Mr. B. has for all
not more further
the matter at
present
5/2 J.M.

C. 20 Feb/58 R. 22/2/58

St Thomas Mount,

16th February 1898

From Surgeon Major F. Nicholson
Army Medical Department

To The Secretary to Government
Revenue Department

Sir, In reply to your Memorandum No. 241
of the 16th inst., I have the honour to state that
I should be glad of an opportunity of
studying the class of substances used
for their properties of advantageously
modifying fermentation.

The explanation of the use of Acacia
bark by the action of its tannin on
albumen is possibly correct but it is
discordant with the generally received
opinion that fermentation is checked
by agents which precipitate albumen.

The study of the drugs more particularly
mentioned in the Report accompanying
your memorandum would throw
light on the subject and develop the

arts in which they appear to be ingeniously
employed.

As Mr Broughton pointed out, the
investigation is far from simple; it
would require a laboratory and some
time, but both could be utilized for
other or collateral researches affecting
the revenue and resources of the
country.

I have the honour to be

Sir

Your most obedient servant

Edward Nicholson
