Revenue Department

Proceedings of the Board of Revenue

2nd/7th August 1877

Read the following

No. 1647 53 52/3

From

The Collector of Kistna District

To

The Secretary to the Board of

Revenue, Madras

Sir.

With reference to Board's Office

Memorandum No. 1931 dated 3rd/9th July 87,

I have the honor to submit a state-

-ment of Tobacco cultivation in

June 1877 as compared with the

average of the last 3 years. From

which it will be observed that the

extent of cultivation in June was

Ps. 12398 and upto June 1875

shewing

showing a vast increase in the
months of Ac 123640: and upto the
months of Ac 124845: over the
respective average of the three previous
Faslies. The figures of cultivation
shown in the enclosed statements
are also shown in the usual statement
of cultivation and collection sub-
-mitted to the Board on the 17th
July 1877.

2. In the monthly return of
the Nandigama Taluq, the
cultivation was entered nil,
although the season and other
reports from the Taluq
show that there was cultivation
in June and that the crops
have

have commenced to fade from
the failure of monsoon: while
in that of the Gundinada Taluq
a small extent of Ac 25 was enter-
-ed: which gives room to doubt
its accuracy.

3. I, however, presume
that the cultivation in these
two Taluqs was to a great
extent in the latter part of June,
after the prescribed date, on which
the monthly village return of
cultivation is closed by the
village officials and forwarded
to the Revenue Inspectors; and
that, therefore, it was not
brought-

brought to account in the
months. I have, however,
called upon the Tahsildars
for further information
on the subject.

4. The cultivation in the
District was begun earlier
than usual; and the early crops
put down were more than suffi-
-cient for the people's wants
and also more than the quanti-
-ties put in May & June of the
previous years.

5. The failure of monsoon ~
after the rains of May and June
and the intense hot winds which
blew boisterously discouraged

the

No (extra) 11,
July 31, 1877

the people for some time.
Since 25th Ultimo, there has been
a favorable rain. All throughout
the District and the people now con-
-fidently hope that but little
of these crops now on the ground
will be lost. Only marginal
letters to the Board would have
furnished them with detail infor-
-mation regarding the state of
crops &c.

6. The river Kistna is in freshes
and the irrigation channels
are almost supplied all.

7. The agricultural classes
are now engaged in sowing
both in dry and wet lands.

The

5. The Ryots in this District are not generally in so bad a state as to require aid in the purchase of seed grain and cattle. Most of them have enough, and a few that may be in want can obtain the requisite supplies from those rich here there.

9. Under the present circumstances I do not find any necessity to recommend special advances to the Ryots for the purpose.

Kistna District Collectors office Machelipatam 9th August 77
