GOVERNMENT OF MADRAS.

REVENUE DEPARTMENT.

22nd November 1878, No. 1,899.

Read the following paper:—

No. 316. From C. L. TUPPER, Esq., Officiating Under-Secretary to the Government of India, Department of Revenue, Agriculture, and Commerce, (Forests), to the Secretary to the Government of Madras, Revenue Department, dated Simla, 9th November 1878, No. 1,118-F.

In continuation of the letter from this Department, No. 477-F, dated the 4th May last, I am directed to forward for information and for communication to the officers of the Forest Department, copy of a circular issued by the Inspector-General of Forests, which contains particulars of the sale in London of the Indian woods sent to Messrs. Churchill and Sim in April last, and to suggest that with the view of bringing the woods of this country to the notice of the English trade, it might be found advisable to send from time to time selected consignments from Madras to Messrs. Churchill and Sim, to be sold by them in the London Market.

ENCLOSURE No. 1.

Circular Nos. 226—237.

From the Inspector-General of Forests,

Simla, the 28th October 1878.

In continuation of my Circular No. 4-14C, dated the 15th April 1878, transmitting for your information and that of the officers under your orders, papers relating to a consignment of woods (the residue of the collections prepared for the exhibition and other purposes) sent for sale to Messrs. Churchill and Sim, of London: I have the honor to forward copy of a letter received from Messrs. Mackenzie Lyall and Co., together with a list, from which you will see the results of the sale which, considering the smallness of the pieces and their being for the most part unknown to trade, was not unfavorable.

2. It will be remembered that the object of the consignment was to bring some of the Indian woods to the notice of the trade. The amount realized by the sale was of no great importance; what was desired was to afford an opportunity for testing practically the value of these woods for carriage building, for furniture, for turning and for other work. But the experiment made in April last was only a small beginning, and, necessarily, not under favorable circumstances. It appears to me that the experiment should be continued, but that it should now be taken in hand by Conservators under such orders as Government may pass on the subject. I would suggest that selected consignments of correctly named woods, likely to find favor with the trade, be sent from time to time for sale to Messrs. Churchill and Sim with complete lists, and all necessary information.

3. Messrs. Mackenzie Lyall and Co. have expressed their willingness to undertake the agency of forwarding any further consignments that may be sent to them by Conservators, to Calcutta, or to their Agents, Messrs. Todd Findlay and Co. of Rangoon and Moulmein. Should it be considered desirable to despatch any consignments *via* Madras, Bombay or Karachi, Conservators will, no doubt, be able to make arrangements with firms at these places, who are connected with the trade in timber and fancy woods.

4. As explained by Messrs. Churchill and Sim, the prices obtained at the sale of July cannot be taken as an index of the intrinsic value of the woods; for some kinds drew a fair competition, others were neglected, and a few realized more than the market value. Upon

the whole, it may, perhaps, be said that the best woods were paid for, and that of the others, the harder and darker-colored woods were most appreciated.

Conservators in the different provinces will know best what to send, and I will do nothing more at present than indicate, by brief suggestions, a few of the species which I think are most likely to attract the attention of the trade.

- (1.) The species of *Calophyllum*.
- (2.) *Mesua ferrea*, the *Nagesur* of Bengal and *Gangan* of Burma.
- (3.) The species of *Heritiera* or *Sundri* wood.
- (4.) *Eriolæna Candelæi*, the *Duani* of Burma.
- (5.) *Pentace burmanica*, the *Thitka* of Burma.
- (6.) *Berrya Ammonia*, the *Trincomalee* wood.
- (7.) Species of *Amoora*, *Dysoxylum* and *Carapa*.
- (8.) *Gluta travancorica* from Tinnevely.
- (9.) *Ougeinia dalbergioides* from Central India and Bombay.
- (10.) The dark-wooded species of *Dalbergia*: such as *D. Sissoo*, the *Sissu*; *D. cultrata* the *Yendike* of Burma and *D. latifolia*, *Rosewood*: this latter is well known in London market, and the specimens sent obtained as much as £13 10s. per ton.
- (11.) The species of *Pterocarpus*: such as *P. santalinus*, *Red Sanders* wood; *P. Marsupium*, *Bejasa*; and *P. indicus* *Padouk*, a specimen of which wood from the Andamans obtain the high price of £16 10s. per ton.
- (12.) *Hardwickia binata*, the *Anjan* of Central India and Mysore.
- (13.) *Xylia dolabriformis*, the *Pynkade* or *Iron-wood* of Arakan, Burma and South India.
- (14.) The species of *Acaia*: especially *A. Catechu* (*Khair*); *A. ferruginea* (*Khaur*); and *A. modesta* (*Phulahi*).
- (15.) The species of *Terminalia* with dark wood: such as *T. tomentosa* (*Saj*), *T. paniculata*, and the *T. myriocarpa* of Bengal.
- (16.) *Planchonia valida* from the Andamans.
- (17.) The better kinds of *Lagerstrœmia*: such as *L. Regina* (*Jarûl*, *Ajhar*, *Dumâ*) and *L. hypoleuca* of the Andamans.
- (18.) *Haldu* (*Adina cordifolia*), *Keim* (*Stephegyne parvifolia*) and species of *Nauclea*.
- (19.) Different kinds of *Randia* and *Gardenia*, if well-seasoned, especially *G. latifolia* as a possible substitute for box-wood.
- (20.) Species of *Bassia* and *Minusops*: especially *M. littoralis*, the *Bullet* wood of the Andamans.
- (21.) The black-wooded species of *Ebeny*: especially *Diospyros melanoxylon* (*Tendu*), *D. Ebenum* and *D. Kurzii*, the *Andaman* marble-wood.
- (22.) *Olea cuspidata* (*Kau*), the *Olive* of the Punjab.
- (23.) Species of *Strychnos* and *Fagraea*.
- (24.) The harder species of *Cordia* such as *C. vestita*, *C. Macleodii* and *C. fragrantissima*, the *Toungkalumet* of Burma.
- (25.) Some of the *Bignoniaceæ*: such as the yellow-wooded *Spathodea stipulata* (*Hpetthan*) of Burma, *Pajanelia multijuga* from the Andamans, and *Tecoma undulata* from the Punjab and Sind.
- (26.) The camphor woods of Assam and Burma: viz., *Cinnamomum Glanduliferum*, the *Malligiri* or *Gunserai*; and the trees known as *Sinkoi*, *Hmanthin* and *Karaway* from Burma.
- (27.) The mulberries: *Morus serrata* of the North-Western Himalaya, *Morus cusnida* the large mulberry of Assam; and species of *Artocarpus*.

6. The size and shape of the pieces sent must necessarily vary according to circumstances. short planks, 6 to 10 feet long, 4 to 6 inches thick, and as wide as possible, will, in many cases, be found the best shape. As a matter of course, defects and sapwood should be avoided, and no pieces should be despatched that are not perfectly seasoned. It is of the greatest importance that the names should be correct, and that carefully-prepared lists should be sent to the firm forwarding, and duplicates direct to Messrs. Churchill and Sim. The greatest care

should be taken that every piece is carefully and deeply marked, if possible, with the name as well as the serial number of the list. Those sent to Messrs. Churchill and Sim in April had each their letter and number deeply cut in with a chisel, so as to prevent any chance of the marks being effaced. In the event of any consignments being sent, it may, perhaps, be an advantage, with the permission of Government, to send me copies of the list, and an account of the prices realized.

From Messrs. MACKENZIE LYALL and Co., dated the 10th August 1878.

ENCLOSED we beg to hand you marked catalogue, showing you the result of the sale by public auction of the 119 sample woods, shipped per *S. S. Dorunda* to Messrs. Churchill and Sim.

Our friends write us on the subject as follows:—

"We beg to state that the prices obtained are by no means an index of the intrinsic value of the various woods, as although for some descriptions there was fair competition, others were neglected, and a few realized more than market value. For instance, *Rosewood* or *Blackwood* (lot 217) is well known here; and when it has been freely shipped to this market, it has been sold as low as £5 per ton. The few small lots lately imported have been selling with difficulty at from £9 to £10 per ton, whereas your two samples realized £13 10s. per ton. On the other hand, for the 7 samples *Boxwood* (lot 139) there was only one bidding, viz., £7 per ton, at which they were sold. Had there been the competition, which we expected, they would have commanded a much higher price."

However, the object you had in view, viz., the distribution of the woods, has been attained; and any information we may obtain from the buyers, which may be useful to you for your future management, we will with pleasure forward to you.

In due course, you will receive the account sales: you will observe that the woods have been lotted in the same order as the printed list you sent us.

ENCLOSURE No. 1.

Proceeds of an Auction Sale held in London on July 10th, 1878, by Messrs. Churchill and Sim, of a consignment of Indian woods per *S. S. Dorunda*.

No. 317.

ORDER IN COUNCIL, 22nd November 1878, No. 1,899.

Forests, No. 26.

COMMUNICATED to the Conservator of Forests for information and the expression of his views on the suggestions of the Inspector-General of Forests.

(True Extract.)

(Signed) L. A. CAMPBELL,
Under-Secretary to Government.

To the Conservator of Forests.

Exd. W. H. French.

Circular Nos. 226-237.

FROM

THE INSPECTOR-GENERAL OF FORESTS,

To

Office of
Inspector-General of Forests.

Simla, the 28th October 1878.

SIR,

In continuation of my Circular No. 4-14C, dated the 15th April 1878, transmitting for your information and that of the officers under your orders, papers relating to a consignment of woods (the residue of the collections prepared for the exhibition and other purposes) sent for sale to Messrs. Churchill and Sim, of London: I have the honour to forward copy of a letter received from Messrs. Mackenzie Lyall and Co., together with a list from which you will see the results of the sale which, considering the smallness of the pieces and their being for the most part unknown to trade, was not unfavourable.

2. It will be remembered that the object of the consignment was to bring some of the Indian woods to the notice of the trade. The amount realized by the sale was of no great importance; what was desired was to afford an opportunity for testing practically the value of these woods for carriage building, for furniture, for turning and for other work. But the experiment made in April last was only a small beginning, and, necessarily, not under favourable circumstances. It appears to me that the experiment should be continued, but that it should now be taken in hand by Conservators under such orders as Government may pass on the subject. I would suggest that selected consignments of correctly named woods, likely to find favour with the trade, be sent from time to time for sale to Messrs. Churchill and Sim with complete lists, and all necessary information.

3. Messrs. Mackenzie Lyall and Co. have expressed their willingness to undertake the agency of forwarding any further consignments that may be sent to them by Conservators, to Calcutta, or to their Agents, Messrs. Todd Findlay and Co. of Rangoon and Moulmein. Should it be considered desirable to despatch any consignments *via* Madras, Bombay or Karachi, Conservators will, no doubt, be able to make arrangements with firms at these places, who are connected with the trade in timber and fancy woods.

4. As explained by Messrs. Churchill and Sim, the prices obtained at the sale of July cannot be taken as an index of the intrinsic value of the woods; for some kinds drew a fair competition, others were neglected, and a few realized more than the market value. Upon the whole, it may, perhaps, be said that the best prices were paid for woods already known to the trade, such as Walnut, Rosewood and Padouk, and that of the others, the harder and darker-coloured woods were most appreciated.

5. Conservators in the different provinces will know best what to send; and I will do nothing more at present than indicate, by brief suggestions, a few of the species which I think are most likely to attract the attention of the trade:—

- (1.) The species of *Calophyllum*.
- (2.) *Mesua ferrea*, the *Nagesur* of Bengal and *Gangu* of Burma.

Indian Woods. — Communicating to the Conservator of Forests for information and the expression of his views on the suggestions of the Inspector-General of Forests, letter from the Department of India on the subject of bringing to the notice of the English trade.

- (3.) The species of *Heritiera* or *Sundri* wood.
- (4.) *Eriolena Candollei*, the *Dwani* of Burma.
- (5.) *Pentace burmanica*, the *Thitka* of Burma.
- (6.) *Berrya Ammonilla*, the *Trincomalee* wood.
- (7.) Species of *Amoora*, *Dysoxylum* and *Carapa*.
- (8.) *Gluta travancorica* from Tinnevely.
- (9.) *Ougeinia dalbergioides* from Central India and Bombay.
- (10.) The dark-wooded species of *Dalbergia*: such as *D. Sissoo*, the *Sissu*; *D. cultrata* the *Fendike* of Burma and *D. latifolia*, Rosewood: this latter is well known in the London market, and the specimens sent obtained as much as £13 10s. per ton.
- (11.) The species of *Pterocarpus*: such as *P. santalinus*, Red Sanders wood; *P. Marsupium*, *Bejasal*; and *P. indicus* *Padouk*, a specimen of which wood from the Andamans obtained the high price of £16 10s. per ton.
- (12.) *Hardwickia binata*, the *Anjin* of Central India and Mysore.
- (13.) *Xylia dolabriformis*, the *Runkado* or Iron-wood of Arakan, Burma and South India.
- (14.) The species of *Acacia*: especially *A. Catechu* (*Khair*); *A. ferruginea* (*Khaur*); and *A. modesta* (*Phulahi*).
- (15.) The species of *Terminalia* with dark wood: such as *T. tormentosa* (*Saf*), *T. paniculata*, and the *T. myriocarpa* of Bengal.
- (16.) *Planchonia valida* from the Andamans.
- (17.) The better kinds of *Lagerstroemia*: such as *L. Reginæ* (*Jarai*, *Ajhar*, *Pymmah*) and *L. hypoleuca* of the Andamans.
- (18.) *Haldia* (*Adina cordifolia*), *Keim* (*Stephegyne parvifolia*), and species of *Nauclea*.
- (19.) Different kinds of *Bandia* and *Gardenia*, if well-seasoned, especially *G. latifolia* as a possible substitute for box-wood.
- (20.) Species of *Bassia* and *Minusops*: especially *M. littoralis*, the Bullet wood of the Andamans.
- (21.) The black-wooded species of *Ebony*; especially *Diospyros melanoxylon* (*Tendu*), *D. Ebenum* and *D. Kurzii*, the Andaman marble-wood.
- (22.) *Olea cuspidata* (*Kau*), the Olive of the Punjab.
- (23.) Species of *Strychnos* and *Fagraea*.
- (24.) The harder species of *Cordia*: such as *C. vestita*, *C. Macleodii* and *C. fragrantissima*, the *Poungkahmet* of Burma.
- (25.) Some of the *Bignoniaceae*: such as the yellow-wooded *Spathodea stipulata* (*Hpetthan*) of Burma, *Pajanelia multijuga* from the Andamans, and *Tecoma undulata* from the Punjab and Sind.
- (26.) The camphor woods of Assam and Burma: viz., *Cinnamomum Glanduliferum* the *Malligiri* or *Gunserai*; and the trees known as *Sinkozi*, *Hmanthin* and *Karaway* from Burma.
- (27.) The mulberries: *Morus serrata* of the North-Western Himalaya, *Morus cuspidata* the large mulberry of Assam; and species of *Artocarpus*.

6. The size and shape of the pieces sent must necessarily vary according to circumstances: short planks, 6 to 10 feet long, 4 to 6 inches thick, and as wide as possible, will, in many cases, be found the best shape. As a matter of course, defects and sapwood should be avoided, and no pieces should be despatched that are not perfectly seasoned. It is of the greatest importance that the names should be correct, and that carefully-prepared lists should be sent to the firm forwarding, and duplicates direct to Messrs. Churchill and Sim. The greatest care should be taken that every piece is carefully and deeply marked, if possible, with the name as well as the serial number of the list. Those sent to Messrs. Churchill and Sim in April had each their letter and number deeply cut in with a chisel, so as to prevent any chance of the marks being effaced. In the event of any consignments being sent, it may, perhaps, be an advantage with the permission of Government, to send me copies of the lists, and an account of the prices realized.

I have the honour to be,

SIR,

Your most obedient Servant,

Inspector-General of Forests.

From—MESSRS. MACKENZIE LYALL and Co., dated the 10th August 1878.

ENCLOSED we beg to hand you marked catalogue, showing you the result of the sale by public auction of the 119 sample woods, shipped per *S. S. Dorunda* to Messrs. Churchill and Sim.

Our friends write us on the subject as follows:—

"We beg to state that the prices obtained are by no means an index of the intrinsic value of the various woods, as although for some descriptions there was fair competition, others were neglected, and a few realized more than market value. For instance, *Rosewood* or *Blackwood* (lot 217) is well known here; and when it has been freely shipped to this market, it has been sold as low as £5 per ton. The few small lots lately imported have been selling with difficulty at from £9 to £10 per ton, whereas your two samples realized £15 10s. per ton. On the other hand, for the 7 samples *Boxwood* (lot 139) there was only one bidding, viz., £7 per ton, at which they were sold. Had there been the competition, which we expected, they would have commanded a much higher price."

However, the object you had in view, viz., the distribution of the woods, has been attained; and any information we may obtain from the buyers, which may be useful to you for your future government, we will with pleasure forward to you.

In due course, you will receive the account sales: you will observe that the woods have been lotted in the same order as the printed list you sent us.

Proceeds of an Auction Sale held in London on July 10th, 1878, by Messrs. Churchill and Sim, of
a consignment of Indian woods per S. S. "Dorunda."

Simla dated Novr 1878.

Forests.

SIR,

In continuation of the letter from this Department to you dated the 4th May last, I am directed to forward for information and for communication to the Officers of the Forest Department, copy of a Circular issued by the Inspector General of Forests, which contains particulars of the sale in London of the Indian woods sent to Messrs Churchill and Sim in April last, and to suggest that with the view of bringing the wood

woods of this country to the notice
of the English trade, it might
be found advisable to send
from time to time selected
consignments from Madras
to Messrs Churchill and Son,
to be sold by them in the London
market.

I have the honour to be
Sir,

Your most Obedient Servant,

C L Supper
