GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

2nd July 1877, No. 2,171.

Read the following papers:—

No. 3. Proceedings of the Board of Revenue, dated 1st May 1877, Miscellaneous No. 6,273.

Read the following letter from R. DARMA ROW, Deputy Collector in charge of Salt Department, Ganjam, to C. G. MASTER, Esq., Collector of Ganjam, dated 7th April 1877, No. 84.

In forwarding, for your information, reports received from the Salt Superintendents, I have the honor to state that the rain which fell in the several divisions as per margin will stop the salt manufacturing operations for a fortnight.

	March 1877.				April 1877.		
	28th.	29th.	30th.	31st.	4th	5th	7th.
Ganjam	2 oz.	4 oz.	1 oz.	2 In.	1 oz.	2 In.	5 oz.

Womeravally ..	...	...	2	,, ...	...	...	...

2. A general report with regard to the unseasonable rain from the commencement will shortly be submitted.

No. 2,234.

Submitted to the Board of Revenue.

2. The unusual rains which have fallen during the past fortnight have interfered much with the manufacture, especially at Ganjam, where there is practically no stock in hand.

3. The total salt revenue for the district during the past official year amounted to Rs. 21,80,503, or Rs. 1,80,514 in excess of 1875-76. It is much to be regretted that the prospects for the current year should be so far of a less satisfactory character.

Chetterpore,
9th April 1877.

(Signed) C. G. MASTER,
Collector.

No. 3-A. Proceedings of the Board of Revenue, dated 5th June 1877, No. 2,598.

Read the following letter from R. DURMAROW, Deputy Collector in charge of Salt Department, to C. G. MASTER, Esq., Collector of Ganjam, dated Chetterpore, 26th April 1877, No. 85:—

WITH reference to my letter, dated 7th April 1877, No. 84, I have the honor to submit a statement showing the rainfall in the salt divisions of Ganjam, Nowpada, and Womervilly, and to report upon the disastrous effect which it has had upon the salt manufacture this year.

2. In October and November the salt bunds were repaired and a good supply of brine secured in time. The preparation of beds commenced as soon as the agricultural operations, which were in most cases a hinderance, admitted of the manufacturers entering the pans, *i.e.*, about the end of December. The work was thus progressing till the 12th of January when it rained. This rainfall, though not heavy, was general, and threw the work back to some extent. The manufacturers had to wait till the pans dried when the work was resumed, and the crystallizing beds were almost puddled and prepared, but about the beginning of February the weather again changed and it rained from the 4th to the 13th. The rainfall this time was, as may be observed from the statement enclosed, more general and heavier, especially at Ganjam and Nowpada, which caused the cessation of work for a fortnight. The manufacturers, who as a body belong to the agricultural classes, took this opportunity and employed themselves in the cultivation of dry crops. There was some difficulty in getting them [illegible]s. Endeavors were however made, the manufacturers worked hard [illegible] made good the time lost by the unseasonable rain, so th[illegible] began to form at Ganjam on the 12th, Nowpada on the 28th, and Womervilly on the 6th of March. The work was advancing till the 28th when for the third time it began to rain as if the monsoon had set in. Between the 28th and the 7th of the next month was gauged upwards of 5 inches and 6 oz. at Ganjam. This rain was also general but heavier at Ganjam, where supplemented as it was by the surplus water from the Biridy and Homma lands it threw the division work back more than at the other divisions. Both on this and the previous occasions the weather was cloudy for several days and the season adverse to salt culture. The manufacturers were again obliged to stop their work, and that too for a long time. Disheartened at this, they betook themselves to their agricultural pursuits and were with much difficulty prevailed upon to resume the work. The weather seems to have taken a favorable turn lately. Salt is again forming in all the works, and if there be no heavy rains before long I think there will be no difficulty in making salt sufficient to meet the demand till we get the next crop.

3. (*a*). There are about 300,000 maunds of old salt in store at Nowpada where the natural facilities existing for the concentration of brine having in time (October) been availed of, about 1,00,000 maunds of new salt have, with all the impediments thrown by the rain, been already produced.

(*b*). At Womervilly 15,000 maunds have been manufactured, which we are however obliged to issue to traders. The old stock was more speedily taken away than I anticipated, owing partly to the improvement in the quality of the article, and partly to the cessation of sales at the Northern Depôts of the neighboring district of Vizagapatam for want of stock.

(*c*). At Itchapore, where for the reasons recorded in my letters, dated 24th November 1875 and 20th November 1876, Nos. 255 and 248, respectively, the manufacture has been stopped as a temporary measure, there is a stock of 150,000 maunds. The sales have fallen off, but the stock would go a good way to supplement the outturn at Ganjam should there be any more unseasonable rain throwing the work back.

(*d*). It will be observed that there has been more rain at Ganjam, the damage done by it is equally great, so that not more than 20,000 maunds have been made, while the sales increased owing as well to the improvement in the quality of the article as to the removal of the restrictions imposed upon its transit into Orissa. The sales are not stopped, the new crop being issued to traders.

4. The manufacture at Ganjam and Womervilly last year not only commenced as early as possible, but was brought down to the commencement of the rains, so that the outturn of the former was 295,311 maunds and of the latter 239,726 maunds, but as stated above the whole of the stock was taken away by the end of March.

5. As there have been early rains this year, it is not unlikely that the rainfall in July and perhaps in August also may be so slight as to admit of the manufacture being prolonged, in which case I propose to continue the manufacture and shall, if necessary, apply for the retention of the extra guards for a month or two more than the time usually allowed.

CHETTERPORE,
26th April 1877.

(Signed) R. DURMAROW,
Deputy Collector.

(True Copy.)

(Signed) C. G. MASTER,
Collector.

No. 1,583.

SUBMITTED to the Board of Revenue in continuation of this office foot-note, dated 9th ultimo, No. 2,234, on the Salt Deputy Collector's previous letter.

2. The remark in paragraph 5 corroborates to a certain extent the idea of a failure in the coming monsoon alluded to in my letter, dated 27th April 1877, No. 1,475.

(Signed) C. G. MASTER,
Collector of Ganjam.

CHETTERPORE,
2nd May 1877.

SUBMITTED for the information of Government.

2. The Board regret to learn that the season in Ganjam has been so unfavorable for salt manufacture. The Deputy Collector writing on the 26th April states that the whole stock at Ganjam and Womervilly had been sold off, and that the produce of the present season is being issued to traders, the quantity manufactured at the former place being only 20,000 maunds and at the latter 15,000 maunds, or not a month's supply at either station. At Nowpada there were four lakhs of maunds, of which one lakh was new salt, and at Itchapore, where the sales have almost entirely ceased owing to the increase in the rate of duty, there was a lakh and a half of maunds in store. The figures according to the account current for April are marginally noted; they show that the total quantity in store in the district was insufficient for six months' consumption calculated on the average of the past three years, and the demand is on the increase; it further appears that the stocks at Ganjam and Womervilly were nearly exhausted, and that the wants of the district must chiefly be met from Itchapore and Nowpada. The Collector of Ganjam will be called upon by telegram to report the actual quantity in store at each station, and the prospect of securing a further supply before the season closes. Manufacture should, of course, be continued to the latest possible date, and in the event of a deficiency being inevitable the Collector will lose no time in reporting the exact position of affairs that steps may be taken to supplement the stock from elsewhere; this must be done in July or August, and timely notice should be given.

To

C. G. Master Esquire

Collector of Ganjam

Dated Camp Chatterpore 26th April 1877

Sir

With reference to my letter dated 7th April 1877 No 84, I have the honor to submit a Statement showing the Rainfall in the Salt Divisions of Ganjam, Narasapatah & Vizianagram

and to report upon the detrimental effect which it has had upon the salt manufacture this year

2 In October and November the salt lands were repaired and a good supply of brine secured in time. The preparation of leads commenced as soon as the agricultural operations which were, in most cases, a hindrance admitted of the manufacturers entering the pans, i e, about the end of December. The work was thus progressing till the 12th of January, when it rained. This rainfall though not heavy, was general and threw the work back to some extent. The manufacturers had to wait till the pans dried when the work was resumed & the crystallizing of leads

Sudo were almost puddled and
prepared, but about the beginning
of February the weather again changed
and it rained from the 4th to the 13th.
The rainfall this time was, so may
be observed from the statement enclosed,
more general and heavier especially at
Gayaum and Nalupattah which caused
the cessation of work for a fortnight.
The manufacturers who as a body
belong to the agricultural classes,
took this opportunity and employed
themselves in the cultivation of dry
crops. There was some difficulty in
getting them to re-enter the frame.
Endeavours were however made, the
manufacturers worked hard and
to some extent made good the time
lost

lost by the unseasonable rains
that last began to form about Gayaum
on the 12th Nawpadah on the 28th and
Domerilly on the 6th of March the
work was advancing till the 28th when
for the 3d time it began to rain as
if the monsoon had set in. Between
the 28th and the 7th of the next month
was gauged upwards of 5 inches and
6 at Gayaum. This rain was also
general but heavier at Gayaum, where
supplemented, as it was, by the
Surplus water from the Biridy and
Hemma Lando, it threw the Division
work back more than at the other
Divisions. Both on this and the
previous occasions the weather
was cloudy for several days and
the

the season adverse to salt culture the
manufacturers were again obliged
to stop their work and that too for a
long time. Disheartened at this, they
betook themselves to their agricultural
pursuits and were with much difficulty
prevailed upon to resume the work.
The weather seems to have taken a
favourable turn lately. Salt is
again forming in all the works
and if there be no heavy rains upon
long & thick there will be no
difficulty in making salt sufficient
to meet the demand till we get the
next crop,

3 (a) There are about 300000 c.
Maunds of old salt in store at
Nawpadah

Nampadah where the natural facilities
existing for the concentration of brine
having in time[x] been availed of, about
100000 maunds of new salt have, with the
all the impediments thrown by the
Rain, been already produced

[x] October

(b) At Pomeranilly 15000 maund.
have been manufactured which we
are however obliged to issue to traders.
The old stock was more speedily
taken away than I anticipated,
owing partly, to the improvement
in the quality of the article, and partly
to the cessation of sales at the Northern
Depôts of the neighbouring Districts
of Vizagapatam for want of stock

(c) At Itchapore, where, for
the reasons recorded in my letters
dated

dated 24th November 1875 and 20th Jany
1876 Nos 255 & 248 respectively, the
manufacture has been stopped as
a temporary measure, there is a stock
of 150000 maunds. The sales have
fallen off but the stock would go
a good way to supplement the
outturn at Gayam, should there
be any more unfavourable rain
thinning the work back.

(d) It will be observed that
there has been more rain at Gayam,
the damage done by it is equally
great so that not more than 20000
maunds have been made while
the sales increased among as well
to the improvement in the quality

of

of the article, as to the removal of the restrictions imposed upon its transit into Orissa. The sales are not stopped, the new crop being issued to traders

4 The manufacture at Ganjam and Vizagapatam last year not only commenced as early as possible but was brought down to the commencement of the rains so that the outturn at the former was 29,5311 maunds and at the latter 239736 maunds but as stated above the whole of the stock was taken away by the end of March.

5 As there have been early rains this year, it is most unlikely that the rainfall in July and perhaps in August also may be so slight as to admit of the manufacture being prolonged, in which case I propose

propose to continue the manufacture and shall if necessary, apply for the retention of the extra guards for a month or two more than the time usually allowed

No 1583

Submitted to the Board of Revenue in continuation of this office foot note dated 9th Ultimo No 2234 on the Salt Dy Collectors previous letter

2 The remark in paragraph 5 corroborates to a certain extent the idea of a failure in the Ganjam rains also alluded to in my letter dated 27th April 1877 No 1475

No. 84. From The Dpty Collector in charge Sale Department Gunjam.
To C.S. Master Esquire
Collector of Gunjam

Dated Gunjam 7th April 77.

Sir,

In forwarding for your information the enclosed Memo. of Sales &c. I have the honor to state that the rains, which fell in the several Divisions as per margin, will stop the salt manufacturing operations for a fortnight.

2 A general report with regard to the unseasonable rains from the commencement will shortly be submitted.

No. 2234 Submitted to the Board of Revenue.

2. The unusual rains which have fallen during the past fortnight have interfered much with the manufacture especially at Gunjam where there is practically no stock in hand.

3. The total salt Revenue for the District during the past official year amounted to Rs 21,80,508 or Rs 69574 in excess of 1875-76. It is much to be regretted that the prospects for the current year should be so far of a less satisfactory character.
