No. 657. Proceedings of the Board

Read the following letter from W.
intendent, Government Farms;
the Board of Revenue, dated
No. 510:—

dated 16th June 1877.

TSOON, Esq., M.A.A.C., Super-
STOKES, Esq., Secretary to
ment Farm, 12th June 1877,

In their Order No. 797, of the 14th of 1876, Government directed that the Agricultural Exhibition (proposed to be held in 1876) should be held in 1878. If it is still intended to hold the exhibition in 1878, it is, I think, very desirable that the prize list should be published as little delay as possible. A revised prize list was submitted to the Board by my letter No. 205, of the 21st of April 1875.

2. It might be thought that an Exhibition is but just recovering from the disastrous time; and so it would be, if the Exhibition were mammoth maize cobs, gigantic tobacco, proposed Exhibition is to be of quite a different character and is intended chiefly for educational purposes; the prizes offered bring together for comparison specimens of produce of the Presidency.

time when our rural districts are a long drought would be ill-tended to be simply a show of overfed farm stock. But the character and is intended chiefly to imply the means employed for different ordinary agricultural

3. It would not, I think, be well, if to bring together any live-stock, as diseased country.

Exhibition is to be held, to attempt prevalent in all parts of the

4. That portion of the proposals with reference to live-stock should, I think, stand over until another year. This would, of course, reduce very materially the extent of the original scheme; but such an exhibition, coupled with an Agricultural Conference at which papers might be read, would effect much good at but a trifling cost to Government.

5. One of the best features of the last Agricultural Exhibition was the attendance at it of many District Officers and their subordinates from the special facilities afforded them by Government for visiting the Exhibition; but, unfortunately, no attempt was made to elicit information from the officers, and many of them might have been able to afford most valuable agricultural information regarding the districts.

Exhibition in the spring of next year, the north-east monsoon; and, as the crop is seldom reaped until the year than the time at which Exhibitions have usually been held during Easter week would

6. Of course, the produce to be exhibited in the spring of next year could be only that of the current year, seeing that the crop of this portion of the country is not ready until February, the Exhibition could not be held at a more suitable time.

7. It has been found that Agriculture in this country in directing attention to the subject is slight is the interest that is generally insufficient are the agencies at work

have much effect in this important—seeing how few and
