Municipal—Reports.

Read the following paper :—

No. 100. *From H. S. THOMAS, Esq., President of the Municipal Commission, Tanjore, to the Chief Secretary to Government, dated Point Calimere, 20th July 1877, No. 222.*

I have the honor to submit the report on the working of the Tanjore Municipality for the year 1876-77, together with the statements of receipts and charges in the forms laid down in G.O., dated 25th April last, No. 1347.

2. The accounts were audited by Mr. Sherman, Accountant, Branch Bank, Negapatam. His report is herewith forwarded.

3. The report of the Zillah Surgeon, Dr. Lloyd, on the sanitary condition of the Town of Tanjore is also submitted herewith. A list of Commissioners accompanies.

4. The total assets of the year under report amounted to Rupees 42,716-2-3, against an estimate of Rupees 44,300; deducting the opening balances, the actual receipts were Rupees 37,468-13-8, or Rupees 831-2-4 less that the estimate, notwithstanding that the revenues from almost all the sources considerably exceeded the Budget figures, the most conspicuous being Tolls. This result, which seems at first paradoxical, is owing to the fact that no deduction was made in the Budget from the receipts from tolls on account of the unanticipated Local Fund claim thereon, although the contribution was subsequently paid in accordance with G.O., dated 22nd January 1877, No. 242.

5. The expenditure under all heads amounted to Rupees 41,875-1-4 and corresponds very nearly with the estimate, *i.e.*, Rs. 42,300, although there are considerable variations in the several items thereof. These are explained in the report of the Vice-President. The balance in favor of the Municipality at the close of the year was Rupees 841-0-11.

6. Cholera was present in the town throughout the year in greater or less degrees of virulence, in spite of the strenuous efforts made by the Commissioners to stamp it out.

7. The surveys, plans, and estimates necessary for obtaining sanction for a loan to execute the water project have for months past been under preparation and are now very nearly ripe for submission. The project aims at laying on good drinking water all over the town, frequently flushing the drains, and carrying the diluted sewage to sufficiently remote cultivation, utilizing a part of the Fort moat to supply bathing and washing places for human beings, apart from the drinking water, and apart also from places set apart for the watering and washing of cattle. The parts of the moat which are offensive from already containing sewage deposits are to be filled up and cultivated. They are all together and at a lower level than the parts holding water. Yet another part of the Fort ditch will catch and store for irrigation what would otherwise run to waste; wells will be filled by percolation; stagnation prevented by use for cultivation and resupply from the head works. But the whole project will be more fully explained in its proper place.

ENCLOSURE No. 1.

From the Rev. J. F. KEARNS, Vice-President, of the Municipal Commission, Tanjore, to the President of the Municipal Commission, Tanjore, dated 29th June 1877, No. 152.

Under Section 34 of Act No. III (Towns Improvement Act) of 1871, I have the honor to submit the annual report, on the working of the Tanjore Municipality for the official year

ending the 31st March 1877, together with the statements of receipts and disbursements prepared in the forms prescribed in G.O., dated the 25th April last, No. 1347, and countersigned by the Auditor.

2. A report of the Hospitals, &c., connected with this Municipality received from the Zillah Surgeon is herewith forwarded in compliance with G.O., dated the 2nd March 1872, No. 209. A list of the Commissioners on the Municipal Board accompanies.

3. Ordinary meetings were regularly held once a fortnight, on Fridays, besides special meetings convened from time to time for the transaction of emergent business.

4. From Statement No. I it will be seen that the total receipt during the year under report amounted to Rupees 42,716-2-3, which after deducting the total expenditure of Rupees 41,875-1-4, as per Statement No. II, leaves a closing balance of Rupees 841-0-11 at the end of the year.

5. The actual collections during the year, as particularized in the comparative statement herewith attached, amounted to Rupees 37,468-13-8, and the opening balance for the year was Rupees 5,247-4-7 :—

Items.	Actual Receipt. RS.	A.	P.	Budget Estimate. RS.
(1). Rate on Houses	11,139	4	0	11,000
(2). Do. on Lands	927	14	0	1,500
(3). Taxes on Vehicles and Animals	2,444	4	0	2,000
(4). Tolls	13,000	0	0	17,000
(5). Licenses (Sections 106, 123, 125, 130, 136, and 138)	333	5	10	300
(6). Surplus Cattle Pound Fund	123	10	7	200
(7). Fines and Fees (Section 17, Bye-laws and Schedule A)	1,336	14	0	550
(8). Fees in Schools	488	6	0	500
(9). Rent of Houses and Gardens	4,677	11	7	4,100

(11). Avenue	74	7	3	60
(12). Materials, Tools and Plant	6	4	6	480
(13). Fish Rent	17	0	0	60
(14). Sale of Bullocks	228	0	0	..
(15). Contribution from Receiver	1,350	8	2	..
(16). Do. from Devastanam Committee.	200	0	0	150
(17). Sale of Vegetables	50	13	9	..
Total	37,468	13	8	38,300

6. *Rate on Houses.*—The actual collection under this head is Rupees 11,139-4-0, while the estimate is Rupees 11,000. Some of the houseowners within the Fort extended their buildings during the year. Hence the increase of Rupees 139-4-0.

7. *Rate on Lands.*—The actual amount collected under this head is Rupees 927-14-0, against an estimated amount of Rupees 1,500. The difference of Rupees 572-2-0 will be collected in due course.

8. *Taxes on Vehicles and Animals.*—The aggregate sum collected under this head is Rupees 2,444-4-0, against the estimate of Rupees 2,000, being Rupees 444-4-0 more than the estimate, owing to a more minute supervision by Commissioners.

9. *Tolls.*—From tolls, which forms one of the chief sources of income in this Municipality, a sum of Rupees 19,500 was collected during the year against the Budget Estimate of Rupees 17,000. The increase of Rupees 2,500 is due to the warm competition at the auction sale. All the gates were put up for contract in a lump, and knocked down to the highest bidder for Rupees 19,500. Out of the gross income, a third (Rupees 6,500) has been contributed to the Tanjore Local Fund Circle, in pursuance to the directions of G.O., dated 23rd January 1877, No. 242.

10. *Surplus Cattle Pound Fund.*—The receipt under this head is Rupees 123-10-7, against the estimate of Rupees 200, as this being fluctuating item; hence the decrease of Rupees 76-5-5.

11. *Fines Fees (under Section 17, Bye-Laws, and Schedule A).*—The actual collection under this head amounts to Rupees 1,336-14-0, or Rupees 786-14-0 over the estimated figure, as many cases of nuisances were prosecuted and convictions obtained.

12. *Rent of Houses, Gardens, and Markets.*—The amount of estimate under this head was Rupees 4,100, but Rupees 577-11-7 was collected over and above the estimated figures, owing to a keen competition at the time of renting out.

13. *Miscellaneous.*—A contribution of Rupees 1,350-8-2 was received from the Receiver of Tanjore Palace for deepening and repairing the Rajagori tank, which is a portion of the private property of the late Raja of Tanjore.

14. A sum of Rupees 200 was contributed by the Pagoda Committee in consideration of the damage done to the four metalled main streets of the town by the cars of the temples running over them during festivals.

15. *Sale of Sweepings.*—No income is derived under this head as this item was not excluded from the terms of the contract for scavengering.

16. *Materials, Tools, and Plant.*—The estimate under this head, Rupees 480, and the actual collection was Rupees 1,076-4-6. This sum is realized out of the sale proceeds of the teak timber, which had been purchased for the purpose of erecting a clock tower, which project was subsequently abandoned by Resolution No. 1 of the Board, dated 6th May 1876; hence the increase.

17. *Fish Rent.*—The estimate was Rupees 60, but the actual collection was Rupees 17-6-0, as the Commissioners thought it advisable not to let out the Municipal tanks for fishing with a view to keeping the water of the tank from impurity.

A sum of Rupees 228 was realized from the sale proceeds of bullocks, &c., which the Commissioners maintained for the upkeep of the garden. They were all sold as the necessity for them ceased by the garden being made over to the Receiver of the Tanjore Palace for a nominal rental of Rupees 96 per annum under the Resolution, No. 7, of the Board, dated 12th May 1876.

18. The other items of income need no special mention, as there is not any remarkable fluctuation between the actuals and the estimate.

19. EXPENDITURE.—The net expenditure, as detailed in the accompanying comparative statement, amounted to Rupees 41,875-1-4, against the estimate of Rupees 42,300. However a brief but concise statement is given hereunder for easy reference :—

	Actuals. RS.	A.	P.	Estimate. RS.
Grant I	16,764	3	0	13,510
„ II	2,381	10	5	3,000
„ III	14,001	10	8	15,000
„ IV	4,877	15	8	6,930
„ V	3,709	9	9	3,860
Advance Recoverable	50	0	0	..
Total	41,875	1	4	42,300

20. GRANT I, *New Works.*—A sum of Rupees 9,768-3-4 was expended under the several heads, viz., (1) Communications, (2) Buildings, (3) Drainage, (4) Water-supply and Miscellaneous against the estimate of Rupees 8,070. The amount expended under the head of Communications and Buildings was Rupees 2,573-13-8, against a Budget provision of Rupees 6,100.

21. The decrease of Rupees 3,526-2-4 is caused by the transfer of allotment from this head to the improvement of water-supply.

22. A sum of Rupees 500 was provided for in the Budget for the drainage, but the actual charges for the purpose come up to Rupees 633-13-8, *i.e.*, Rupees 133-13-8 more than the estimate, the cause for the increase being that a greater attention was paid for the sanitation of the town.

23. The total charges for the improvement of the water-supply during the year under report amounted to Rupees 4,977-6-1, while the Budget provision was Rupees 1,470. This increase is owing to the cleansing and deepening, &c., of the tanks and ponds, and was met by the transfer of allotments noticed in paragraph 21.

24. A sum of Rupees 1,583-1-11 was spent for the preparation of the plans and estimates for the water-supply scheme now under consideration. No provision was made in the Budget for this charge as it was not anticipated at the time of the preparation of the Budget.

25. *Repairs.*—Under this head a sum of Rupees 5,184-13-4 was expended. Amount allotted for road repairs was Rupees 3,444, but the actual expenditure amounted to Rupees 4,895-0-7 as the roads required a thorough repair. Hence the increase of Rupees 1,451-0-7 over the Budget allotment. The other items call for no special remark, except under Miscellaneous. The sum of Rupees 322-10-4 was spent more than the Budget figure, owing to the entertainment of the Special Engineer for Water Works.

26. GRANT II, *Education.*—A sum of Rupees 3,000 provided for in the Budget for Education, but the actual expenditure was only Rupees 2,381-10-5, thus falling short of the estimate by Rupees 618-5-7. This decrease is mainly due to the non-payment of the Result Grants for which Rupees 300 was provided in the Budget as no school obtained it, and the abolition of three teachers

for want of sufficient pupils in the schools. There are five Municipal Elementary Schools maintained in the town with an average daily attendance of 316 pupils during the year against an average daily attendance of 349 pupils in the preceding year. The total cost of these Schools comes up to Rupees 1,896-3-7, which gives an average of Rupees 6 as the cost of educating a pupil. There are two schools aided by the Commissioners under the Salary Grant system with an attendance of 124 pupils, the amount of grant paid for these schools being Rupees 324. The cost of educating a pupil in a Grant-in-Aid School devolving on the Commissioners is Rupees 2-9-9 per pupil against Rupees 6, the cost of education in purely Municipal School.

27. The Municipal Commissioners, however, in their Resolution, dated 14th July 1876, thought it fit for the spread of elementary education in the town to appoint an Inspecting Schoolmaster to look after the Pyal and Municipal Schools. This was sanctioned in G.O., dated 6th November 1876, No. 1973, and it is hoped that there will be many schools coming for aid under the result system next year. No new schools were established during the year.

28. GRANT III.—A sum of Rupees 14,091-10-6 was spent for the Sanitation and Medical Services, against an estimate of Rupees 15,000. There has been a decrease of Rupees 631 under the Budget provision for Medical Establishment, &c., and an increase of about Rupees 747-4-10 under Medicine and Supplies and Sundries. The decrease is owing to the non-entertainment of second-class Passed Hospital Assistants as proposed, and the increase is due mainly to the prevalence of cholera, &c. No new Dispensary is started during the year under review. The two Branch Dispensaries—one at Karutattangudy and the other at Manamboochavady—are worked well and are under the superintendence of the Zillah Surgeon. There were 11,691 patients treated during the year, against 8,562 in the preceding year. The increase shows that the Dispensaries are becoming more popular. There are three medical subordinates employed for the town.

29. *Vaccination.*—During the year under report there were 1,041 persons vaccinated, against 983 in the preceding year. Out of this 1,005 cases, *i.e.*, 96·5 per cent. are reported to be successful. There are two vaccinators working in the town on salaries of Rupees 12 and 10. The total cost of Vaccination during the year is Rupees 284, against Rupees 294, in the previous year. The cost of Vaccination is, therefore, Annas 4-4 per head.

30. During the year 1,398 births and 1,717 deaths have been registered, while the figures for the last year were 1,654 and 1,985, respectively.

The total cost of the registration of vitality is [illegible]s 218-0-9. The percentage of births and deaths to the population of the town is 37·32 and 3[illegible]·38, respectively.

31. *Conservancy.*—A sum of Rupees 3,559-4-10 were spent for the establishment, against an estimate of Rupees 5,268, thus showing a saving of Rupees 1,708-11-2. This decrease is owing to the adoption of the system of letting the cleansing of the roads and drains on contract for one half of the year. There has, however, been a corresponding increase of Rupees 717 in the cost for conservancy carts which includes also the cost of scavengers. The other items under this grant need no special notice.

32. There was a considerable saving under Markets and Public Garden, as the establishment for the former was abolished, owing to the market being let out on contract, and the latter has been rented out to the Receiver of Tanjore Palace for Rupees 8 per mensem under resolution of the Board, dated 23rd June 1876.

33. *Travellers' Bungalow.*—This has been maintained in good order with an establishment of Rupees 193-2-6 including contingencies, and 110 travellers halted during the year under report. The other items of expenditure require no special mention. The total expenditure is Rupees 41,875-1-4, which leaves a closing balance of Rupees 841-0-11 on the 31st March 1877.

ENCLOSURE No. 2.

SANITARY REPORT for the Official Year 1876-77.

I have been in charge of this station since 13th January last, and during this time I have seen most of this town within municipal limits. The principal roads and the main streets of the Fort and of its suburbs appear to be clean and orderly. Some of the roads are, however, much out of repair.

DRAINAGE.—The drainage of the Fort and of its suburbs are tolerably good; it is under the charge of a Contractor, but under the immediate supervision of the Chief and Sub-Nuisance Inspectors of the Municipality who have occasionally to look after him. Some of the drains are not so sweet as they might be, but this is, I am told, in consequence of the small supply of water; they are not able to be daily flushed.

WATER-SUPPLY.—The Fort is supplied with drinking water by Sivagunga tank, but this is now getting very low, and if no rain come or freshes down the river there will be difficulty in

getting any at all even now holes are being dug in the bed of the river in hopes of procuring a daily supply; besides these there are wells and tanks used for bathing and cooking purposes. The other divisions of Manamboochavady and Karunthattangudy are supplied in the same way, but there are comparatively few wells with good drinking water.

CONSERVANCY.—I have very little to remark under this head. Contract system is still in force. The accumulation of rubbish, night-soil, &c., is conveyed in carts beyond the limits of the west gate of the Fort still in my opinion too close to the town. The public latrines of the Fort and of Manamboochavady and Karunthattangudy are kept clean and well attended to.

MUNICIPAL DISPENSARIES.—No new Dispensaries were opened during the year under report. The two Branch Dispensaries, one at Karunthattangudy and the other at Manamboochavady, are under my supervision and management. All the expenses, &c., are paid by the Commissioners on bills countersigned by me. The proposal of the Commissioners to have second-class Hospital Assistants in charge of the Dispensaries is still under contemplation. No changes were made with respect to the subordinates. Second-class Hospital Assistant T. Mathuranayagum Pillay continues to supervise the duties of Manamboochavady Dispensary without prejudice to his proper appointment at the District Jail. This subordinate has given me entire satisfaction in discharging his duties of the Dispensary. My predecessor, Dr. O'Hara, has left a good report on the conduct of this subordinate. Dresser Paul Davarajooloo Pillay is in charge of the Karunthattangudy Dispensary. He performs his duties to my satisfaction, and I have nothing to complain of him. These Dispensaries are intended to treat out-patients and ordinary cases only. All the important and serious cases are sent to the Raj Hospital.

The Municipality pay Rupees 14 for two Medical Pupils to qualify them as Compounders and Dispensary Assistants. The Municipalities of Combaconum and Negapatam each pay for one pupil only, and Tanjore Local Fund Board for two. These lads attend Raj Hospital every morning for Clinical instructions, and at noon from 12 to 2 they attend the Manamboochavady Dispensary and receive instructions from second-class Hospital Assistant T. Mathuranayagum Pillay in Materia Medica, comprising Tamil, English, and Latin names of medicines, doses, actions, uses, and Practical Pharmacy, Minor Surgery, &c. They have made fair progress in their studies, and they will qualify themselves for the duties they are intended to by June.

CHOLERA.—Cholera was epidemic in the town during the months of January and February. The deaths registered by the Municipality are 395. Of these 211 are males and 184 females. [illegible] of cholera, the Municipality em[illegible] Cholera Di[illegible] generally Cholera medicines, &c. Special attention was paid to Conservancy, prohibiting the sale of unwholesome articles of food, &c. Stringent measures with respect to the bedding, clothing, &c., of infected people were adopted. Bonfires of wood fed with coal-tar were blazed everywhere, and whitewashing of houses, &c., were attended to. There was no special cause to which this epidemic can be attributed. Cholera was prevalent in varying degrees of severity throughout the district during the whole of the year.

VACCINATION.—There are two Municipal Vaccinators employed by the Municipality; 1,041 cases were vaccinated during the year. Of these 1,005 were successful and 36 unsuccessful.

The following table shows the working of both Dispensaries during the year 1876-77:—

Diseases.	Admitted.													Total Treated.	Died.	Average Daily Sick.
	1876.									1877.

Balances	5,247	2,000	841
Total	46,780	44,300	42,716

2. Excluding the opening balance, and the Local Fund share of the tolls for which no provision was made in the budget, the income for the year exceeded the estimate by Rupees 4,835 in consequence chiefly of the increased receipts from tolls, fines, and certain miscellaneous items of revenue, such as private contributions, sale of

Municipal property, rent of markets, &c. The progress of collection of house and land rates was not very satisfactory, nearly 11·4 per cent. of the current and arrears demand having been left uncollected at the end of the year.

3. A large proportion, viz., 39·5 per cent., of the available assets was spent in improving and maintaining the existing lines of communication, and in improving the sanitation and water-supply of the town by constructing drains and by cleansing and deepening tanks and ponds. With the aid of a Special Engineer, satisfactory progress was made with the surveys, plan, and estimates in connexion with the project for supplying the town with good drinking water.

4. The Educational expenditure fell short of the estimate by Rupees 618, and of the previous year's actuals by Rupees 225, owing chiefly to the non-utilization of the allotment for results grants, and to some of the teachers in the Municipal Schools being dispensed with in consequence of the falling off in the attendance. It has not been explained why the attendance in the aided schools fell off, or why no grants were made to the elementary schools of which there are many in the town. The educational work of the Tanjore Municipality, as displayed in recent reports, is capable of much improvement, and the Government look to the President to take care that no effort is spared to ensure the realization of the hope expressed in paragraph 27 of the Vice-President's report, that satisfactory results will follow the lately-sanctioned appointment of a separate Inspecting Schoolmaster for Pial and Municipal Schools.

5. A sum of Rupees 14,092, or 33 per cent. of the income, was spent on Sanitary and Medical Services. The continued success attending the working of the two branch dispensaries under the control of the Municipality is gratifying. The Medical Officer's report shows a satisfactory increase of 3,129 in the number of out-patients treated. The usual vaccination establishment was kept up, and 1,041 persons were vaccinated against 983 in 1875-76. The cost, viz., Annas 4-4 per operation, is still high for a thickly-populated town. The public health was affected by an outbreak of fever which is said to have caused 395 deaths in September, special measures adopted for the purpose, partly by contract and partly by paid agency.

6. As regards accounts—

(1.) The amount expended on tunnels and bridges should have been shown under Communications and not under Buildings, and the charge for road coolies should have been debited to Works instead of to Establishment.

(2.) The cost of making iron-gates for the office, and of registering muchilikas and preparing schedule boards for toll-gates has been improperly debited to Grant IV instead of to Grants I and V respectively.

(3.) In Appendix A, the number of ex-officio members is stated to be four, while it cannot exceed two under the Act.

(True Extract.)

Under Secy. to Govt.

To the President of the Municipal Commission, Tanjore.
" Public Works Department.
" Revenue Department.
" Board of Revenue.
" Accountant-General.
" Sanitary Commissioner.
" Surgeon-General, Indian Medical Department.
" Director of Public Instruction.
" President of the Local Fund Boards, Tanjore District.
