GOVERNMENT OF MADRAS.
REVENUE DEPARTMENT.

4th June 1877, No. 1,880-A.

Famine Relief.

Read the following paper:—

No. 22-A. Proceedings of the Board of Revenue, dated 26th May 1877.

Read the following letter from Conductor H. FARLEY, Commissariat Department, to J. F. PRICE, Esq., Acting Collector of Cuddapah, dated Royachoti, 9th May 1877, No. 2.

HAVING carefully examined the Government reserve rice in Royachoti Taluq, I beg to report as follows.

2. The rice is stored in three places, viz., Royachoti (main store) 15,239 bags, Chinna Maudem 144 bags, Sundupalli 241 bags.

3. In Royachoti nine places are taken up as store-rooms, each containing the

In Streenivassa Row's house and in Patha Royachoti there are, respectively, one and two bags of rice damaged.

4. In the other places in Royachoti the rice was all good.

5. In Chinna Maudem the rice was all good, none of it being damaged either by insects or damp.

6. In Sundupalli one bag had damaged rice in it and one was eaten by white-ants. Here the grain dropping from the other bags was put into an empty bag and nearly filled it.

7. The total number of bags damaged is twenty-three and that of bags attacked by white-ants fifty-three. This latter quantity has, however, been refilled into fresh bags.

8. The rice is in good condition in all the stores, with the exceptions noted below.

9. In Ootam Prasad's house it is of a very inferior quality, but not damaged. In Streenivassa Row's house it is partly of an inferior quality, but here also it was not spoiled.

10. I have to note again that the rice is packed too closely, and to suggest that the bags be arranged in lines with a space between each two lines, so that every bag may be examined in its place and have free ventilation about it. Access to every bag will also keep the grain free of vermin and enable any fault to be soon detected. I would further recommend that soap-sand (called *soudu*, commonly used by washermen) be sprinkled all over the bags and about the ground to keep away insects.

11. There are two bags stated to be in a village called Nulivedu. These I did not think it necessary to examine.

Extra No. 1,095.

FORWARDED for the information of the Board of Revenue. The condition of the rice in the Royachoti Taluq appears to be on the whole good, and Mr. Farley seems to have made a careful examination of it. I request the favor of orders as to what to do with the rice of inferior quality. Mr. Farley does not give the number of bags of this. The two bags at Nulivedu might be sold or otherwise disposed of. Nothing can be gained by keeping them where they are, and returning them to the main depôt will only cost money. The Acting Sub-Collector will receive instructions to carry out the suggestions of Conductor Farley, and to cause such rice as is unfit for consumption to be destroyed.

LAKKIREDIPALLI,
14th May 1877.

(Signed) J. F. PRICE,
Acting Collector.

SUBMITTED for the information of Government.

2. The rice of inferior quality, it is expressly stated, was not spoiled, and it is presumed to be fit for consumption. It should therefore be kept with the rest.
