*Proceedings of the Joint Committee of House, General Department,
20th February 1877.*

Nov. 1844 - Dec. 1844, dated Haverhill, 28th February 1877

Chairman.—The Chief Engineer having asked dem-officially that some scale may be laid down showing what amount of grant should be issued to men, women and children who may be employed on works of all kinds, the Chief Commissioner, after consultation with those who it was thought would be best able to give a careful opinion on the subject, has resolved to circulate, for general information, the annexures A, B, and C that accompanied the Proceedings of the Bombay Government No. 100 E. of the 22nd January 1877, but Mr. Saunders was of opinion that, for the present, grant payments should not be made unless under exceptional circumstances.

2. When the necessity for this arises, and Commissioners and Deputy Commissioners send out a few cartons in the matter, reporting the facts as early as possible, the following scale of charges, in accordance with the prevailing rates in the Department Office, may be tentatively introduced:—

	Ans.	10.	11.
A. For number of tons or $\frac{1}{2}$ acre of ragi, the present value of which is	0	1	3
Extra in cash for payments	0	0	0
	0	3	0
B. For number of tons or $\frac{1}{2}$ of 1 acre of ragi, present value ..	0	1	3
Extra in cash for payments	0	0	0
	0	1	3
C. For children from 7 to 14 years old, 20 tons or $\frac{1}{2}$ acre of ragi of present value of	0	0	9
Extra for children	0	0	3
	0	1	0

J. L. Koenig, *Department of Biology, University of Missouri, Columbia, MO 65211, USA; e-mail: jkoe@missouri.edu*

2. Generally the most able-bodied men and women should be employed, on regular seasonal work by the Department Public Works, and those less able on the extra work under the District Officers. In the former case, task or piece ^{work} should be selected at not less than 25 per cent below that required in ordinary times.

4. No fixed rate however can be exactly laid down on this point; the responsibility of any necessary change must rest on those in charge of such works.

5. With regard to relief works, it is desirable that the rate of 1 anna and 6 pies per cubic yard should not be exceeded at any time, unless under exceptional circumstances, which must be carefully and fully explained by the District Officer on whom the responsibility rests.

c. The water in the Akmal need not be interfered with for the present.

7. Should gram become dearer, the payment in money should be so calculated as to allow a co-oly to earn sufficient to purchase the quantity and quality of ordinary gram as per para 2.

J. FIDDLE,
Genl. Offg. Secretary.
