
the Sucking Mother is the Cessation of the Lacteal
Secretion & the effect is pitiable. Scores of Nursing
Mothers have Come to the relief house here or
to the Hospital, whose Milk Secretion had
wholly or partially stopped. In those cases where
it had not Ceased it had become watery &
- fit to support the infant life.

The Children were almost all reduced
to perfect Skeletons & blanched almost to white-
=ness. The Secretion in almost all the Mothers
was restored after a few days of good feeding &
a large number of the infants recovered
wonderfully
