*Proceedings of the Madras Government, Revenue Department,
5th February 1877.*

No. 141A. Read the following Report from the Acting Head Assistant Collector of Kurnool for the week ending Saturday, 6th January 1877:—

DURING the week I was absent from Cumbum with reference to the famine relief work, and the Deputy Collector having reported sick, the extra sanitary clerk was looking after the sanitary work during my absence.

Total Number of Coolies during the Week.	Paid on day work was done.	Paid one or more day in arrears.	Daily Average Number of Coolies employed.	Estimated Number of Coolies who came to work, but for whom work was not provided.
11,321	11,321	...	1,886½	...

The following statement shows the actual number of coolies engaged daily and the work on which they were employed:—

Month and Date.	Filling in Cess-pool.
31st December 1876	Sunday.
1st January 1877	1,577
2nd do.	1,577
3rd do.	1,455
4th do.	2,158
5th do.	2,072
6th do.	2,499
	11,321
	Daily Average ... 1,886½

Filling in cess-pool still appears to be being spun out still. The new Deputy Collector will, I hope, effect improvement as regards all work at Cumbum. I believe there is much room for this. The pool is a large and deep one, and it was once the reservoir of much of the rubbish and surplus water of the town. The ryots of the town were in the habit of storing manure heaps in the pool; and as it rottened they dug it out with the earth, and consequently the pool was deepened. At a distance from the town, it would have been unobjectionable. 5,342½ measures of grain and Rupees 439-12-6 were spent during the week on the special sanitary work done by the famine relief coolies. The number of deaths reported during the week amount to 25. Nineteen deaths are attributed to cholera and 6 to fever.

P.S.—I hope to be in Cumbum in a few days and to consult with Surgeon Pedroza, whose arrival at Cumbum was intimated to me yesterday, about sanitary matters. The draft of this report has been sent me twelve days late.
