Read the following paper:—

No. 87. Endorsement of the Additional Secretary to Government, Revenue Department.

Proceedings of the Board of Revenue, dated 27th August 1877, No. 3,979.

From J. F. PRICE, Esq., Acting Collector of Cuddapah, to C. A. GALTON, Esq., Acting Secretary to the Board of Revenue, dated Cuddapah, 16th August 1877, No. 450.

I HAVE the honor to refer the following matter for the orders of the Board of Revenue.

2. There is a tank called the Myduku Etirajapalayam tank in the Proddatore Taluq.

3. This was originally a Government Irrigation work, but some 20 years ago it breached, and was left in this state for ten years. It was then taken up under the rules for the repair of ruined tanks.

4. It was in the last fasli given up by the owners on the ground, so I am informed that the rates imposed by the Settlement Department were too heavy.

5. The District Engineer recently reported to me that the bund and revetment were in bad order and that there was no escape weir, and he pointed out that if the tank breached it would cause great damage to the Chittoor and Kurnool road. Believing it to be a private Irrigation work, he requested me to issue a notice to the owners.

6. An inquiry made upon this elicited the facts stated above.

7. The registered ayacut of the tank is Government acres 36·63 assessed at Rupees 110, and inam acres 37·39 assessed at Rupees 612. Both this and the present water-spread can be irrigated by canal which runs over the calingulah of the tank.

8. The District Engineer states that he does not consider it worthwhile to repair this work, and he is of opinion that the bund might be breached and the water-spread given up for cultivation.

9. I agree with him and therefore beg instructions as to whether I may follow this course. It would do very well as a famine work, and I am asking Colonel Moberly for the necessary estimate.

APPROVED.
