Famine Relief.

No. 140. Read the following Proceedings of the Board of Revenue, dated 20th February 1877 :—

Read the following letter from C. T. LONGLEY, Esq., Collector of Salem, to H. E. STOKES, Esq., Acting Secretary to the Board of Revenue, dated Salem, 9th February 1877, No. 525/92 S-N.

I HAVE the honor to forward, herewith, an estimate, amounting to Rs. 29,060, for the repair of the Pennagondapuram Tank in the Krishnagherry Taluq. The irrigation statement also accompanies. This is one of the five major projects submitted for the sanction of Government in my letter S-N No. 305/28, dated 21st ultimo. I request that the Board of Revenue will be good enough to obtain the sanction of Government at an early date. A copy of the letter of the District Engineer on the subject is enclosed ; and the Board will see that the present repair will yield a return of revenue of 7¼ per cent. on the outlay.

ENCLOSURE No. 1.

From Major P. MONTGOMERIE, R.E., District Engineer, Salem, to C. T. LONGLEY, Esq., Collector of Salem, dated Yercaud, 6th February 1877, No. 262.

WITH reference to your letter S-N No. 305-28, dated 21st ultimo, to the Board of Revenue, applying that early sanction may be given for the commencement, as famine relief-works in the Kistnagherry and Darampury Taluqs, of the five projects noted in the margin, and which have been proposed by Sub-Collector Mr Wilkinson, I have the honor to submit, for the specific and early sanction of Government, a revised estimate for the Pennagondapuram Tank, amounting to Rs. 29,060, together with a complete revenue, &c., statement for the same.

1 Abstract Estimate.
1 Revenue, &c., Statement.

1. Mullapady Tank.
2. Badatala Project
3. Pennagondapuram Tank.
4. Barur Channel.
5. Singabasavan Project.

2. This project I have gone through thoroughly and have made allowance in the revised estimate for a surplus weir 400 feet in length instead of one 120 feet long, and for some minor alterations ; and it will be observed that the minimum revenue expected, viz., Rs. 2,070, will yield a return of about 7¼ per cent. on the total of the revised estimate of Rs. 29,060 for this work.

With reference to the projects for the Mullapady Tank and Badatala Channel which are or have been before the Chief Engineer for Irrigation, I have telegraphed to that officer to return them to me with his orders, and they will probably be received at an early date and sufficiently matured to be put in hand when the necessity for employing the people in their localities arises.

With reference, however, to the Barar Channel and the Singabasavan Tank, I am afraid, from what I have seen of the papers before me, that these projects are not sufficiently matured to ascertain whether their execution will repay Government, much less to admit of their being put in hand at once. I shall however continue their investigation to maturity.

SUBMITTED for the sanction of Government in continuation of Board's Proceedings, dated 26th January 1877, No. 322, with a request for early order. From the report of the District Engineer, the project promises to be remunerative and is also one well suited for a relief work.
