been Sick & fallen off the week before) two 2 lbs,
two 1½ lbs, & three 1 lbs = total 18 lbs.

One remained Stationary

Two were anoemic, three were Scorbutic & on
was anoemic & Scorbutic

On the whole there has been an apparent improvement in the Condition of the Cooli Examined.

I say apparent because owing to introduction of task work many of the Coolies have returned to their villages, probably to die

Owing to some error on the part Revenue Subordinates, no light work was provi for the aged & feeble as had been ordered by Collector & Consequently none but the more bodied (or rather less feeble) remained on works. The instructions of the Collector in

regard were immediately reinstated & have
since borne fruit.

But a new factor besides
that of the increased wage has come –
into play without which I suspect no
improvement at all, but the opposite,
would have been observed in the condition
of the Coolies.

The price of grain has
isen so high that the increased wage
little more than equal in purchasing
ower to the former rate but the prickly
ear is now in fruit & I found that almost
ll the Coolies had been living mainly upon
t. It does not seem however to have exer-
ised any very powerful antiscorbutic
ffect apart from its nutritive value.

From two to three pounds would
ppear to be consumed by each adult Cooly
aily. As soon as this source of food
pply ceases unless some other comes into,
the price of grain falls I am of opinion

that in order to save life merely (I do not
mean keeping the Coolies in good working
condition which would require much
more) the wage for adult men must be
raised to at least 2½ annas per diem.

I hardly know how to ac-
count for the disproportionate lost of weig
& condition of the men & women employ
on Road works.

They were & are a much
more powerful set as a rule than tho
first examined. I can only account
for it by supposing that they have been
harder worked than the others but this
a supposition only & as such shoul
perhaps hardly find a place in this pap

I may mention that ma
of the Coolies with an intuitive knowled
of a great physiological fact (I had a
most written axiom) pleaded that if th
were put to harder work than formerly they should

hast have more ...

I hold the same view

these Coolies the price of Rice is, as purchased by them retail in the bazaar, annas 2 pice 8 per Seer.

I have the honor to be

Sir

Your most obedt. Servt.

of the two sets of observations, the first shows no great improvement in the people's condition, but the second [illegible] an [illegible] size and increase, [illegible] in flesh and strength.

2. The large consumption by the coolies of the first [illegible] is a noteworthy fact of this report.

3. But the necessity of raising the wages with the rise in the prices of grain is specifically and clearly insisted on by Surgeon Major Ross.
