GOVERNMENT OF MADRAS.

PUBLIC WORKS DEPARTMENT.

20th June 1877, No. 94 I.

Irrigation.

Read the following paper:—

No. 79. From Colonel F. J. MOBERLY, R.E., Superintending Engineer, Chingleput, to the Chief Engineer for Irrigation, dated St. Thomas' Mount, 16th June 1877, No. 919.

I HAVE the honor to bring to your notice that on the 8th water in Red Hills Lake had risen to 37·11 feet within ·2 of the height suggested in your No. 39 I of 5th instant. G.O. No. 73 I has not, however, named any minimum on which I may open the sluices.

2. I have reason to hope that more water has reached the lake since, as we had a heavy storm on the night of the 11th at Trivellore, which was gauged to 1·23 inches in Madras.

3. The Red Hills cultivation is fairly supplied for the present by leakage, but at Cholaveram water will be needed and that tank has only 2·34 feet on head sluice. I shall be glad to know if I may allow of its water being used after Red Hills has received at least a certain supply, the amount of which I shall be obliged by your fixing.

No. 80. ORDER THEREON, 20th June 1877, No. 94 I.

THE Superintending Engineer will be informed that irrigation as usual under the Red Hills Tank may be permitted so soon as the water therein rises to 39·51 or 8 feet above the sill of the lowest pipe of the Municipal sluice.

2. Irrigation under the Cholaveram Tank can be allowed at once.
