Contaminated Camp
June 26th 1877

From
Lt. Col. R. A.
Special Relief Officer

To,
R. M. Barlow Esq.
Collector of Chingapat District

Sir,
In reply to your letter No 1467, I have
the honor to state that the 17 deaths
among travellers noted in my report to the
Sanitary Commissioner for the week
ending May 26th refer to the "total
deaths up to the week" and it means
that 17 dead bodies of travellers have been
brought into the Camp since it began.
It is impossible for me to say to what
Galung these people belong but I think
most of them were Kullow people whose
strength failed them before they could
reach the Camp.

There is no doubt
is stated - the
body of the man who
died here 50, 17
deaths have occurred since
has been out of the camp
nearly all the cases
were admitted into the
Hospital immediately on their admission to

I also state in the column of remarks
that "nearly all the 50 deaths which
have occurred in Hospital up to the week
were cases who were admitted into the
Hospital immediately on their admission to

The camp is a dying condition.

There are not necessarily travellers but people who may have ^{been} round the camp for some days; but their rooted prejudice to the Hospital is so great that they will not come there unless I need to do so by the police. They will way and hide themselves and even go without food until they become so weak as not to be able to move, when they are picked up and brought in by the police. I am happy to say now however that people are getting better in this respect and I have lately had a few come voluntarily to Hospital.

I attach a copy of the Report quoted by Mr. Gairdner in his semi-official to you.

I have the honour to be

Sir,

Your most obedient servant

W. R. A.

Special Relief Officer

Relief Camp at the Leper Hospital, Secunderabad, District, Hyderabad, on the 25th April 1877

Return of Strength and Mortality for week ending 26th May 1877.

Average daily strength & total deaths up to date.				Deaths in the week ending		Remarks on chief causes of death.
Males	Females	Total	Total	Males	Females	
890	1695	2,585	50*	17	10	Small pox - * Guides these 50, 17 deaths probably - 2. Diseases 15. have occurred among travellers yesterday 5 out of the camp, nearly all patients! these cases were admitted 27. into the Hospital immediately on their admission to the camp in a dying condition.
Leper Hospital Camp 29th May 1877.
