News:

The report of the Chief  
Engineer for Irrigation  
to his friend the Gov.  
question is circulated  
for order whether Para  
2 shall communicate  
to the B. of Nat. for the  
guidance of Col. W.  
He is in the concern  
has not sent up to  
Gov. for decision  
whether it is signed  
by the Chief Engineer  
or not.

Memorandum

The proper height of a tank bund above maximum water level depends upon the depth of water, the waterspread and the direction of prevailing strong winds, and to some extent also upon the slope of the pavement. Large reservoirs often require for their safety a margin of 6 to 8 feet otherwise the water washes over.

2. Apparently it would be advisable that the Tank Estimate referred to, and other similar estimates, if beyond the limits of local sanction, should be submitted to this office for disposal in the usual course. When the submission of estimates is not emergent that sanction should be accorded in the Public Works Dept.

and the sanction of execution  
of the work from famine relief  
funds may then be given when  
necessary.

Peragunur Tank - Salem  
 Dist. - Memo. regarding the  
 proper height of a tank bund above  
 M.W.L. with remarks.

Forwarded

Collectors are directed not  
 to commence repairs  
 of Tanks & ~~other~~ <sup>when such repairs</sup>  
 relief works when such works  
 involve the raising of the bunds  
 or water levels beyond  
 their original section or  
 limit, without the  
 estimates having been  
 previously submitted  
 to the Chief Engineer for  
 Irrigation
