Archives 1—10,006—19-4-79.

Read the following papers :—

No. 621. Read letter No. 2,555, 7th December 1876, from Superintending Engineer, Godavery District, and division 3 of Divisional Officer's letter No. 324, 30th October 1876.

No. 194 W.

In the original sanctioned estimate* for Gostanaddi and Velpur Canal, Western Delta, Godavery District, the provisions for head sluices to distributaries stand thus :—

* Item 10 of the sanction of Government of India printed with G.O. No. 2,925, 18th November 1871.

		Rs.
(1.)	Head sluice to Eastern branch	1,020
(2.)	„ „ to Veravaseram Channel	1,270
(3.)	„ „ to Adivikodu	1,270
(4.)	„ „ to Razikodu	1,270
(5.)	Seven sluices to minor branches above Penemantra	1,680
(6.)	Two sluices between Penemantra and Baswarowkodu aqueduct ...	400
(7.)	Two minor sluices below aqueduct	450
	Total ...	7,360

In the re-arrangement of portion of the canal sanctioned in G.O., No. 1,388, 16th May 1875, (a re-arrangement which effected a saving of Rupees 9,280) the provisions for the fifth and sixth of the above items were increased to Rupees 2,800 and Rupees 800 respectively, or an average rate of Rupees 400 for each sluice. The Superintending Engineer now forwards plans and estimates for two head sluices to take the place of three of the nine thus provided for. These estimates amount to Rupees 1,290 or an excess of Rupees 90 over the sanction for three sluices at the average rate of that sanction; but this excess is more than met by the saving of Rupees 300 on the sluice which forms item 1 of the list above, and which has been built at a cost of Rupees 720, and the estimates are recommended for sanction.

The shutter of the Mamadur head sluice should be provided with simple screw lifting gearing, and the extra cost of this may be met by lowering the shoulder of the rear wings 1' 3" reducing the length of their sloped portions from 5' 7½" to 3' 9", and by substituting "dressed selected rubble" for cut stone in coping of wings.

(Signed) G. T. WALCH,
Ag. Depy. Chief Engineer for Irrigation,
for Chief Engineer for Irrigation.

Fort St. George,
17*th April* 1877.
