GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

6th August 1877, No. 2,446-A.

Famine Relief.

Read the following paper :—

No. 56-A. Proceedings of the Board of Revenue, dated 27th July 1877,

Read the following letter from R. W. BARLOW, Esq., Collector of the Chingleput District, to C. A. GALTON, Esq., Acting Secretary to the Board of Revenue, dated Sydapet, 23rd July 1877, No. C.

ADVERTING to paragraph 1 of G.O., dated the 18th instant, No. 2,237-A, and as previously promised demi-officially, I have the honor to forward, for the information of the Board, a sketch map (to be returned) showing the works I proposed to put in hand by the Revenue Department in the various taluqs to afford employment for the very large bodies of coolies who will be discharged from the Railway works during this and the ensuing month. The Board will observe that the works are well dispersed throughout each taluq, and, in selecting them, I have considered the position of unfinished works already sanctioned, and which have been shown in the map submitted to the Board weekly. The great bulk of works selected are agricultural repairs.

2. As regards the Madrantacum and Chingleput Taluqs, I have been only able to fill in a few, as the Sub-Collector's proposals are general, but I enclose copy of his letter explaining his views. The Board are, moreover, aware that a considerable number of works (river channels, &c.) are in progress in these taluqs, and will afford employment even after the Railway works are completed.

3. That plenty of work should be ready is a matter of the first importance, and I should be glad of the assistance of the Public Works Department at the present crisis to help me in preparing estimates for these works. I have no desire to refer to past misunderstandings with the Superintending Engineer, which have been laid by the Board before Government, beyond observing that I have received no single estimate as yet, and that at a time of such urgent pressure the skilled establishment in the district should, I think, be more utilised. The carrying out of ordinary repair works I find easy enough, but reliable estimates are wanted, and special establishment is weak, and, with the exception of Mr. Supervisor Fox, without high professional qualifications.

4. The Board will further note that the outlay on agricultural repairs will have to be adjusted hereafter between famine and the ordinary expenditure, and this will, I presume, be done by the Public Works Department, and the position will be this: estimates prepared by the special establishment and execution by the Revenue Department will probably be taken exception to by the very department that could have obviated such errors by affording skilled assistance in the first instance when estimating and laying out the works.

5. If the Board concur in my view, I would suggest that orders may be issued to the Superintending Engineer by the Public Works Department to specially depute some of his subordinates temporarily to prepare these estimates and send them to me, or, if this is considered unadvisable, that a couple of really good Supervisors may be transferred to this district for, say, a month. Meantime I am doing my best with the special establishment at my disposal, and enough work of some kind shall be forthcoming under any circumstances; though I may possibly have to commence some earthwork in anticipation of estimates.

6. I must add, in conclusion, that the list of the Sydapet Taluq, submitted some time since by the Deputy Collector in charge, was forwarded to the Superintending Engineer on the 18th ultimo with my No. 429, with a request that he would furnish me with estimates for such of the works as he could not carry out from the ordinary allotments this year, in view to my executing them "at once from Famine Relief Funds," but I have not as yet received a reply.

Collector.

ENCLOSURE No. 5.

From S. T. McCARTHY, Esq., Acting Sub-Collector, to R. W. BARLOW, Esq., Collector of the Chingleput District, dated 19th July 1877, No. 543.

As requested by you yesterday, I beg to recommend the undermentioned works for execution, from Famine Relief Funds, in the Conjeveram and Chingleput Taluqs when the Railway works at present in progress come to a close.

2. *In Conjeveram Taluq*—

(1.) Gravelling of the road newly formed between Conjeveram and Magaral (9 miles).
(2.) Do. do. do. do. Sunkawar Choultry to Madura Mangalam (5½ miles).
(3.) Do. do. do. do. Madura Mangalam to Karandur (6½ miles).
(4.) Do. do. do. do. Sogundi to Kilcheri (5 miles).
(5.) Gravelling and completion of the unfinished portion of road between Kuam and Thandalam.
(6) Repair of the Kuam Tank, estimate for which, amounting to Rs. 8,745, [illegible] lately sanctioned by Government.
(7.) Repair of river channels from the Palar.
(8.) [illegible] of other irrigation tanks.

3. *In the Chingleput Taluq*—

(1.) Gravelling of road newly formed between Vendalur and Kelambakam (12 miles).
(2.) Earthwork and gravelling of road between Chingleput and Valliveram (9 miles).
(3.) Do. do. do. Singaperumal Covil and Villiambakam.
(4.) Do. do. do. Tiruporur and Kelambakam.
(5.) Clearing of last five miles of East Coast Canal between Sadras and the Palar.
(6.) Repair of the Olalur group of tanks near Chingleput.
(7.) [illegible] of other tanks in the taluq.
(8.) Do. of some of the Palar channels.

4. I now merely give a rough statement of the works which I think would be most suitable. I should certainly recommend the gravelling of all the roads already formed from the Famine Relief Funds. Unless this be done the works already executed will be useless. I have no doubt that the Local Fund Board will be in a position to maintain the 50 miles or so of new roads which have been started during the last few months.

5. It will only involve an increase of expenditure of some 5,000 or 6,000 Rs. per annum, which I think the Local Fund Board will be able to bear.

6. As I know that this report is emergently wanted, I resolve to lose no time in making the above suggestions. I am unable to enter into details, or to give even an approximate estimate of the cost of any of the works without professional advice. I expect to meet the Range Officer on Monday next, and, after consultation with him, will submit more detailed proposals on the relief-works which should be undertaken.

7. You informed me that you had asked the Madrantacum Tahsildar to forward to you direct proposals in connection with relief-works to be undertaken in that taluq, and I shall not therefore dwell on this point any further than to observe that I have in view some very important irrigation repairs, in regard to which I shall submit proposals very soon on the receipt of fuller information.

SUBMITTED to Government with reference to G.O., 13th July, No. 2,237-A.

2. The lists of works requiring repairs submitted by Mr. Barlow show how much there is to be done in Chingleput in the way of agricultural repairs, and how usefully the poor of the district might have been employed hitherto had these repairs been undertaken at an earlier period.

3. The Board are glad to learn that ample employment will be available, and it is satisfactory to note a preponderance of tank repairs in the lists of projected works. They would suggest that one or two officers possessing the requisite professional knowledge and qualifications should be temporarily placed under Mr. Barlow's immediate orders for the preparation of estimates, as it appears that up to date the Superintending Engineer has failed to furnish any, and that a letter addressed to him on the 18th June had elicited no reply by the 23rd July.

(A true Copy and Extract.)

(Signed) C. A. GALTON,
Acting Secretary.

No. 56-B. ORDER THEREON, 6th August 1877, No. 2,446-A.

Miscellaneous.

The lists of irrigation repairs submitted by the Collector are approved, but though, no doubt, very useful, they are not so well fitted for the employment of large numbers as the clearing of the Coast Canal from Sadras to the Adyar river, a work which has been ordered to be taken in hand by the District Engineer in the Public Works Department and can be commenced at once, if necessary, on the discharge of the laborers now working on the Conjeveram-Chingleput Railway.

2. Colonel Moberly will be directed in the Public Works Department to afford the Collector all needful assistance in enabling work to be begun on the irrigation repairs already alluded to by sending him estimates, or subordinates to prepare them and supervise the works, or both.

Lists of Irrigation Repairs proposed with view of affording employment in Chingleput trict when the Railway Works are completed. Passing orders on Proceedings of the Board Revenue submitting —

Revenue Department

No. 3520.

Proceedings of the Board of Revenue
Dated 27th July 1877.

Read the following:—
No C.

From R. W. Barlow Esqre
Collector of the Chingleput Dt.

To C. A. Galton Esqre
Ag. Secretary of the Bd. of Revenue
Madras.

Sir,

Adverting to para 1 of G. O. dated the 18th Instant No. 2237 C.A. and as previously promised demi-officially, I have the honor to forward for the information of the Board, a sketch map showing the works I propose to put in hand by the Revenue Department in the various taluqs, to afford employment for the very large bodies of coolies, who will be discharged from the Railway works during this, and the ensuing month.

To be returned

The

The Board will observe, that the works are well dispersed throughout each taluq, and in selecting them I have considered the position of unfinished works already sanctioned, and which have been shown in the map submitted to the Board weekly. The great bulk of works selected are agricultural repairs.

2. As regards the Madurantacum and Chingleput Taluqs, I have been only able to fill in a few, as the Sub-Collector's proposal are general, but I enclose copy of his letter explaining his views. The Board are moreover aware that a considerable no. of works — river channels &c — are in progress in these Taluqs, and will afford employment even after the Railway works are completed.

3. That plenty of work should be ready is a matter of the first importance, and I should be glad of the assistance of the D.P.W. at the present crisis to help me in preparing estimates for these works. I have no desire to refer to past misunderstandings with the Superintending Engineer, which have been taken by the Board before Government, beyond observing that I have received no single estimate as yet, and that at a time of such urgent pressure, the skilled establishment in the District should, I think, be more utilized. The carrying out of ordinary repair works I find easy enough, but reliable

Col. W [illegible]

reliable estimate are wanted, and special establishment is weak, and with the exception of Mr. Supervisor Fox, without high professional qualifications

4. The Board will further note, that the outlay on agricultural repairs will have to be adjusted hereafter, between Famine and the ordinary expenditure, and this will I presume be done by the D.P.W. and the position will be thus:- Estimates prepared by the Special Establishment, and execution by the Revenue Department, will probably be taken exception to by the very department that could have obviated such errors by affording skilled assistance

in

in the first instance, when estimating and laying out the works.

5. If the Board concur in my view, I would suggest that orders may be issued to the Superintending Engineer in the P.W.D., to specially depute some of his subordinates temporarily, to prepare these estimates and send them to me, or, if this is considered unadvisable, that a couple of really good supervisors may be transferred to this District for say a month. Meantime I am doing my best with the special establishment at my disposal, and enough work of some kind, shall be forthcoming under any circumstances, though I may

possibly

possibly have to commence some earth work in anticipation of Estimates.

6. I must add in conclusion, that the list of the Sydapet Taluq, submitted some time since by the Deputy Collector in charge, was forwarded to the Superintending Engineer on the 15th Ultimo with my No. 429, with a request that he would furnish me with estimates for such of the works, as he could not carry out from the ordinary allotments this year, in view to my sanctioning them at once from "Famine Relief funds", but I have not as yet received a reply.

Chingleput Coll.r's Office Saidapet 23rd July 1877

I have &c.
R. W. Barlow
Collector

Submitted to Government with reference to G.O. 18th July No. 2237 A.

2. The Lists of works requiring repairs submitted by Mr Barlow show how much there is to be done in Chingleput in the way of Agricultural repairs and how usefully the ~~[illegible]~~ of the district might have been employed hitherto had these repairs been undertaken at an earlier period.

3. The Board are glad to learn that ample employment will

will be suitable and it is satisfactory to note a preponderance of tank repairs in the lists of projected works: They would suggest that one or two officers possessing the requisite professional knowledge and qualifications should be temporarily placed under Mr. Barlow's immediate orders for the preparation of estimates as it appears that up to date the Superintending Engineer has failed to furnish any and that a letter addressed to him on the 18th June had elicited no reply by

Enclosure to Board's
Proceedings to the
addl. Secy. to Govt. N.P.
dated 27th July 1877.
No. 3520.

No. 543.

Sub Collector's Office
Chingleput 19th July 1877.

From
The A. S. Sub Collector
Chingleput

To The Collector, Chingleput

Sir,

As requested by you yesterday, I beg to recommend the undermentioned works for execution from Famine Relief Funds in the Conjeveram and Chingleput Taluqs, when the Railway works at present in progress come to a close.

In Conjeveram Taluq.

2\.

(1) Gravelling of the road newly formed between Conjeveram and Wallajabad (9 miles)

(2) Do. Do. Sunkawar Choultry to Madura Mangalam (5½ miles)

(3) Do. Do. Madura Mangalam to Parandur (6½ miles)

(4) Do. Do. Sogundi to Tilcheri (5 miles)

(5) Gravelling & completion of the

No 993

Enclosure in B.R.'s Proceedings dated 27th July 1877 No 3524 to the Asst Secy to Govt. R.D.

the unfinished portion of road between Kuam & Thandalam

(6) Repair of the Kuam Tank estimate for which amounting to Rs 8745 was lately sanctioned by Government.

(7) Repair of River channels from the Palar

(8) Repair of other Irrigation tanks

3. In the Chingleput Taluq

(1) Gravelling of road newly formed between Vendalur and Kelambakam (12 miles)

(2) Earthwork and gravelling of road between Chingleput and Vallimeram (9 miles)

(3) Earthwork & gravelling of road between Singaperumalcoil and Villiambakam -

(4) Do. Do. of road between Tirupore and Kelambakam

(5) Clearing of last 5 miles of East Coast Canal between Sadras and the Palar.

(6) Repair of the Olalur group of tanks near Chingleput.

(7) Repairs of other tanks

the taluq

(8) Repair of some of the Palar channel

4. I now merely give a rough statement of the works which I think would be mo suitable. I should certain recommend the gravelling of all the roads already forme from the Famine Relief fun Unless this be done, the wor already executed will be use less! I have no doubt tha the Local Fund Board will b in a position to maintain the 50 miles or so, of new roads which have been start ed during the last few month

5. It will only involve an increase of expenditure of

some

some 5000 or 6000 Rupees per annum, which I think, the Local Fund Board will be able to bear.–

6. As I know that this repair is emergently wanted, I resolve to lose no time in making the above suggestions. I am unable to enter into details or to give even an approximate estimate of the cost of any of the works without professional advice. I expect to meet the Range officer on Monday next, and after consultation with him, will submit more detailed proposals of the relief works which should be undertaken.

7. You informed me, that you had asked the Madurantam Tahsildar

12/

Tahsildar to forward to you direct proposals in connection with relief works to be undertaken in that taluq, and I shall not therefore dwell on this point any further, than to observe, that I have in view some very important irrigation repairs in regard to which I shall submit proposals very soon on the receipt of fuller information.

I have &c
